British Find Children are Changed By Dread Illness

LONDON, Jan. 25.—Because sleeping sickness has so changed the character of children and made some of them criminals, the authorities are considering the building of special schools for these youngsters. Children who have suffered from the disease, it is said, not only change their character, but deteriorate physically and lose control of their emotions.

Reporting to the Metropolitan Asylums Board, Dr. Charles Glyn says: "It seems that the disease may pass through a phase in which physical changes are the only prominent feature, so that crimes may be committed for which the offender is not fully responsible."

HUMBURG MANUFACTURING COMPANY SELLS PLANT

The Humburg manufacturing plant which has been operating here since 1916, sold its holdings to David Carr of Canby and J. F. Holmes of Portland. The deal was made last Thursday.

J. Humburg founded the plant in 1916 and after conducting the business for one year alone formed the Humburg Manufacturing company the following year. The company has operated since then, under Mr. Humburg's management, the principal output being handles for axes, shovels, hoes, rakes and the like.

The new company is to operate and be known under the name of the Double Star Mfg. Co. Their policy will be to not only keep up the manufacture of the commodities listed, but will manufacture other articles and novelties. Their output will be base ball bats, stilts, rolling pins, oars, paddles, camping tables and chairs as well as a complete line of handles for axes, shovels, picks, hoes rakes and others. Mr. Carr, who has practical charge, has been in this line of business for the past 28 years and is well versed in the manufacturing of these products as well as finding a market for them.

The plant will undergo a remodeling to take care of a larger output of commodities. A dry kiln is being built to dry the material used in the work and to take care of immediate rush orders.—Mt. Angel News.

Health Held State's One Greatest Asset

One of the most significant aspects of modern conservation is a high regard for the health of the community. In the strenuous life of the 20th century the demand is for a maximum amount of mental vigor in a sound body.

Community health, state health and national health is a composite of individual health. The better the general advantage of community health. The healthy munity haith. The more healthy, producing individuals any community has and the longer such individuals live to produce, just that much greater will be the progress of that community.

Good health is both an individual and a national asset. It is just as essential and fundamental to the integrity and permanence of a democratic nation as scientific progress, political achievement industrial development or economic accomplishment. Indeed it is the basis upon which all these things are built.

And sometimes we think maybe a man's wife is a nag because she is married to a jackass.
