

YOUR HOME

Small House Has Merit as Labor Saver

A WONDERFUL little bungalow which anybody should be proud to own. It requires very little housework, which is a boon to the housewife.

Every living room should have some natural focus to which the natural interests are attracted. In this home the fireplace acts in this respect. This living room can be made very attractive by careful, yet inexpensive, decorations. The use of hardwood floors and soft tinting of the wall, together with an informal grouping of furniture, would indeed make this a real "living room."

With the use of the breakfast nook, the dining room can very easily be eliminated, and in case of emergency a table can very easily set in the living room. This breakfast nook is greatly enhanced by the use of an arched inclosure, while being part of the kitchen, it is really a room by itself. Casement windows are used to very

good advantage in this particular instance.

All the rooms are accessible from the small hall in the center of the house, and by careful planning an abundance of closet space is given. Linen closets

are always appreciated by the modern housewife. This plan allows for one in the hall.

The kitchen is ideally arranged for the saving of steps, there being a good amount of closet space allowed for.

Scientist Traces Written Languages

LOS ANGELES, Feb. 14.—A new ship was launched here recently on the seas of archaeology when Edward C. Gatsinger, astronomer and searcher of antiquities, in a paper presented by him before the Argonaut Club, a philosophical body meeting in the University of Southern California,

outlined the principles of "zodiacal phony" whereby, he asserted, he was able to trace the origin of 20 written languages to the signs of the zodiac.

His findings, Mr. Gatsinger declared, proved that astronomy was a religious science familiar to the more intelligent classes of the ancient world upwards of 12,000 years ago; that the Bible, by means of zodiacal phony, now may be made to reveal many secrets, religious and historical, which hitherto have been locked books; that Israel has a history going back 6,500 years into a period when its high priests, as revealers of the mysteries of the heavens, were more advanced in some branches of astronomy than the star-gazers of today, and that there have been fundamental errors in the rendering by Egyptologists of some of the earliest inscriptions found in Egypt.

Zodiacal emblems, the speaker declared, became tribal or brotherhood symbols, and from that plane stepped into place as written characters, each representing an idea to become later, in altered

form, the letters of the modern graphic systems.

Dwellers in the Hills Tell Truth About Cougars

SEATTLE, Feb. 14.—Cougars of the mountains of western America, like tigers of the jungles of India, don't kill human beings until too old to obtain food otherwise, according to pioneers in the Cascade and Olympic mountains. The views of these old-timers were given in a symposium gathered by a Seattle newspaper after a cougar killed a small boy near Wenatchee, on the eastern side of the Cascade Mountains in Washington.

James Oberg related that 35 years ago a cougar followed him to his father's door. The elder Oberg killed the animal, which proved to be senile.

Another cougar that 32 years ago fell upon a child lagging behind his parents on a trail had dull teeth and claws worn to the fur. A post-mortem showed nothing in the stomach but part of a leather halter.

IS NOW DIRECTOR'S DEPARTMENT STORE

Historic Old White Corner is Undergoing Many Alterations Now

Director's Department Store. That is the name by which the location of the historic Old White Corner is to be known in the future.

It was the general merchandise store of Breyman Bros., who constructed the corner building, in the days of long ago. Then of J. M. Rosenberg. Then the Meyers family, father then sons. Then it was Holverson's. After that it was Stockton's, and of late years it has been mostly the People's Cash Store, with a divided ownership part of the time.

White Stone, New Name. Now for the Old White Corner there is to be the "white stone" of a new name.

But it is to be a name known of all men.

Director's Department Store will carry with it the welcome and guarantees of individuality. There is a man behind the name. He is Simon Director, the owner, whose sole task and aim will be to make Director's Department Store stand for good service; fair treatment; stability. Honorable merchandising. With these aims he will work and strive and plan.

Like a New Store.

As the old People's Cash Store stock and name are disappearing, and Director's Department Store assumes form, as it is doing from day to day now, a new store is being made. There is new shelving, there are new fixtures. The ready to wear department is entirely built over and stocked anew. The best shoes are on the main floor now, the low priced ones in the economy basement. The economy basement, too, is being rearranged, rebuilt and restocked.

People who have known this store will, when they visit it in the future, find it very much changed.

The goods are different. They are bought to satisfy the best trade, and they are being better displayed than ever before.

Director's Department Store is to live up to its name; to be a real department store, and it will be so conducted as to be a credit to Salem, and to help draw trade here from long distances.

Surgeon and Scientist Believes in Bible

Can a really scientific man believe the Bible? Dr. Howard A. Kelly is entitled to answer. His scientific record and standing today are equalled by few living men. After a brilliant career as professor of gynecology at Johns Hopkins university and surgeon of world-wide reputation, he is now giving himself to special research while continuing as Emeritus Professor at Johns Hopkins and conducting his personal practice. With degrees from several universities, including Aberdeen and Pennsylvania, Dr. Kelly has been honored by scientific societies throughout the civilized world as an authority on radium, and is honorary curator in the division of reptiles and amphibians of the University of Michigan. He is an honored member of scientific or medical societies in Scotland, Ireland, Italy, Germany, France, Roumania, and Russia. He is the author of standard works in surgery and medicine, and of hundreds of articles in medical journals.

And Dr. Kelly believes the Bible because he has tested it in rigidly scientific ways and finds that it meets every test. "I have never in my whole life met a man who really knew the Bible and rejected it," he says. He gives from one to four hours a day to his own Bible study. He conducts a large Bible class every Sunday in Baltimore.

Some years ago he was seriously troubled by the Higher Criticism. Then he studied his way out of it by making the Bible his textbook of religion exactly as he would use any text-book in science. Today he knows that the whole Bible is the very word of God, and its every precious doctrine vital to life and happiness.

