

Conlonial Cottage Proves Popular

Comfort and Economy in Six Rooms

THE colonial type cottage makes a strong appeal with the home-builders of average means, when economy of funds must combine with comfort and good taste. The accompanying design unites these elements in a pleasing design that has proved popular with many builders during the 1924 sea-

Treatment of the entryway is excellent and the two coat closets are a convenience which will be appreciated by the house keeper. The railing along ornamental touch to the front facade and the two dormer windows fit pleasingly into the design. Wall painting will add materially to the exterior appearance.

The ground floor is nicely portioned and the position of the fireplace will compensate in extra heat for the space occupied. The living room is of ample size and well lighted. Arrangement of the dining room and kitchen is ideal.

The downstairs chamber is large enough for ordinary use and its windows afford cross ventilation. The central hall ties in all the rooms on the ground floor and a stairway leads to the upper story. The upstairs bedrooms are of excellent dimensions and well supplied with light, ventilation and closet space.

The sleeping porch shown in the plan is located directly above the bath room and if the owner desires this space may be easily altered for use as an upstairs bathroom.

Cost of this house should be well within the means of the average family.

Two sets of blue prints and specifications for this or other houses will be supplied at nominal test upon application to

SALEM TENT AND **AWNING COMPANY**

New Factory for the Capital City, to Be Ready for Business April 15

The Salem Tent and Awning company, with a new line of manufacturing for Salem, will be ready for business on the 15th of April, at 729 North Liberty street. There will be made here tents and awnings and canvas goods of all descriptions. Everything will be made to order.

Frank Monner will be the man behind the new factory, and he will be assisted by Mrs. Monner and a son and daughter, all of whom are experienced in this line of work.

The Monners will bring six children with them. There would be eight, but for the fact that two have married and made homes of their own. So they will add at least eight to the population of Salem, to say nothing of employed help, which will increase as the business grows.

Business Will Spread

Mr. Monner has been in this line for 27 years. He has worked with the biggest firms of Portland, and for himself in that city, and lately he has been in Vancouver, Wash.

He would have come to Salem sooner, excepting that he must finish up a lot of work that is under way in Vancouver, and cannot be brought along.

He will take in all the surround- out, and that is the onion. ing towns and cities, and, while

Prizes Awarded in Contests in Brick and Hollow Tile Design

Students of the University of Washington architectural department carried off the honors in the prize contest for best designs of brick facade for two-story and attic brick residences, inaugurated by the Pacific Northwest Brick Manufacturers association, which came to a close last week, with the awarding of prizes and honorable mention to contestants.

Ivan W. Meyer was awarded the first prize of \$50; Frank Nagamini the second prize of \$25; and Walter Wurdeman the third prize of \$15. Three other students. Sam S. Washisuka, C. M. Shigaki and Arthur H. Waldo, were given honorable mention for their de-
