## MAXSON, MAHALL, JUDELL

### VERSES AND REVERSES

**Hot Dog.**  
"Tis passing strange the way our  
laughers twist:  
Here is a fact that sets me all  
agog—  
The dog ran out to bite the motor-  
ist.  
And motorists stop for a bite of  
dog."

—EDWARD CROOK.

**Hey!**  
Some persons are full of woe,  
Because for them there is no  
pay day;  
A father should be merry though,  
Because he always has his pay-  
day.

—NATHAN M. LEVY.

**Her Presentation.**  
"Where are you going, my pretty  
maid?"  
"To get a court costume," she coy-  
ly said,  
"Hobnobbing with princes, my  
pretty maid?"  
"No, sampling a jury, kind sir,"  
she said.

—J. S. CLELAND.

**Stage Business.**  
"My lord, the carriage waits,"  
Whisper her then advance.  
"And while it waits," she further  
states,  
"I'll do a song and dance."

—ATHOS.

**Doggone!**  
"My dog's no prohibitionist,"  
Said little Ethel Hines,  
"He never growls ferociously—  
At night he likes light wines."

—E. P. Pitzer.

**Not Soothing.**  
Wiggins: "What makes Tom so  
haggard looking?"  
Blake: "Oh, he's the fellow who  
tells bedtime tales to tiny tots  
and he has to stay nearly all  
night thinking up some new ones  
for the next night."

—Gertrude Marie Heller.

**Down to Earth.**  
Grace: "What did Millicent do  
when she went for a ride with  
that aviator?"  
Edna: "Oh, she landed him, all  
right."

**Sing, Birdie, Sing.**  
Banker: "What are you doing  
with all of this money I'm lend-  
ing you?"  
Borrower: "I'm training my  
daughter for the concert stage."  
Banker: "Well, tell her to hur-  
ry up so she can cash some of  
her notes, for I'm not going to  
cash many more of yours."

—Charles C. Mullin.

**Spiders.**  
(By Kid Boots)  
A spider is a unpopular insect  
that lives in a spider web and eats  
flies for a living, the biggest con-  
solation being that the flies are

just as unpopular.

Girls scream when they see a  
spider and even fellows don't feel  
very cordial at the sight.  
Spiders are probably as much  
afraid of you as you are of  
them, and maybe more, because  
you are bigger although you may  
not be anywiser than they are.

A spider can make its own web  
with thread out of its stomach,  
being a hard thing to do for any-  
body but a spider and if you  
could do it you would think you  
was a spider, but you don't go  
around bragging about how smart  
spiders are.

This proves its affine thing to  
do what you're supposed to, but you  
won't get much credit for it.

—J. J. O'C.

**Experts.**  
Crawford: "The trouble with  
the fuel situation seems to be  
about the transportation."  
Crabshaw: "Perhaps if the  
landlords owned the coal they  
would get it to move."

—J. J. O'C.

**WALLY THE MYSTIC.**  
He'll Answer Your Questions,  
Somehow  
You'll find the common things of  
life  
Cause arguments and useless  
strife.  
Let Mystic Wally tell you what  
is proper and just what is not.

**Dear Wally:**  
Mystic Man so great,  
Please help me find a brand-new  
mate.  
He ate one biscuit—then he died.  
I'm inconsolable. —A Bride.

**Dear Widowed Bride:**  
Why should I send  
Some other good man to his end?  
Go learn to cook as you should do  
And men enough will ask for you.

**The Parting of the Ways.**  
Dear Wally:  
You're so doggone smart,  
Perhaps you can assist me:  
Just tell me where my hair should  
part  
So girlsies CAN'T RESIST ME.

**Dear Can't Resist Me:**  
If you care  
To make girls call you "Honey,"  
It isn't how you part your hair  
But how you part with money.

**Coldly Distant.**  
Hoyle: "Has your wife any dis-  
tant relatives, old man?"  
Shaw: "All her relatives are  
distant—since they had money  
left to them." —Harriet Lindwell.

