STUDENTS ANSWER BIBLE QUESTIONS

Only Three of 358 in State Receive Grade of 100 Per Cent

The results of the examination on Bible study for credit for graduation in various high schools of the state, have just been reported to Superintendent of Public Instruction J. A. Churchill, under whose direction the examinations are given. There were 358 high school students entered in the examination. Of the 243 answering the questions on the Old Testament, 104 succeeded in obtaining a passing mark, while 139 failed. Of the 115 attempting the examination on the New Testament, 37 passed the examination and 78 failed.

Vera Klore of Looking Glass, and Wendell Smith of Klamath Falls, each received a grade of 100 percent in the examination on the Old Testament, while Minton Erickson of Oregon City, made a grade of 100 percent in the New Testament.

The questions on both the Old and New Testaments are as follows:

Old Testament— (1) Locate Palestine, and give its approximate size. (2) What is the importance of the position of Palestine with reference to neighboring lands? (3) What do "The Books of Law" contain? (4) Tell the story of Cain and Abel. (5) Write the Ten Commandments. (6) Tell the story of the Feast of Belshazzar. (7) Tell the story of Naboth's vineyard. (8) Write the memory passage beginning, "Blessed is the man that walketh not in the council of the ungodly." (9) Tell, briefly, of the Plagues of Egypt. (10) Tell of the Passover and Deliverance. (11) Give the memory passage beginning, "Ho, everyone that thirsteth." (12) What is the Book of Job about?

New Testament— (1) Tell of the Ministry of John, the Baptist. (2) Tell of the temptations of Jesus. (3) Give the memory passage beginning, "And there were in the same country shepherds abiding in the field." (4) Tell of Christ's first miracle. (5) Tell the parable of the mustard seed. (6) Tell of the healing of the man possessed of the legion of devils (in the country of the Gadarenes.) (7) Give the memory passage known as the "Beatitude." (8) Tell of Christ's Transfiguration. (9) Tell of Peter's denial of Christ. (10) Tell the parable of the Prodigal Son. (11) Give the memory passage beginning, "What doth it profit, my brethren, though a man may say he have faith, and have not works?" (12) What is the Book of Acts about?

"Cascarets" 10c if Dizzy, Bilious, Constipated

To clean your bowels without cramping or overacting, take "Cascarets."

Sick headache, dizziness, biliousness, gases, indigestion, sour upset stomach and all such distress gone by morning. Nicest laxative and cathartic on earth for grown-ups and children. 10c, 25c and 50c boxes—any drugstore.—Adv.

Six Counties Organized To Receive State Loans

Forty-three checks amounting to $35,683.89 were mailed to eastern Oregon wheat farmers Tuesday by the board of control, according to Col. Carle Abrams, secretary. Forty more checks mailed out Monday, aggregating $35,803. To date there have been 204 applications made and $166,872 approved by the board.

All checks are made out to the individual requestin gthe loan. These are forwarded to the local attorneys who make the loan with the approval of the local committees. The money is to be used for re-seeding purposes only and if any money remains unspent, this must be returned to the state. All crops are fully protected by insurance.

Six counties are now taking advantage of the $1,500,000 loan authorized by the legislature, Jefferson county having organized and reported this week. Other counties are Gilliam, Morrow, Sherman, Wasco and Umatillia.

Albany College Debate Meeting Now Arranged

A single debate has been scheduled by the Willamette university men's debate squad with Albany College to be held there March 20. The question will be, "Resolved, that congress should have the power to over ride the decisions of the supreme court by a two thirds vote."

James McClintock and Rawson Chapin will uphold the affirmative for Willamette.

The decision will be made by the vote of the audience on the merits of the question.

ELECTRIFY FARM MOVEMENT IS ON

Lights for Rural Districts and Power for Machinery Being Advanced

The national committee on the relation of electricity to agriculture was organized during the early spring of 1925 for the purpose of ascertaining facts relative to the maximum economic uses of juice in agriculture. Representatives from the principal organizations interested secured thorough cooperation in the committee work.

The American Farm Bureau Federation and the National Electric association were represented on the committee, which was directed by Dr. E. A. White. Immediate work was begun after his appointment, and as a result 14 states were lined up, with several others ready to accept the work of the committee.

However, as the work progresses in the various states others will fall in line and soon the entire union will be served by the committee.

