

SENATORS TO PLAY OREGON CITY SUNDAY

Both Teams Have Won Two Straight Games and Are Leading League

The next baseball contest for the Salem Senators will be with the Oregon City sluggers. The game at Oregon City Sunday will be one of the outstanding games of the season as it will determine the leader in the inter-city series at present.

Oregon City is credited with two straight victories and the Senators have won both their games played here. When the two teams meet a good game is to be the result as both teams are up and going and have fine stuff to show.

The Papermakers have just finished a new park, and it is thought the Salem players will play the opener there next Sunday, although some effort is being made to secure the game for this city.

It is doubtful, however, if the papermakers will come here in view that the new park is to be finished. They will play here if the park is not ready.

Prisco Edwards, field manager of the Senators desires to get the game played in Salem. The Senators are going fine and showed much class in their slug fest with the Vancouver players last Sunday.

Swimming Tank Is Cool But Ladies Enjoy Plunge

Swimming classes for women and girls at the YMCA are popular, judging from the number present at the classes, yesterday. A total of 24 girls were present in the afternoon and 18 women during the earlier part of the day. The water was cool, due to the severing of the electric cable to the YMCA building. Remodeling of the building by contractors was the cause, but the col waters did not deter the bathers from using the pool.

Miss Mary Erickson, swimming instructor, gave tests in junior Red Cross life saving methods.

Bits For Breakfast

Talking of crude drugs—
How would you like to have a few hundred acres of mint?
Yielding 60 to 70 pounds per acre of peppermint oil, selling around \$12 a pound, or higher?
And costing very little more than a hay crop; and you have the hay left, after getting the oil out—good hay, too. Some growers say the very best kind of hay.

Of course, present abnormal prices will not last. If they should.

all the Willamette valley would go into mint, and become disgustingly rich. Every other farmer would be a millionaire.
But we can compete with the world in mint growing, because we have three advantages: Large yield per acre, low overhead, or account of low priced lands, and both high menthol content and high quality.
And there is money in other crude drugs here, and the industry can be made a gigantic one here. All we need is capital or organization, or both. Nature intended this section for a great crude drug garden, and it will become such, sooner or later.

Car Goes Up In Smoke—
A Rickenbacker, 1923 touring car, registered to H. H. Poore of Portland, went up in flames last night near Brunk's corner. Evidently the fire had started in the rear of the machine, because practically everything was burnt from the machine, although the engine looked as if it could be salvaged. The front tires were unburned.
