Doughton & Sherwin Name Of Salem Hardware Store

The truth of the saying "There's many a slip 'twixt the cup and the lip" was again demonstrated in the recent announcement that Merlin Harding had purchased the interest of A. F. Marcus in the Doughton & Marcus hardware firm. After the article was written there arose a disagreement over the deal and it was dropped. The same day, however, F. E. Sherwin closed the deal for the Marcus interests and has taken possession of the purchase so that there is no danger of this information going stale. Mr. Sherwin is a member of the well known firm of Sheldon & Sherwin.

Mr. Doughton retains his interest in the hardware firm which will be known as Doughton & Sherwin. Mr. Sherwin will give his personal attention to the hardware business but will still retain his interest in the firm of Sheldon & Sherwin. Mr. Sherwin is so well known in Salem business circles as to need no further introduction.

JEWELER SEES BRIGHT FUTURE

L. H. Burnett to Enlarge Store Here to Accommodate Big Business

Expansion and rearrangement of the Burnett Bros. jewelry store at 286 Washington street, Portland, is contemplated by L. H. Burnett, member of the firm, who is now in that city to attend the annual meeting of the corporation, to accommodate a half million dollars' worth of business the store is expected to do in 1925, according to word received here by R. C. Alken, manager of the Salem store.

Burnett says his Portland store did ten times the business in 1924 as its predecessor did in 1922, or \$250,000 against \$25,000.

Enlargement of the Portland store, and expansion at Salem also, are to follow as a result of this remarkable showing. Burnett Bros. have stores also in Seattle, Tacoma and San Francisco. The northwest stores compare favorably with San Francisco in amount of business done, Mr. Burnett says.

Stop Drinking Stale Water

Fresh Water Contributes Vitally to Health—Learn the One Way to Have It Always in the Home

Fresh water—and fresh water only—contains Niton, an element as vital to health as vitamins in the diet.

It is this element which causes physicians to send thousands of health seekers annually to drink the waters at world famous springs such as Hot Springs, Arkansas—owned and operated by the Government—Vichy, France, Bath, England and others.

All natural spring water contains Niton, to a beneficial extent for a short period after the water comes from the ground.

What Niton Is Niton is radio-activity. It is what makes water fresh. It is a vital element which Nature intended water to contain.

It is present in water fresh from the spring, because that water in its progress through the underground channels has come into contact with rocks containing millions of tiny radium deposits.

These charge the water with radio-activity—Niton. And water containing this element contributes wonderfully to health.

It relieves and frequently entirely cures chronic organic troubles. Thousands of sick people benefit through their visit to these famous springs.

Those who are well go also to tone themselves up physically. The fresh water thoroughly cleanses. It aids in the elimination of bodily poisons and thus results in new vigor and vitality.

But the treatment is apt to be of temporary value.

Can Not Be Stored For the water soon loses this element. Whether water is stored in bottles, reservoirs or pipes, the Niton rapidly dissipates.

Even water which is bottled at the spring and sealed hermetically has little of this element within a few days.

OPPORTUNITY ROOM TO OPEN MONDAY

Early Start Made Possible By New Arrangements Since Board Meeting

The opportunity room at the Lincoln school is to be started Monday morning, according to the announcement made yesterday by George W. Higg, superintendent of city schools.

Due to change in some of the A rate reduction, however, is not

And all the water we drink is stored water. Thus it is stale water—lacks the freshness which Nature demands.

Now a Way Scientists have for years recognized these facts. They properly value Niton. They realize that it can not be retained in stored water.

They have sought a practical way to provide fresh water economically to every home. Some years ago the way was discovered.

It has been thoroughly tested. Now it is an established fact. The process has been made practical by the development of the Revigator, so named because it aids people to enjoy new health and vigor.

Simple and Sure The idea behind the Revigator is as simple as those underlying all great inventions.

Jars are lined with especially selected radium ore—fast to the inner walls of the jar under 2000 degrees of heat for twenty days.

When filled, the water is brought in contact with the radium ore just as is done by nature underground. Water which has remained twelve hours in the jar is radio-active—contains Niton.

It is fresh water! Drink This Fresh Water Install the Revigator in your home. Drink fresh water daily. Note the results in health.

Your body will eliminate poisons which have lowered your vitality and resistance to disease. Fresh water will aid in keeping the bowels, kidneys and liver active and healthy.

The water is useless. It is neither medicine nor drug. It is merely fresh water which contributes to health all that Nature expects of water.

Learn more today about this invaluable asset to health. Write for our free illustrated booklet which tells the story in far greater detail.
