"HOW DOES YOUR GARDEN GROW?"

There are two kinds of female gardening—as the keen observer has undoubtedly noticed. One is the undermanned variety with hoes and spades and sows, and is usually conducted in khaki knickerbockers and a farmer's hat. The other is the dilettante type which sows little but reaps much admiration. It is to this second group that the charming smock tunic shown in the picture belongs. It is admirably suited to a stroll in the garden with one's latest admirer, with occasional snipping of leaves and picking of buds, and much inconsequential but enjoyable chatter. The blouse might also be used by her who dallies with art, in which case it will be found occupying first place at studio tea parties. This model is developed in lustrous crepe de chine from the South Manchester looms, in a lovely shade of apricot. It is an excellent example of the new long, flat tunic which will be worn with separate skirts as the season advances, for it is a delightfully cool easy thing to slip into on warm days, and is guaranteed to agree with almost any type of skirt or slip. The lady in the picture chose to wear it over a skirt and under a hat of the new tourterelle (dove) color, and achieved a most restful effect.

Sunshine Assisting Fruit—Fruit men are rejoicing over the present spell of fine weather, for this is a critical time for the cherry trees and a continuance of the rainy weather would have resulted in ultimate losses. While it will be necessary to charge a small amount for this service, the charges are levied so as to make the transportation self-supporting and not as a financial venture. Persons having rubbish and trash ready are asked to place this in boxes or barrels and set them in front of their places. The Salem Boy Scouts are taking an active part in this work and each truck will have one of the boys along.
