

## DAIRY LEADERS TO ATTEMPT TO AGREE

### They Will Try to Decide on Legislation to Be Urged in Present Session

A legislative program satisfactory to the dairy interests of Oregon will be the subject of the conference of various dairy leaders and organizations at the chamber of commerce in Medford, next Monday, January 19. The call for the conference is sent out by Chester L. Mulkey, president of the Oregon Dairyman's association, and asks the dairy representatives to meet the day preceding the regular meeting of the state association, which will be held Tuesday and Wednesday following.

"It appears that there will be considerable legislation of various kinds proposed by the different phases of the dairy industry," says Mr. Mulkey. "It ought to be possible for most everyone to agree on the main points likely to be at issue. At any rate, we should try to have general agreement on the most important issues. This will save the time of the legislature and prevent our pulling at cross-purposes."

Representatives of dairy interests invited to the conference in addition to those named as a legislative committee of the butter-makers' association and the dairyman's association include the following:

- Raw milk dealers—J. G. Jorgenson, Portland; Dr. D. W. Mack, Portland; A. Ward, Hillsdale, and Homer Franklin, Portland.
- Pasteurized milk dealers—A. M. Work, Portland; Charles Eckelman, Portland; Fred O'Donnell, Portland; Steve Wilcox, Portland, and P. H. Gregory, Portland.
- Feed dealers—A. V. Hemming, Portland; Hodgen and Brewster, Portland; Triangle Mills, Portland; M. H. Burlingame, Forest Grove, and Farmers Union warehouse, Eugene.
- Ice cream and butter manufacturers—Edward Burr, Portland; J. E. Dunne, Portland; C. W. Laughlin, Astoria; M. N. Boney, Eugene; W. E. Block, Hood River; H. C. Ryan, Portland; Jack Frost, Portland, and Peerless Butter company, Portland.
- Cheese manufacturers—Joe Larson, Marshfield; Carl Haberlach, Tillamook, and Otto Friedlin, Portland.
- Farmers and breed associations—Ed Cary, Bay City; Frank W. Durbin, Salem; Octav Vogel, Hubbard; Henry Heise, Beaverton, and D. O. Woodworth, Albany.
- Farm organizations—George A. Falmeter, Hood River, and Herbert Egbert, The Dalles.
- Miscellaneous—J. D. Mickie, Portland; Dr. Frederick B. Stricker, Portland; Paul V. Maris, Corvallis; Prof. G. R. Hyslop, Corvallis, and state livestock sanitary board, Salem.

**Study Proposed Measure**  
The president is desirous that all these representatives may attend. Effort will be made to study carefully every proposed measure. The aim is to have a complete understanding of every measure that may be proposed with an agreement if possible on whether or not it should be passed. The following program will be carried out:

(Thirty-second annual meeting Oregon Dairyman's association, McMinnville, Oregon, Jan. 20-21, 1925.)

**Tuesday, January 20.**  
10 A. M.—Call to order—Pres. Chester L. Mulkey.  
Welcoming address, Mayor C. W. Wright.  
Response, D. O. Woodworth, Albany.  
President's address, Chester L. Mulkey.  
Reading of minutes of last meeting, P. M. Brandt.  
Appointment of committees.

**President's address, Chester L. Mulkey.**  
Reading of minutes of last meeting, P. M. Brandt.  
Appointment of committees.  
Pres. Chester L. Mulkey.  
12-1:30—Luncheon.  
1:30—Butterfat and its Relation to Health of the Child, C. Ulysses Moore, M. D., Portland.  
How Near We Come to Raising Our Own Feed, C. G. Brown, Shedd.  
Thirty-two Years of Dairying in Oregon—the Future? William ("Uncle Bill") Schulmerich, Hillsboro.  
6:30—Banquet, Hotel Edgarton.

**Wednesday, January 21.**  
10 A. M.—Our Success With Alfalfa in the Willamette Valley, E. W. Cooley, Jefferson.  
Some Facts About Vitamins and Minerals in Feeding Dairy Cattle, Dr. Harry G. Miller, assistant chemist, O. A. C.  
12-1:30—Luncheon.  
1:30—Farm and Labor Organizations Interested in Dairying:  
1. George A. Palmeter, master state grange, Hood River.  
2. Herbert Egbert, State Farmers union, The Dalles.  
3. E. J. Stack, secretary State Federation of Labor, Portland.  
What to Plant Where the Grain of "Friesen" Out, George R. Hyslop, O. A. C. experiment station, Corvallis.  
Marketing Dairy Products Under Cooperation, H. H. Kipp, manager marketing committee, Portland Chamber of Commerce.  
Business session.  
1. Reports of committees.  
2. Election of officers.

