"HOOVER BRIGHTENS THE CORNER"

(From the Omaha Bee)

"Secretary Herbert Hoover of the Department of Commerce did not make a very long stay in Omaha, but it was time enough to drop some words of good cheer. He sees fairer skies and greater prosperity ahead. The crape hanger gets little consolation from Mr. Hoover at any time. On this occasion there is right, but it is also a great newsnothing whatever to sustain old John Q. Gloom in any of his paper and as such it feels bound to lugubrious prophecies.

"Mr. Hoover, who is in a position to know, says there is a shortage in the normal wheat production of the world. What- sick. ever the cause, this is an item in favor of the wheat growers of Nebraska. He also says that Europe has about reached the normal consumption of food products, and this is also an encouraging factor in the local problem.

"Our own country is not decreasing in its requirements. Latest estimates as to the population place the number of people in the United States at 112,826,000 as of January 1, 1924. This means that there are 7,100,000 more mouths to feed in this country than on January 1, 1920. That is more than the entire population of some foreign countries about which we have been hearing so much.

"The constantly increasing demand for the products of our country by our own people is enough to insure steady employment for practically all who work. We have a surplus of foodstuffs for exportation, but it is getting less and less each year as the population increases. So long as the American farmer is protected in his home market, and he will be as long as the Republican policy is enforced, he will be certain of return for than prevailed in the first part his labor. His greatest danger lies in the free trade policy advocated by the Democrats, which will expose him again to the competition of cheaper production costs, which he can not meet. Not to speak of a home market restricted because of the unemployment that always follows a Democratic tariff law."

The above from the Omaha Bee is encouraging: Herbert Hoover does not talk through his hat. His words are conclusions from facts and statistics-

On Wednesday and Thursday, August 20 and 21, the Western Nut Growers' association will have a tour of the walnut and filbert orchards of the Salem district. They will start at Silverton at 9:30 on Wednesday and from Salem at 9 on Thursday. This tour will be given to much inspection and instruction, and exchange of ideas, and not much time will be taken up in traveling from orchard to orchard. These annual tours are capable of great good to the nut industries of our district, which are becoming annually greater and more important. Salem is the walnut and filbert center of the world, for prodnots of high quality.

President Coolidge stands for safe and sane progress. He is not a radical and he is not a reactionary. He just occupies high American ground upon all the questions that arise. The country needs such a man because up to this time we have had the radicals pulling hard for irresponsible government and we have had the reactionaries just as determined pulling against all progress. It seemed providential that in the dark days of this republic when our president lay dead that there should spring to the leadership of the party this man Coolidge, full armored, fully equipped, strong and masterful to work for sane, progressive, intelligent gov-

More employment of men and money and greater activity in all lines of business in Oregon during the remaining months of 1924 of the year are definitely assured by the number and volume of construction projects under way or authorized and by the expenditures planned by municipal and county governments, railroads, public utilities and private enterprise.

FORD FOR THE SENATE

Henry Ford has declared that he will not run for the senate and 34,000 people have insisted that he shall run. There are a great many things about Ford that are not admirable, but if his candidacy would prevent Couzens' renomination, it is his duty to run. Couzens is absolutely impossible and unfit to be senator from Michigan. He is a spoiled child of fortune. Ford made him all his money, and now he thinks he is favored by the gods.

In addition to this the country needs a man like Ford in the senate. Some say he would be lost there, but the time has come when we must put these high caliber business men in the senate where they can help level the lump that is growing so hard that it can hardly be cracked now. There would be no such thing as senatorial courtesy with Ford in the senate. He would insist on throwing out the red tape and organizing for business. One man like Ford would have a great influnce over legislation.

THUNDER AND LIGHTNING

There has been a fiction that it never thunders in Oregon, and if there is no thunder there could be no lightning. Saturday night and Sunday dispelled this fiction. Of course, the old-timers explained Here is the head and first para- it the usual way by saying that this was "most unusual." Well this is a most unusual season. It is proposed that we hand it over to congress, the lower house, if it can do the job, but if it fails, then to the upper house, the senate. It is not an inviting prospect for those who love selfgovernment and believe America should govern itself.