**The Jingle-Jangle Counter.**  
Shabby clothes are not in it;  
Clocks are right up to the minute.  
—Arline Williams.  
Circumstance a life will take;  
Onions smother many a steak.  
—Elsie Fruehling.

### COMMISSIONERS COURT

The following is the official  
publication of the record of  
claims before the Marion  
county commissioners court  
for the Jan. term 1925, with  
the amount allowed, bills con-  
tinued, etc., according to the  
records in the office of the  
county clerk.

### PLANE, SENT CRASHING INTO WALL AT 100 MILES AN HOUR IN TEST BY ARMY OFFICERS, FAILS TO BURN

During experiments conducted by the officers at Wilbur Wright Field, Dayton, O., an airplane speeding 100 miles an hour crashed into a concrete wall and was com-  
pletely wrecked but failed to catch

fire. An old plane was used in the test, the first of a series to study the origin of fires after airplane wrecks. The crash did not result in an explosion, as expected, and the test did not furnish as much information as was desired. When the plane struck the wall splinters were hurled more than 1,000 feet into the air.

### SPINACH HAS ABUNDANCE OF IRON, TEN TIMES AS MUCH AS IN CARROTS

It Saves the Lives of Babies and Builds Up the Health of Grown People—Contains the Iron, Vitamins and Mineral Salts That Are Necessary in Giving Growth, Health and Strength

Spinach is the vegetable above most that is both a food and a medicine. Spinach contains 10 times as much iron as is contain-  
ed in carrots, and since milk, while it contains some iron, in the cases of many undernourished infants, spinach is a valuable addition to a milk diet. Spinach and orange juice contain all classes of vitamins in abundance, and a large amount of necessary mineral matter, and the supplementing of milk with these ingredients is now practiced in numerous hospitals and homes throughout the country.

#### To Save Thousands of Lives

Saving the lives of thousands of undernourished babies annually is expected to result from years of research by Dr. J. F. McClendon, University of Minnesota, who, a few years ago, announced a discovery in infant dietetics.

Experiments made with underfed infants, whose mortality rate had been high, proved his theory. At the Jean Martin Brown home in St. Paul a baby gained 23 ounces in one week. The diet had a foundation of powdered dehy-

drated spinach and orange juice.

#### Experimented for Years

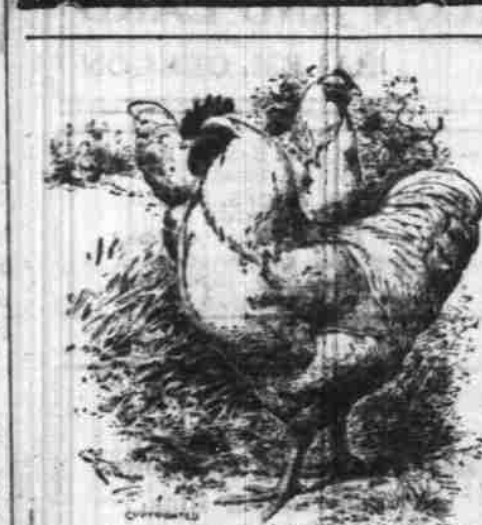

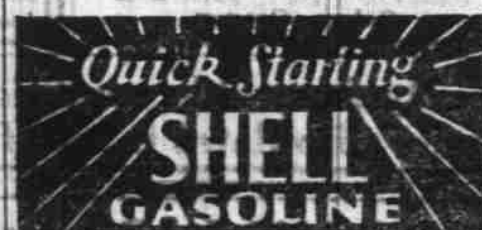

Dr. McClendon came to the uni-  
versity in 1914, and since that time has been deeply interested in dietetics and has for many years been conducting experiments in dehydrated foods. He finally completed his tests and experi-  
ments to such an extent that he considered his findings of sufficient completeness for formal an-  
nouncement.

