The Bordeaux growers have suffered unusually heavy on account of the long unbroken rainy spell during August. Buyers here are placing large orders for California prunes, particularly for the Santa Clara grade. It is similar to the Bordeaux type of prune. Oregon has received a few scattered orders for her prunes, though the Italian variety of prune is not well liked, being considered a little acid. It is estimated that a great number of metric tons of California prunes will enter France this year as the Siberian prunes, which are popular there, are very poor.

There Must be Ideals

IN some lines of work a man might conceivably make a success with just the right equipment, merchandise and ideas. But in the funeral director's profession, ideals are essential as well.

It is the ideals of the funeral director that determine the type of service that he will render. For it is his ideals that formulate his policies.
