"I had been trying to tell the men what Christianity stands for, and General Feng immediately followed me. He said:

"'Don't believe anything the preacher has been telling you, that it will be an easy thing for you to be a Christian. For, in the first place, when you become a Christian you will have to think for others, and what Chinese was, ever so stupid as to want to think for others and work for others? Every Chinese wants everyone else to work for him. If I should go out into the country and say, The Jesus Church wants you farmers to work for others,' they would look at me as if I was crazy. I want to ask you some questions. Has anyone used any compulsion to get you to take this stand? If they have, hold up your hand, for you can be excused. No one can compel you to be a Christian. But men, if you wish to serve and sacrifice and to love your God and your country, and because you know it is the right thing to do, and you wish to be baptized and join the church voluntarily, you are welcome to do so. Do you want to?' And that mighty throng of a thousand and one hundred men shot up their right arms as one man and answered, 'We do!' I wish some of our people in America who can hardly hold up a hand could have seen the vigor and power and the manhood back of the way in which those arms shot up as the men declared their allegiance to the King
