Footlight Fantasies is Headliner at the Bligh

Topping the new bill at the Bligh theater today is the production called "Footlight Fantasies."

Can you imagine George White, Sophie Tucker, the Dooleys, Ruth St. Denis on one vaudeville bill, or, better still, in one act on a bill? The five talented members in this offering have made a careful study of these stars and will bring them to vaudeville at one time, all appearing in this one act.

According to reports along the circuit, it is the only act of its kind touring the vaudeville circuits, and it promises the theatergoers some real entertainment.

Nora Jane and Karl with the billing of "Dancing De Luxe," will come in for their share of the honors on the ew bill. They have put together an act that is different, and they will entertain in their own way, making them a hit at every show.

Harry Long and William Jaxon, the sunburnt babies are comedians, singers and dancers. They are a riot from start to finish.

With surprises, laughs and much genuine entertainment, Roth and Slater will offer "The Wop and the Flapper." The vehicle affords Roth an opportunity to display his inimitable Italian characterizations.

Jack Duncan is one of the original as well as the star roper of the famous Miller Brothers 101 Ranch Wild West show. This is his initial appearance in vaudeville, having been recruited from the range on account of his record as a cow-puncher and roper of all round-ups and rodeos.

VALLEY MOTOR CO. TO OPEN DISPLAY

This Will Be "Ford Display Week" for the Entire Territory

The past week has seen great activity in the establishment of the Valley Motor company, local Ford dealers, for Monday, March 30, opens "Ford Display Week."

Spring housecleaning is as much of an annual event with Ford dealers as it is with the average housewife but this year, in addition to having their sales rooms renovated and decorated, their shops and equipment made spotlessly clean, it was decided to have "Ford Display Week" for the entire territory. As a result a number of dealers in this territory have put on unusual displays of new and guaranteed used Ford cars.

Ford accessories, dash lights, rear view mirrors, spark plugs, batteries, etc., have also been given prominent places in dealers' exhibits.

Sales reports indicate that the spring demand for Ford cars is already approaching that of previous years, with every promise that past sales records will be broken. A recent report from the factory at Detroit, states that production has been increased to 7,000 cars and trucks a day. The company has been operating on a full week schedule for some time in all its manufacturing plants and the present production schedule represents an increase of 600 units a day over that of a few weeks ago.

Fordson tractor production has been moved up to 450 a day to care for growing demands. It was also announced.

BUREACRACY IS RAPPED BY REED

Ever Increasing Number of Boards and Bureaus Usurps State Powers

JEFFERSON CITY, Mo., March 28.—Warning against what he termed a drift toward centralization of power in the federal government James A. Reed of Missouri in addressing the state legislature late today declared that he has too many laws.

"The establishing of an ever-increasing number of boards and bureaus of inspection," the senator said was usurping state's rights and powers, "to an alarming extent." Senator Reed praised the Missouri legislature for rejecting the proposed child labor amendment to the United States constitution.

"I have been accused of never originating any laws," said Senator Reed. "The charge is substantially correct. We have fifteen thousand laws more than we ought to have. There are more than 18,000 laws on the statutes of the various states. It would take a lifetime to read them.

"Imagine talking about a free people that have 18,000 laws governing their conduct."

When the Sun Hurts Your Eyes

At this time of year special attention should be given to your eyes. Especially in cases where your lenses have not been changed recently, the effect of brighter days not only causes discomfort; but may be actually harmful. The reason is that the brighter light adds a new source of irritation to an already strained eye.

Have Your Eyes Examined

at the first sign of discomfort, it is always so much more satisfactory to prevent trouble than to correct it after an injury has been done. A scientific examination will reveal what changes should be made and determine what type of protection should be given. We will be pleased to have you consult us about your eyes.
