The Church That Welcomes Strangers

THINK THIS OVER

The man in the Packard Six who just passed you pays:

No more than you to wash your ordinary car.

No more than you to garage it.

Gets 16 to 18 miles and more to a gallon.

20,000 miles and over to a set of tires.

Averages per year much less than you for maintenance.

Suffers less depreciation than you.

Beats your re-sale price by hundreds of dollars, if and when he sells.

Many prefer to take advantage of Packard's extremely liberal time payment plan to enjoy immediately the advantages of a Packard Six or Packard Eight—purchasing out of income instead of capital, just as practically all other necessities are now bought.