**ONE DEAD IN TRAGEDY**  
ARLINGTON, Ore., Jan. 13.—Manuel Moreno, 22, railroad section hand here, today shot and wounded seriously Miss Mary Magee, 18, then shot himself through the head, dying instantly. The tragedy took place after Moreno had accosted Miss Magee, demanding that she marry him and she had refused, Miss Magee said.

## THREE THINGS IN GOOD CORN SECRET

### Good Seed, Good Soil and Intensive Cultivation to Retain the Moisture

**Editor Statesman:**  
Yours of the 8th received, and as it is the second time I have been asked to tell how I grew the corn that was awarded first premium at the 1924 corn show, for silage corn, I will now try to do so.

The latter part of September, 1923, I went into my corn lot and gathered seed corn for my 1924 crop. In doing so I selected ears from strong, vigorous stalks that held two well developed ears of corn. (An experiment station, also, I put this seed corn in the barn on a wire away from the mice. It remained there until time to plant. The plot of ground on which this corn was grown had been seeded to clover and the year 1922 produced a light crop of native grass and clover after having a top dressing with fertilizer from my chicken yards, March, 1923. I plowed this ground and sowed it to barley, January, 1924. I covered the ground with a liberal coat of barnyard manure. February 12 I turned this under with an eight inch one horse plow. (Being a one horse farmer.) The land lay in this condition until the last of April and the first week of May, when I took my one horse disc and went over the ground three times. Harrowed with a spike tooth harrow, leveled the land with a float and marked off to cultivate two ways. Having an ideal seed bed, we planted the corn May 8th, the old way, with a hoe. Every kernel going into moist earth and the weather being favorable, the sprouts were showing through in seven days. The corn was cultivated three times and hoed once.

At no time during the planting or cultivating of this corn had I a thought of entering the corn show, and only went in on a request at the eleventh hour, to make a larger display.

This corn was fully matured at the time of said request and should have been gathered sooner for a show corn.

I think the secret in producing a good crop of corn is first, good seed, planted in a seed bed free from dry hard clods. Second, a moist, rich soil. Third, intensive cultivation that will retain the moisture and make the plant foods in the soil available.

JOHN COBENFORTH.  
Salem, Or., R. 4, Jan. 13, 1925.

should be cultivated again and again, until it is too high and would be knocked over. If weeds still grow it should then be hoed.

**Good Points of Industry**  
The good points of the corn growing industry are: Corn is the best food for fattening hogs, and when raised here it is much cheaper than when sent in from other states.

The corn with which I won third prize was raised on river bottom land on which no fertilizer was ever put. The river overflows nearly every winter, which makes fertilizers unnecessary.

The corn was planted early and cultivated seven or eight times and hoed about as often. Sincerely yours,

ELEANOR FROEMEL.  
Mt. Angel, Ore., Jan. 13, 1925.

## ALDEN BROWN WILL COMPETE THIS YEAR

### He Expects to Grow Corn to Exhibit at the Shows of the Coming Winter

**Editor Statesman:**  
I received your letter and you wanting to know what are the important parts of raising corn. The method that I used in raising corn was, first, I tested my corn to find what per cent would grow.

You plow the ground and let it lay for a while and then work it up again and get the ground pretty fine, then you get seed corn that tests 100 per cent if you can. It is best to plant the corn by hand because you can space it and put 2 seeds in one hill.

When the corn is about 3 inches high the ground should be dragged to break the crust on the ground. When it gets about 6 inches high it should be cultivated and the weeds kept out of the corn rows, and the corn should be hoed around the hills. It should not be cultivated too deep, because it will disturb the roots and break them off, which will hurt the corn.

When you are selecting the corn for show pick all the ears off and lay them all out, then pick out the ten best ears which you are going to take to the show. My corn took second prize at Independence corn show and took the seventh prize at the Salem Armory show. I am going to raise corn this year for shows.

Hope this letter will be what you are wanting.

ALDEN BROWN.  
Independence, Ore., R. 1, Jan. 14, 1925.

## MANUFACTURING THE HANDMAID OF OREGON

(Continued from page 3)

quires no great amount of vision to perceive the accomplishments to be obtained within the next 25 years.

The resources of the Willamette valley are large as to entitle it to be far the larger part of this development. It is no time now to become complacent and self-satisfied. Close contact with these great resources inclines a population to become lazy-minded unless a strong self-conscious effort is constantly put forth to overcome such a tendency. That is the only present obstacle standing between this valley and the accomplishment of its possibilities of development as justified by its present opportunity.

Just how much would Europe value America's advice if America were dead broke?

## RED PEPPER FOR COLDS IN CHEST

Ease your tight, aching chest. Stop the pain. Break up the congestion. Feel a bad cold loosen up in just a short time.

"Red Pepper Rub" is the cold remedy that brings quickest relief. It cannot hurt you and it certainly seems to end the tightness and drive the congestion and soreness right out.