Dr. McClendon felt that im-  
proper nutrition in infancy and ad-  
olescence resulted in subnormal  
mentality and physique in adults,  
and, with the approval of Dr. J. P.  
Sedgwick, eminent child specialist,  
and Dr. Jeanette McLaren, attend-  
ing physician, began the study of  
nutrition of the infants in the  
Jean Martin Brown home in St.  
Paul.

Infants in the home were large-  
ly orphans and under weight. By  
feeding them about two teaspoon-  
fuls of powdered spinach and one-  
twelfth of an ounce of dehydrated  
orange juice a day he increased  
their growth rate to about three  
or four times what it had been

### Street Decoration Stand Is Outlined at Conference

A conference between repre-  
sentatives of the Veterans of For-  
eign Wars and directors of the  
Business Men's league was held  
yesterday for the purpose of iron-  
ing out certain misunderstandings  
respecting the sale last November  
of street decorations by the veter-  
ans to business men of the city.  
As a result of this conference  
the league reiterated its stand  
taken at that time to the effect  
that it did not sponsor the style  
of street decorations sold by the  
Veterans of Foreign Wars, and  
leaves the decision with each in-  
dividual merchant as to whether  
or not he shall purchase the de-  
corations, the league as an organi-  
zation offering no objection to in-  
dividual purchases being made.

Hundreds of poultry men  
have made fortunes with

**Purebred Chickens**  
bred to lay from 200 to 300  
eggs a year, 30 pens and  
trios of pure bred chickens  
(some with world champion  
records) and  
Valued at Over \$1,200.00

### Will Be Given Away

to ambitious men, women,  
boys, and girls.  
For full information cut  
out this advertisement and  
send your name and ad-  
dress to

**Northwest Poultry  
Journal  
Salem, Oregon**

previously. The prize baby gained  
23 ounces in a week. Even a  
baby with marked rickets gained  
in weight.

"It is difficult to get adults to  
change their diet," says Dr. Mc-  
Clendon. "It has been proved  
that bread made of 1% of pow-  
dered spinach and 10% of soy  
beans meal is excellent in taste and  
highly nutritious."

Dr. McClendon's experiments  
with dehydrated spinach in con-  
nection with baby feedings are of  
importance to every housewife.  
The iron, mineral salts, and vit-  
amins that makes spinach so val-  
uable in malnutrition of infants  
is equally well adapted for build-  
ing up physical health in adults.

### Pomona at Brush College Hold Interesting Meeting

A steady increase in point of  
both interest and attendance  
marks the success of the county  
gatherings in Polk county strange  
circles, as Saturday's Pomona  
session, held at Brush College,  
attested. A record attendance re-  
ported for participation in the  
business meeting at 10:30 a. m.  
in the assembly room, with Master  
P. O. Powell presiding.

An exceptional number of res-  
olutions were submitted. Discus-  
sion and action being taken at a  
later hour in the day.  
Covers for 200 were required  
at the midday spread, to take care  
of the delegations from the seven  
subordinate granges, legislators,  
musicians and others invited to  
appear upon the programs of the  
afternoon and evening.

At 2 o'clock the open meeting  
was called and the seating ca-  
pacity of the room was put to the  
test, nearly all being accommo-  
dated.

The program was opened with a  
piano selection by Mrs. Corydon  
Blodgett, immediately followed  
by a humorous impersonation ad-  
mirably read by Miss Virginia  
Page.

A vocal number, "The Rosary,"  
by Mrs. Ermine B. Fawk, pre-  
ceded the splendid talk upon public  
health by Miss Margaret Gillis,  
demonstrating nurse for Polk  
county. Senator Tooez, of Ore-  
gon City, gave a most lucid and  
convincing talk upon the subject  
of Taxation, a plea for uniformity  
of taxation, on a one hundred per  
cent valuation of all property, his  
address stimulating discussion and  
exciting much favorable comment.  
Mr. Roberts, also a statesman of  
prominence, gave an
