THE DRINKING WATER
 The larger new water wheel is a separate installation from the old one that has been running for a long time, delivering some 50 horsepower; direct power, to the pumps.

FOR RENT 14

Two Big Savings
 The use of the new water wheel will make another big saving. And this saving will be increased as new machinery is added in the state flat plant and other industries.

FOR RENT 15

Looking Better
 Under the direction of Mr. Quinland and the other heads of departments at the prison, the buildings and grounds on the inside of the wall, that looked like a wreck after the fire last summer, are beginning to take on an appearance of neatness and order.

FOR RENT 16

More Than An Ordinary Drama
 Constance Talmadge, screen idol of thousands of theatergoers, is revealed in an entirely new and intensely gripping role in "The Dangerous Maid," which is the current attraction at the Oregon theater. Few realized fully the true dramatic talent possessed by this popular star prior to her appearance in this powerful casting.

FOR RENT 17

Power Plant, Too
 Mr. Quinland has about completed the power plant at the prison. The new water wheel is now in running order, and it is being hitched up to the electrical equipment. This will all be ready about the first of June, when this water power will be used in making all the lights for the institution, and in turning all the motors employed in the mechanical operations, in the flax plant and elsewhere. The water wheel delivers about 231 horse power. As most of the lighting will be used at night, there will be plenty of power for running the motors in the day time.
