

SEVENTY-FOURTH YEAR

SALEM, OREGON, SUNDAY MORNING, MARCH 29, 1925

PASTOR WILL BE HERE SOON

Rev. Taylor to Occupy Pulpit of First Methodist Church on April 19th

Mrs. F. G. Franklin of this city has two sisters in Sioux City, Iowa, and she has received from them considerable literature about Dr. Fred C. Taylor, the new pastor of the First Methodist church here.

Miss Maude A. Price says, "Dr. Taylor is a good and earnest gospel preacher, a very hard worker. For two years there has been a Sunday evening students service of special interest each month."

Her father was a gospel singer named Catlin. Her mother was a missionary in Honolulu for ten years. Rev. Taylor has always preached what I call fine gospel sermons. He is a spiritual preacher and his sermons are always of the interesting spiritual type. We shall miss his good sermons here."

From the clippings the following is learned: Rev. Mr. Taylor is a Canadian by birth. He came to the United States in 1897 and received his citizenship papers in the Woodbury county district court in 1904.

He received his education in the public schools of Canada and Albert college and graduated from the Garrett Biblical Institute, Evanston, Ill., in 1900.

his pastorate at Grace church, he has received \$26 into membership in the church. The church was fully organized; all indebtedness was paid off and it was made one of the leading churches in the conference.

Rev. Mr. Taylor was elected by the Northwest Iowa conference to the general conference at Des Moines in 1920 and again to the general conference at Springfield, Mass., in 1924. He has been a trustee of Morningside college for 10 years and a trustee of the St. Louis City hospital since its incorporation.

He is a 32nd degree Mason, being a member of the Oscar Hoberg class of the Sioux City Consistory of Scottish Rite Masons. He is also a member of the Columbian Commandery, Knight Templars, a Shriner and the chaplain of Sunrise Chapter Royal Arch Masons.

The article does not disclose how many children Dr. Taylor has. He simply says he has an interesting family. He will preach his last sermon in Sioux City on Sunday, April 12th, and will leave the next day for Salem, Oregon, arriving here in time to have services the 19th.

England Has no Sympathy For Sprightly Cockroach

LONDON, March 28.—The cockroach has come under official ban in London, and his elimination is to be sought in a drive to be undertaken by the College of Pestology, formerly the Vermin Repression society. A "kill that cockroach" campaign is to be started in London early in March, and will be extended throughout the country.

The cockroach swarms with bacteria and vermin which disseminate disease, aver the College of Pestology authorities, and it has been suggested that even smallpox, scarlet fever and cancer as well can be broadcast in this way.

COAST POWER TUNNEL BORED THRU SOLID STONE IS COMPLETED

LOS ANGELES, March 28.—

The Florence Lake tunnel, 15 feet high and the same width, extending more than 13 miles, mostly through solid granite is a snaky line under the high Sierras. It is a construction feat that has drawn the attention of the engineering world. It has just been completed.

The tunnel is one of the most important works in the Big Creek San Joaquin River project of the Southern California Edison company. The entire project will bring in 1,407,000 horsepower, and, with its transmission lines, sub-stations and accessories, will cost \$375,000,000.

The tunnel itself cost \$17,000,000. It was started in the fall of 1920, and since then without a stop the work has been maintained in relief shifts. The scene of operations is 250 miles north of Los Angeles and 35 miles south of the Yosemite Valley. The purpose of the tunnel is to convey water from the Florence Lake watershed, source of the south fork of the San Joaquin river, through the barrier of a 10,000-foot mountain ridge into the watershed of Huntington Lake.

World records for tunnel construction have fallen during the four years progress in the Sierras. The 13-mile bore was divided into three sections, with two lateral adits cut into granite slopes and a crew working each way from each adit. The bore was completed a year and a half sooner than the most optimistic estimates contemplated when the tunnel was started.

The completion of the tunnel will be followed by the creation of Florence Lake, to store 31,000 acre feet of water at an elevation of 7300 feet. The total drop from Huntington Lake through a chain of tunnels and power houses to the lowest power house is about 6000 feet.

The whole project when complete will have 86 miles of tunnel, with about 18 power houses. The original development in the Big Creek project, started in 1912, consisted of two power houses developing 88,000 horsepower. 220,000-volt transmission line conveys the power generated by these plants 270 miles to Los Angeles.

BLACK BEARS BROKEN TO HARNESS

LAWING, Alaska, March 28.—

Mrs. Nellie Neal Laeting of this place does the sledding on her ranch with a team of young black bears. The span are well broken to harness.

Contrary to the notions of some persons in the states, bears do not hibernate at the first sign of winter, but are as active as domestic animals such as dogs.

