A Test Every Man Past 40 Should Make

Medical authorities agree that 65% of all men past middle age (many much younger) are afflicted with a disorder of the prostate gland. Aches in feet, legs and back; frequent nightly risings; sciatic pains are some of the signs—and now a Member of the American Association for the Advancement of Science has written a remarkably interesting Free Book that tells of other symptoms and just what they mean. No longer should a man approaching or past the prime of life be content to regard these pains and conditions as inevitable signs of approaching age. Already more than 20,000 men have used the amazing method described in this book to restore their health and vigor—and to restore the prostate gland to its proper functioning. Send immediately for this book. If you will mail your request to The Electro Thermal Company, 617-A, 711 Van Nuys Bldg., Los Angeles, Calif.—the concern that is distributing this book for the author—it will be sent to you absolutely free, without obligation. Simply send name and address. But don't delay for the edition of this book is limited.—Adv.