Nothing has such concentrated, penetrating heat as red peppers, and when heat penetrates right down into colds, congestion, aching muscles and sore, stiff joints relief comes at once.

The moment you apply Red Pepper Rub you feel the tingling heat. In three minutes the congested spot is warmed through and through. When you are suffering from a cold, rheumatism, backache, stiff neck or sore muscles, just get a jar of Rowles Red Pepper Rub, made from red peppers, at any drug store. You will have the quickest relief known.—Adv.

## OREGON IS WOOD LOT FOR NATION

George E. Griffith, Public Service Specialist, Talks Before Rotary Club

George E. Griffith, public service specialist with the forestry service at Portland, addressed the Rotary club at their regular meeting at the Marion hotel yesterday on the subject "Service of Forestry."

Facts pertaining to the forestry service and the national welfare were depicted by the speaker, who stated that the last timber stronghold of the United States was situated in Oregon.

"Wood," he said, "is the prime essential of civilization." Upon it is based the very key to Oregon's

## RAISES POPCORN ON SALEM CITY LOTS

### The Methods Used By Mr. Bolter in Raising It; \$50 Worth on Two Lots

**Editor Statesman:**  
In reply to your letter in regard to raising corn, will say that I might give some information that probably would be of some benefit to new beginners. Have been raising popcorn for several years on city lots, and had nearly \$50 worth on two ordinary sized lots; but would not advise any one to go into it very heavy as there isn't much market for it.

My method of raising corn is to plow the land about the last of February or the first part of March unless it is sod, then, it ought to be plowed in the fall. I don't harrow it until some time in April before it gets too dry. About the first part of May I plow it again and then disc it again if it needs it.

The object of discing it before I plow it the second time is that it is more important to have ground pulverized below the surface than that it is on top. It requires considerable cultivation after it is up. It ought to be hoed by hand once and cultivated two or three times with a horse. Respectfully yours,

G. C. BOTLER.  
Salem, Ore., Jan. 11, 1925, 2016 Trade Street.

prosperity, the reason for the huge incomes to Oregon.

Because of the unique situation of Oregon this state must continue to be the wood lot of the nation. The land of western Oregon is not fit for cultivation, even if the stumps were removed, and consequently the land must be reforested.

With the passing of the Clark-McNary forest act a forward step was taken because it gave proof that the deforestation of the nation was being regarded seriously and that the era of timber was passing.

Much of the present attitude towards the forest, declared the speaker, had come down to us because the forefathers considered it as their enemy.

The production curve of Oregon is following the production curve of Michigan, declared the speaker, and the story would be the same, except that Oregon would be reforested to some extent and the timber would in time be replaced.

The contributions of the national forests to the state and county were stated by the Rotary speaker. Part of the revenue of the forest was turned over to the county and state, in addition to the many miles of trails and roads that were being constructed annually.

In speaking upon the enemies of the forest, Mr. Griffith stated that man made fires were the worst. The camper, smoker and hunter took heavy toll each year and the cost ran up into millions. This sacrifice to the fire god "Moloch" should not continue, was his declaration.

Ray Chapter, a former resident of Salem, gave an impromptu solo before the club members yesterday. A splendid song service was another feature of the Rotary meeting.

## More Information Wanted By Linn County Delegate

Representative L. L. Swan of Albany does not see why he should vote on a matter upon which he has no knowledge and has written to Governor Pierce asking explanation of certain statements made in the biennial message to the legislature.

In his message Governor Pierce said: "The public service commission should be reconstituted. It would be far better to abolish the commission than to let it continue in its present form. I trust that no appropriation will be made for its continuance."

Reasons why the commission should be abolished are sought, Representative Swan holding that he has no information warranting him to vote as indicated by the governor. Should he be informed and deem it advisable, Representative Swan indicated that he would vote with the governor.

## Bill Hart Doffs Guns to Appear in Divorce Action

LOS ANGELES, Jan. 13.—William S. Hart, rider of the plains and desert in film dramas, laid aside the picturesque garb of a western ranger today for more conventional attire to appear in court here to resist the efforts of his wife, Winifred Westover Hart, to break a separation agreement entered into several years ago.

The separation agreement established a trust fund of \$103,000 for Mrs. Hart and a similar sum for her baby son, William Jr., with the clause that she abandon her screen pursuits. She now seeks to rescind the agreement and return to her former place before the camera because, she alleges, the sum is insufficient to keep her.

## IF SKIN BREAKS OUT AND ITCHES APPLY SULPHUR

Just the moment you apply Mentho-Sulphur to an itching, burning or broken out skin, the itching stops and healing begins, says a noted skin specialist. This sulphur preparation, made into a pleasant cold cream, gives such a quick relief, even to fiery eczema, that nothing has ever been found to take its place.

Because of its germ-destroying properties, it quickly subdues the itching, cools the irritation and heals the eczema right up, leaving a clear, smooth skin in place of ugly eruptions, rash, pimples or roughness.