SAP & SALT

By Bert Mosse

What the average wife needs is less advice and more allowance.

The bigger the blunder, the more the education you get out of it.

Compensation is always at work: Empty church, full jails.

Charity has its good points, but one of them is not encouraging industry.

A houseful of good-looking daughters reduces the electric light bill.

Everybody licks postage stamps, which shows that the man who makes the maulage for them is deeply trusted.

Her Heck says: "Outside o' gittin' old, Methusalem don't seem to have done nothin' at all."

Airplanes Aid Ranchers To Inspect Grazing Herds

BUENOS AIRES, March 28.—

Some of the ranches of the Argentine pampas are so large that it takes an all-day trip on horseback for the owner to ride from one boundary to another or to visit a neighbor. But several of these ranch owners no longer need to take these long, tiresome trips, for they are riding now on the wings of the wind, having purchased airplanes to take them where they want to go.

One ranch is equipped with a hangar containing three airplanes, one for the owner, and one each for his two sons. They use them not only to fly around the ranch to inspect their herds of cattle, but into Buenos Aires where they have a town house. They do not have to worry about landing places for the pampas is as level as a billiard table. A dozen private airplanes are thus in use on the pampas, according to Ricardo Aldao, president of the Argentine Aero club, and other ranches soon will be similarly equipped.

THOUGHTS FOR EVERY DAY

By Editor J. B. Parker of The Conway (Arkansas) News.

Horace wrote— He who maligns an absent friend's fair name,

Who says no word for him when others blame,

Who courts a reckless laugh by random hits,

Who teigns, what he ne'er saw, a secret blame,

Beware him, Romans! that man steals or stabs.

Now just read again the above words of wisdom from Horace. Food is beneficial only when properly masticated—chewed.

So it is in hearing what is said about someone or something. If you gulp down what you hear or see, you will as a rule stuff your-

self for a correct judicial analysis of what you heard or saw.

You cannot be a real friend to another and not jump to his defense when you hear a blame that you know is not fair to him.

And your friendship will not permit you to indulge a reckless laugh at the expense of another because you 'inlet a wound that never heals although you doubtless did not intend to be so cruel!

By being true to thyself, you will always be true to others.

Vienna Understudies Play in "Barber of Seville"

VIENNA, March 28.—Under-

studies and supers are to have a great chance at the Vienna Burg theatre. A performance of "Barber of Seville" will be given for charity in which all the leading parts will be taken by persons who ordinarily play very secondary roles in which they seldom have more than a single line to speak.

Figaro, one of the chief parts in the performance, will be taken by an actor who never before has been entrusted with more than one short sentence. Dramatic critics are discussing the performance

Playful Elephants Delay Travellers in Sumatra

THE HAGUE, Holland, March 18.—Further reports received

here concerning the mysterious deserted city in the Upper Langkat region of Sumatra state huge quantities of elephants' bones have been found there. This gives rise to the belief that here may be one of the hidden places to which elephants retire when they feel death approaching. African and Indian elephant hunters agree that sick elephants withdraw from their herds to some remote spot only known to themselves to die alone.

Elephants seem to be on the increase in Achun, the Sumatra Post observes in this connection. A light railway train which runs along the edge of the jungle was held up the other day by a herd of 40 big tankers which leisurely amused themselves by pulling up all the fencing and boundary posts in sight before they deigned to move on.

with great eagerness and predicting that it may result in giving the Vienna stage a new star.

Parrish Paragraphs

By DORIS GODSEY

The boys have started baseball practice. There are about forty boys trying for a place on the team. Coach Brown thinks that he has prospects for a good team.

Our new manual training shop is to get a second coat of paint next week. Students from Mr. McKinney's classes are to do the work.

Principal J. C. Nelson of the senior high school spoke to the occupations students Friday afternoon. His subject was "Why Everybody Needs an Education." His message was very well received by the students.

F. C. Wootin, former teacher at Washington junior high school visited us on Friday. Mr. Wootin is now a student of the University of Oregon an assistant in the department of education.

On Thursday school was dismissed at 3:45 so the teachers might hear a lecture by Dr. Ralney from the University of Oregon. He talked on "Professional Advancement of the Teachers." Our teachers enjoyed this talk.

The music program which is being prepared by Mrs. Thompson and is to be given sometime in the near future is progressing nicely.

Twenty-Eight Salem Beauty Specialists are Contributing to the Realization of a "City Beautiful"

"The art of doing the thing" is more of a difficulty to the beauty-seeker than the minor problem of equipment. Beauty Specialist comes to rescue. And is bobbed hair in to stay, or isn't it? Smartest clientele in Paris titter at any hints of the fashion disappearing, as long as one secures the services of an expert in its upkeep.
