Super Zenith IX—the ideal radio set for the fine home—built-in loud speaker, batteries concealed and out of the way.

They Cost More But They Do More

Only the Best is Good Enough

The difference between a radio set that "works"—even one that "works well"—and Zenith is the difference between always longing for "something better" and the supreme pleasure of owning the best that money can buy.

True, Zenith costs a bit more, but evening after evening, month after month, year in and year out, you will thank your lucky stars that you paid that trifling difference and made sure of the best in radio results. Tuning, for instance, so simple that with two dials only you can bring in every important station on the air clearly and in ample volume. Powerful locals may be on full blast, yet you tune straight through at will, get distant stations.

—More stations in a given length of time than with any other make. Direct comparisons invited.

The proof that Zenith is the set you want is yours for the asking. Call this evening for a demonstration.
