End of Motor Gearshift

Aim of French Engineers PARIS, Oct. 31 .- (AP)-The death of the gearshift in automobiles often has been announce but the funeral has never taken place. The latest advance notice of the passing of the gearshift and the differential is a complicated mechanism shown first at last year's auto salon, and exibited again in perfected form this year by one of the best makers in

France. It has been tried for two years n trucks and some test cars, but probably won't get on the market until next year. It is a series of ratchets automatically thrown in to action progressively as the car gains speed so that the motor, continuing to turn at a normal spe applies its power at what corresponds to a very low gear at the start, and at an increasingly higher gear as the speed increases, un-til direct drive is reached.

As there is neither differential nor gearshift the driver has only on the accelerator. The amount of gas alone determines the power applied, and the speed is dependent upon the power required to move the car.

Besides simplifying a car, this mechanism is intended to obviate shock to the engine and prevent stalling the motor. If a heavy load were put suddenly upon the engine the mechanism automatically would adjust itself, changing the gear to a lower one that would allow the engine to maintain an efficient speed while propelling the car at a slower rate.

Perplexity in Balkans

He prefaced the address although little is heard of the doubtful state of affairs outside of the immediate regions affected. New boundary lines have been run through towns and villages in various countries and even across the farms of peasants themselves In many instances it is reported that individuals whose property is actions and his relations with his concerned do not know to this day to which state they should pay taxes. Estimates have been ma by investigators that it will require ten years or even longer to get the boundary lines straightened out, and conditions amicably settled for many thousands of persons.

Darkens Beautifully and Restores Its Natural Color and Lustre At Once Common garden sage brewed in-

to a heavy tea, with sulphur and alcohol added, will turn gray. streaked and faded hair beautifully dark and luxuriant. Mixing the Sage Tea and Sulphur recipe at home, though, is troubleso An easier way is to get the readyto-use preparation improved by the addition of other ingredients a large bottle, at little cost, at drug stores, known as "Wyeth's Sage and Sulphur Compound," thus avoiding a lot of muss. While gray, faded hair is not sinful, we all desire to retain our youthful appearance and atractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray bairs have disappeared. After another application or two your hair becomes beautifully dark, glossy, soft and luxur-