The full, personal, intimate, autobiographical testimony of such a scientist is needed today as never before. The "Science League of America," recently formed, is denouncing the Bible and saying that science alone is the "savior of mankind." It declares: "We must have a confidence in the natural that will not leave room for one jot or little of faith

in the supernatural." Dr. Kelly knows otherwise. At the invitation of The Sunday School Times (1031 Walnut street, Philadelphia) he is preparing for that journal his own full confession of faith. He will begin by telling how he came out of his uncertainty concerning the critical attacks on the Bible into his present unshakable convictions, and will then give his reasons for believing in the great doctrines of the Christian faith. Thus he will write the following seven articles:

How I Came to My Present Faith.

Why I Believe the Whole Bible is True.

Why I Believe that Jesus Christ is God.

Why I Believe in the Virgin Birth of Jesus.

Why I Believe in the Blood Atonement.

Why I Believe in the Bodily Resurrection.

Why I Believe Christ is Coming Again.

There has been no contribution like this from any other outstanding scientific leader in our generation. It is an event of stupendous importance in these days of confusion, uncertainty, and outspoken denial by men who command respect in everything but their faith.

Dr. Kelly's testimony cannot be ignored. It cannot be discounted. It cannot be ridiculed. Those who reject God's Word will disagree with him. Those who believe God's Word will rejoice that he was raised up "for such a time as this."

With Sorcery Banished, Indians Turn to Iodine

CASS LAKE, Minn., Feb. 14.—The passing of the "medicine man" with all of his supposedly supernatural powers over evil spirits, is enabling Minnesota Indians in increasingly large numbers to take advantage of the facilities for medical treatment at reservation hospitals, according to P. D. Wadsworth, superintendent of the Consolidated Chippewa agency.

While most of the approximately 14,000 Chippewas in this state have become fairly civilized, hundreds of the more timid Indians are finding the gap between the old-fashioned tribal manners and the modern healing means difficult to bridge, said Mr. Wadsworth. Once the Indian overcomes his characteristic superstition, however, he makes an apt convert and readily subscribes to this phase of civilization's contribution to his welfare.

When the Indians become accustomed to patronizing "the white man's medicine man," as they term him, they make good customers. Old men of the tribe who have learned the advantages of such common treatments as the atomizer, or spray, for nose and throat infections, and iodine for external ailments, hasten to the infirmary at the least provocation.

GERMANY RECOGNIZES AS LEGAL WILLS MADE ABOARD AIRSHIP

BERLIN, Feb. 14.—Will may be made legally in airship, according to Dr. Goldman, who contributes an article to the Deutsche Juristen Zeitung in which he discusses the making of last wills and testaments in midair.

Under the German law a German citizen may make a legal will in either a German or a foreign airship. He must write and sign it himself. It must be indicated what ship the document is written on, but the actual position of the ship need not be indicated. For example, it would be sufficient to write "On Board ZR3 on the way from Friedrichshafen to New York."

STANFIELD URGES HOME LOAN BANKS

Oregon Senator Backing Measure Introduced in Congress This Week

Senator Stanfield of Oregon has introduced in the United States senate a bill to establish a system of national home loan banks to be organized and operated under federal supervision for the purpose of making loans at low interest rates and upon favorable terms of payment to the people in securing and paying for homes of their own.

The Senator says: "The biggest thing our government can do in building American citizenship and combating the destructive forces of bolshevism, socialism, extravagance, unemployment and unrest is to aid men and women to secure homes of their own."

"Everybody wants a home of his own."

"Everybody wants everybody to have a home of his own."

"Everybody knows that everybody having a home of his own is a better American citizen."

"The men and women that perform the world's work are entitled to the best chance to secure a home this government can give them."

"This is not paternalism, it is just the spirit of practical brotherhood woven into the fabric of better citizenship and better government. The milk of human kindness to sweeten the cup of hard labor."

"The bill is fully as constructive as the federal reserve system and the farm loan system have proven to be."

"If this bill will do for the city

Mr. Shrewd Business-Man:

Did you ever pay a bill twice? Not if you knew it! Let us show you how to stop paying for your home twice.

We are not lawyers, or "gold brick" artists, but just honest makers of concrete products and dealers in better building materials.

Say when.

OREGON GRAVEL CO.
Hood at Front St.

dweller, the working man and woman, what the federal reserve system has done for the nation's banks and industry, or the farm loan system has done for the nation's farmers, it will be one of the most constructive pieces of legislation this congress has considered."

The bill follows closely the farm loan system. It provides for a national home-loan board consisting of the secretary of the treasury and four commissioners. This board is empowered to charter, regulate and supervise national home-loan banks to be organized anywhere in the United States with a paid in capital not less than required of national banks under the national banking act.

These home loan banks are empowered to make loans on improved residential real estate up to 60 percent of its value; not to exceed \$10,000 in any one loan; payable in monthly installments over a period of 5 to 15 years; at a rate of interest not more than 2

per cent above the rate paid by the bank on its bonds.

It provides for the deposit of securities with a registrar and the issue of tax exempt bonds similar to the farm loan system through joint stock land banks, and proceeds to be loaned to home owners.

NEW ZEALANDERS LOVE RAISINS

FRESNO, Cal., Feb. 14.—New Zealand eats more raisins per capita than any other country, according to a statement issued by a raisin growers' organization here.

Residents of New Zealand average 4.40 pounds of raisins and 1.20 pounds of currants every year. England eats 1.85 pounds of raisins and 2.77 pounds of currants to each person annually. England's large consumption of currants is attributed to their wide use in sweet breads, cakes and puddings.

In the United States the per capita consumption of raisins is 2.96 pounds and that of currants only .34 of a pound.
