from New York to Harve, France, with equipment enabling the cable to handle 1200 letters per minute. That the Postal Telegraph-Cable company have confidence in the continued prosperity and growth of this city is evidenced through the new line Salem will have in contact with Los Angeles and Seattle. New wires have been installed from Seattle and a new pole line to the east out of Los Angeles, following the southern

route, which will be practically immune from interruption by storms. Salem will be benefited by this move in that it will give Portland direct contact with Eastern wires, which have heretofore been held by Los Angeles circuits. With these new lines and improved equipment which is being installed throughout the system, Mr. Waters states that Salem will soon enjoy a much better telegraph service than has heretofore been possible.