You do not have to wait for improvement. It quickly shows. You can get a little jar of Rowles Mentho-Sulphur at any drug store.—Adv.

## THE MINT GROWERS ARE PREPARING FOR A LARGE INCREASE OF ACREAGE

### Their Association Has Chosen its Officers for 1925—Some of the Members of the Association Have Roots, Which Will Be Furnished to New Growers as Long as They Last—Likely to Be All Taken Soon

The Oregon Cooperative Mint Growers association, met at the Salem Chamber of Commerce rooms on Jan. 10, 1925, for their annual meeting. The meeting was well attended by members and quite a number of non-members, as well as other visitors who are interested in the growing of mint and were present.

Dan J. Fry attended and spoke on the sales end of the product. F. A. Doerfler, field man for the First National bank, spoke upon the production of mint oil and the numbers of inquiries for information upon the planting and growing of mint oil.

E. B. Wallace, who is the oldest grower of peppermint oil in the association, and who lives at Albany, Oregon, spoke briefly upon the culture of the herb and what to expect if the plant was not cared for, both in the growing season as well as the harvesting season.

Albany, Oregon, president; G. J. Moisan, Gervais, Oregon, secretary; S. D. Manning, Gervais, Ore., director. Meetings will be held in Salem, Oregon, semi-annually, and subject to the call of the president.

**Best Methods of Planting**  
(Because of the boom that is on here in peppermint mint growing, on account of the high price of Oregon peppermint oil, the following was secured from Mr. Moisan.)

Prepare land well by deep plowing, discing and other work to have the surface perfectly level, draw furrows with an eight inch plow about four to five inches deep, three feet apart, then planting is done by hand. Fill a sack with mint roots, place over the shoulder as when dropping potatoes, walk along in the row made with the eight inch plow, drop roots continually. In this row, flat, and cover slightly with the feet when passing over them, and finish the covering with a team and float after the planting is all done. It is seldom that one can get a man who will plant one acre per day, and it is safer to say three men will plant two acres per day.

Several New Members  
The association accepted several new members and are assured of more, with increased acreage in its infancy, but has passed the experimental stage. From government tests Oregon does produce peppermint oil that is second to none.

The officers, for 1925, were elected as follows: E. B. Wallace,

### No Fertilizer Was Used on Land Eleanor Froemel Had to Produce Her Corn

**Editor Statesman:**  
Received your letter asking me to tell my methods of raising corn.

The three things to remember when planting corn are: Work the ground well before planting, select the best seed corn, and keep weeds out by cultivation.

By working the ground well, I mean it should be plowed early and worked until it is fine, the finer the soil the better the corn will be.

Always select seed that you know is good. Poor seed will not grow into prize corn. In this country corn should be planted as soon as it is warm, usually in the first part of May.

After the corn begins to grow it

TO DARKEN HAIR APPLY SAGE TEA

Look Young! Bring Back Its Natural Color, Gloss and Attractiveness.

Common garden sage brewed into a heavy tea with sulphur added, will turn gray, streaked and faded hair beautifully dark and luxuriant. Just a few applications will prove a revelation if your hair is fading, streaked or gray. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get a bottle of Wyeth's Sage and Sulphur Compound at any drug store all ready for use. This is the old-time recipe, improved by the addition of other ingredients.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and, after another application or two, your hair becomes beautifully dark, glossy, soft and luxuriant.—Adv.

**Be Thrifty!      Make Money!      Save Money!**

## The Statesman Announces

# Want Ad Thrift Week

### 7 TIMES FOR THE PRICE OF 3

**ALL STATESMAN WANT ADS ORDERED FOR THRIFT WEEK, BEGINNING SUNDAY, JANUARY 18, WILL BE RUN UNTIL SUNDAY, JANUARY 25 INCLUSIVE, FOR 5c A WORD—SEVEN TIMES FOR THE PRICE OF THREE TIMES!**

**The Oregon Statesman,**  
215 South Commercial St.

Use this Coupon or separate sheet, as you prefer, or Telephone 23 or 593.

Please insert the following ad seven times beginning Sunday, January 18th, at 5c a word for the entire run of seven issues as per your Thrift Week Offer. I inclose \$

**STATESMAN WANT ADS** are almost magical in results—that's why Statesman Want Ads are growing. The more people use them the more friends we make and the faster they grow. To introduce more of our readers to the Want Ad habit, we announce Want Ad Thrift Week for seven days—beginning Sunday, Jan. 18. All Want Ads ordered to start on that day will be run seven times for the price of three times—5c a word.

The only condition is that the same copy must run for the seven times. This is to assure results so you will be sure to use Statesman Want Ads again. Now think up everything you would like to sell or exchange, or anything you want, and send in your Want Ad as early as possible.