Oregon fell into line with the new development with the personnel represented by Dr. J. T. Jardine, director of OAC experiment station, heading the committee. Among the representative membership is G. A. Palmiter, master of the state grange; R. H. Dearborn, professor of electrical engineering at OAC; L. A. McArthur, vice president and general manager of the Pacific Power & Light company; A. C. McMicken, sales manager of the Portland Electric Power company, and P. O. Crawford, vice president and chief engineer of the California-Oregon Power company.

Investigations were started last summer with J. Gilmore, professor of farm mechanics at the Aggie school, and McMillan of the electrical engineering department of OAC. A survey was made of farming communities all over the state, and when completed the survey will disclose some vital facts concerning the farming power problem of Oregon.

This movement is one towards the complete electrification of all farms near power centers and near low voltage lines. In this manner the survey will be of value to the farmers.

Two City Schools Want Fine Pictures

The Highland and Englewood schools are arranging for an exhibit of pictures for the purpose of raising a fund to buy pictures for the two schools. The dates of the exhibits are: Highland, March 11, 12 and 13; Englewood, March 18, 19 and 20. There will be two exhibitions a day at each place, from 2:30 to 4:30 in the afternoon and from 7:30 to 9:30 in the evening.

This collection, consisting in large part of carbon photographs, photogravures and prints in full color, made directly from the original masterpieces, is selected by art experts and should attract large crowds. A small admission will be charged, the entire proceeds of which, after deducting the expense of the exhibit will be used in the purchase of pictures for wall decoration. The purpose of the exhibition is thus clearly twofold:

First—To give people an opportunity to see a collection of the world's famous masterpieces of painting, sculpture, and architecture.

Second—To make it possible for the public schools to own a few of these pictures.

Why should this exhibit interest you?

Because, throughout the country, people are awakening to the importance and value of good art as creative of a refining influence and inspiring atmosphere—and just so surely as people become familiar with the best in art, just so quickly will the crude in art be displaced through appreciation of something better. It is, of course, idle to suppose that one shall become a competent judge of art simply through studying for a time photographs of prints.

But what can and should be obtained is a large measure of appreciation. A work of art which is really great will bear reproduction, and even though this may not possess the pleasure-giving power of the original in a gallery three thousand miles away, that measure of power which it does possess is well worth taking.

One of the leading art critics of our own, John C. Van Dyke, says: "You must look at pictures studiously, earnestly, honestly. It will take years before you can come to a full appreciation of it, but when at last you have you will be possessed of one of the purest, loftiest and most ennobling pleasures that the world can offer you."

One great object of picture study is that of opening the eyes to the beauty all around which an artist's trained eye perceives, while it is missed by others. This is the essential service of all great men—to draw us up in some measure to their own level of insight, enjoyment, and inspiration.

These pictures are of interest to both young and old, and they are expected to attract and instruct large numbers of people. Every one should come.

Judge Marsters Returns To Practise in Roseburg

Judge W. R. Marsters, who has been practicing law in offices jointly occupied by Carl Pope in the Masonic temple building, has left for Roseburg, his former home, where he will take over the practice of George Leuner, who was recently appointed United States district attorney for Oregon.

Cupper and Simpson, engineering and law firm with offices in the Oregon building, are moving to the Masonic temple building April 1. Mr. Cupper will engage in legal practice and will occupy the office room vacated by Judge Marsters.

Gland Secretion

Brings help in a day

Medical science has found a new way to treat torpid liver. Drugs cannot do it. They simply act as catarthics.

The new way is ox gall, a liver secretion. It stimulates the liver as nothing else has done. The results are prompt and often amazing. Countless people are finding in ox gall a way to new health and vitality.

To Stop Poisons

Torpid liver means more than indigestion, constipation, etc. It may mean all that follows blood impurity.

The liver supplies bile to the intestines—about a quart a day. That bile checks the germs which breed there. When it is scant, germs may multiply and feed the blood a constant stream of poison.

Heart and kidney troubles are often due to germ toxins. So with high blood pressure; so with premature old age.

There is hardly a person who is not in some way affected by germ toxins.

Help for Millions

This new discovery offers help to millions. To some it means priceless help. Few people can take ox gall without gaining good effects.

Try it at our risk. Perhaps it is all you need. But get the genuine ox gall. It comes in tablets called Dioxol. Each tablet contains ten drops of purified ox gall.

Remember that name—Dioxol. Accept no spurious tablets. You want the best results this discovery can bring. Get them now and watch how quickly the benefits begin.

Guarantee: Anyone not satisfied with results from the first box of Dioxol may return the empty box to the makers and receive his money back.—Adv.

Tomorrow

another cave-man tradition will pass,

Salem will see old scenes in a new Light

Are YOU using Cave Man methods of lighting your kitchen—one spot of bright glare—with black, black shadows and dark corners? After Monday all that can be changed!

