DIFFERENT EYEGLASSES FOR DIFFERENT FACES

Whether you "look well in eyeglasses" or not depends greatly upon the shape of the lens. Your face isn't the shape or size of Cousin John's or Aunt Sue's. Then, why should all of you expect to wear the same shape and size lens and still have your glasses look well?

Our first consideration is of course accuracy and comfort. But we do not forget appearance. We have in our prescription shop machines with which we shape from the roughest blank, a lens that is best suited in shape and size to your features. That's just a part of our SERVICE.
