RULES FOR RIGHT LIVING: Let all bitterness and wrath and anger and clamor and evil speaking be put away from you, with all malice, and be ye kind one to another, tender-hearted, forgiving one another, even as God for Christ's sake hath forgiven you.

IRELAND FOR PROTECTION: The American Vice Consul at Dublin, reporting on economic conditions in the Irish Free State, says: "The expansion of domestic industries as the result of the protective duties on boots and shoes, confectionery, and soaps and candles continued throughout the quarter to attract attention."

Small matters often develop into wonderful results. As a matter of fact, it is the little things in life, so often overlooked or passed by with scant notice that frequently produce tremendous effects on individuals, business and even nations.

"Behold the hour cometh, yea, and is now come, that ye shall be scattered, every man to his own, and shall leave me alone, and yet I am not alone, because the Father is with me."

WALTHY INVENTOR WARNS ALL WOMEN THAT HE WONT WED: SAN FRANCISCO, March 28.—No flapper is going to share George Campbell Carson, elderly self-

Officials of the American Smelting & Refining companies, however, say that they are not involved to the extent of more than \$250,000.

Usually Carson prefers to talk to do with his millions, when he gets them, he said he expected to do a lot of things involving chemistry which laymen wouldn't understand, but one thing sure, he wasn't going to get married.

Later Carson wandered over Colorado, Idaho and Oregon, following the gold camps. For a while he ran an assay office. He got back east as far as Birmingham, Ala., and then, in Pittsburgh, began an intensive study of metallurgy, but lacked the funds to pursue it.

deal of metallurgy and geology. For a time he digressed from mining to join an expedition sent into Mexico by the American Geographical society. He left the expedition in the wilds of the Sierra Madre mountains a year later and drifted to Chihuahua, where he worked at the smelting end of mining.

Later Carson wandered over Colorado, Idaho and Oregon, following the gold camps. For a while he ran an assay office. He got back east as far as Birmingham, Ala., and then, in Pittsburgh, began an intensive study of metallurgy, but lacked the funds to pursue it.

He offered testimony intended to show that his contrivance found instant acceptance in smelters and were widely used, while he received no compensation. He said that it was possible under his process to treat 700 tons of ore in a furnace in 24 hours, whereas under the old system but 240 tons could be treated.

Two years ago Carson lost his case in the federal courts at Seattle. The reversal of this finding was his first victory in 19 years of struggling to patent and market his invention.

Uniform Rate Hearing Is Scheduled for Portland: For the purpose of prescribing a uniform freight classification for use by auto truck operators performing the service of common carriers over state highways, T. K. Campbell, public service commissioner, has called a hearing in Portland Monday morning at 10 o'clock.

F. J. Burns, rate expert for the commission, will give the carriers the benefit of his studies relative to classification, the method of an uniform relationship between the class rates, formulae for making scales of rates and to discuss with all carriers and obtain their views on other traffic matters that may be brought to hearing at a later date.

INSANITY HELD NOT ON INCREASE

More People Being Placed Under Care of Specialists Says Griffith

"It is questionable that there has been an increase in the amount of insanity in this country," declared Dr. L. F. Griffith of the Oregon state hospital, in speaking before the Rotary club at their regular meeting Wednesday noon.

"The improved conditions of the hospitals, the releasing of the stigma upon the affliction has resulted in a greater number of persons being brought to the care of the specialists. People have decided to place themselves under the care of the hospitals, where formerly they were cared in private institutions.

"The public has become less tolerant of cracks and as a result a greater number of insane patients have been reported and confined, where formerly they were tolerated."

Hereditary and stress are the greatest causes of insanity," continued the speaker. "An individual inherits a tendency towards insanity and the force of circumstances tends to break down the weakened fiber. As a result 60 per cent of the insanity cases are found to have some hereditary tendency as a basic reason for the confinement in the hospital."

"Syphilis is another basic cause for insanity. Of the patients brought to the Oregon state hospital, from 12 to 15 per cent of the men and 3 or 4 per cent of the women are afflicted with the preventable disease. Alcohol is not as great a factor in insanity as formerly."

Worry, stress, disappointment, dissipation and the drawing upon the reserve strength are not causes of insanity unless the individual has a weakened condition brought about by inheritance, Dr. Smith said.

Sterilization of all defectives was pointed out as the way to relieve the serious situation of today.

The District of Columbia supreme court quashed the Fall-Doherty-Sinclair criminal indictments and government counsel announced an appeal would be taken.