We're glad to say we'll have ready for installation MONDAY the new

Daylight Kitchen Unit

—the improved lighting unit that is bringing daylight into thousands of the most modern kitchens in America. You'll want one for the workshop of your home.

Free—

For a limited time—we will install these units for 7 days' trial without cost to you.

REMEMBER—first come, first served. Don't use cave-man methods after Monday! Ask about yours!

PORTLAND ELECTRIC POWER COMPANY

237 N. Liberty Street Salem, Oregon.

"CAT AND CANARY" TO PLAY IN SALEM

Famous Mystery Drama Will Be Shown Here on Wednesday, March 11

"The Cat and the Canary," which stands out as one of the really great mystery dramas of recent years, comes back to Salem next week and will be the attraction at the Grand theater for one night only, Wednesday, March 11.

Henry Duffy, the producer, brings to Salem the same cast which carried this splendid vehicle over to eighteen weeks of successful showing in Los Angeles and ten weeks in San Francisco. In every detail the production will be the same here as it was shown in these two cities. By the critics the company has been proclaimed as one of unusual excellence.

Fun predominates in this entertaining play from the pen of John Willard. There are any number of exciting episodes and startling surprises and the mystery remains unsolved until the final curtain. The strange and weird happenings that occur in the famous "house of mystery" presided over by Mammy Pleasant keep the audience on edge with excitement and anticipation and the laughter is continuous throughout.

Chief interest centers in the person of Paul Jones, a youthful veterinarian, who with his boyhod sweetheart, Annabelle West, are heirs of an eccentric old recluse, who, at his death, provides that his will shall not be read for twenty years. Paul's love making and his determination to solve the mystery which has shaken the household to its foundation are accompanied by unusual developments of a sort that keeps the fun at fever heat throughout.

Kitchen Lighting Units Are to Be Shown in City

Manager J. S. Groo and a crew of 10 men are to arrive in the city Thursday morning to start the kitchen lighting campaign for the Portland Electric Power office here.

During the past two weeks the crew has been working in Oregon City and Vancouver, Wash., installing the unit of kitchen lighting system. They plan to start in the northwest section of Salem and to work towards the center of the city.

The unusual manner of installing the units and the long-time payment plan make it a success. The unit is placed in the workship of the home, the kitchen, for a trial period of seven days. After the acceptance of the unit the total of $8.50 can be paid off at 75 cents per month, with the light bill.

The kitchen lighting unit is complete in itself and is adapted for all around work in the kitchens.

Former Marion County Y Secretary Writes Letter

In a letter to a friend in Marion county, Edwin T. Socolofsky, former YMCA secretary, recounts some of the work that he is doing in his new location in the state of New Hampshire. Excerpts from the letters disclose that he is making progress in his boys' work in the state and has established a record in the field.

"The Winter carnival came off here Saturday and no snow. Ice events were held, but no snowshoeing, skiing etc. Those events later as we still hope for snow," was part of the letter, which described the local weather conditions.

"In one of the parades of the carnival I had a group of 20 boys calling themselves the "Friendly Indians" and 35 pioneers. We took second prize. We also had the largest number of any organization competing.

"Almost March 1st and all is well. I have 15 clubs with 200 members. The subscriptions are coming in wonderfully well, I have 13, $100 subscriptions in at the present time.

"Had a letter from Dr. Carl Gregg Doney at Cambridge, and we expect to have them up in the near future, also had a fine letter from Sim Phillips at Salem," is the information contained in the letter.

Paper Hanger Pays Visit To Silverton Businessmen

SILVERTON, March 3.—(Special to The Statesman.)—Silverton business men suffered Monday from the passing of five forged checks. The checks were made out to E. D. Mallen and were all for the sum of $37.50. The Silverton Lumber company's name was forged.

It is said that the man who passed the checks was about 45 years of age . He was of medium height, dark, and dressed rather poorly, giving the appearance of being decidedly unkept.

Balloon trousers and balloon tires are all right. It's balloon heads that are all wrong.

ACID STOMACH!! GAS, INDIGESTION

Chew a few Pleasant Tablets —Stomach Feels Fine!

Instant stomach relief! Harmless! The moment "Pape's Diapepsin" reaches the stomach all distress from acid stomach or indigestion ends. Immediate relief from flatulence, gases, heartburn, palpitation, fullness or stomach pressure.

Correct your digestion for a few cents. Millions keep it handy. Druggists recommend it.—Adv.
