Professor Raises Point

"Civilized woman has just half the strength of the civilized man," declared Professor S. B. Laughlin, of Willamette university, when commenting upon the effect of clothing and modern foods upon the human race. Previous to the modern age, man consumed his food without cooking it, he said, and the results of the change in preparing the food are evident. The decay of teeth, the modification of the different organs of the body and other changes in modern man were brought out to show the effects of the soft foods.

GIRL WITNESS WILL NOT TALK

Father Unable to Get Her to Return to Salem; Is Held in Seattle

Another angle has been added to the case of the local men involved in the vice ring disclosures who are facing charges of contributing to the delinquency of a minor. The fourth girl and star witness in the case has been arrested in Seattle, and her father sent after her. However, he reports that he is at his rope's end and can do nothing to persuade the girl to return. In addition she refuses to talk, and it is a standstill, as far as their star witness is concerned.

The girl, who is 17 years of age, is said to know much about the wild parties staged in Bush's pasture and in Painter's woods, to which the arrested men are alleged to have been participants. The young woman is not faced with any charge and therefore cannot be brought here on an extradition warrant to act as a witness.

Efforts are being made to get the girl to return to this city, and even if she did return, it is doubtful if she would talk. Just what the officers are to do remains to be seen. The three girls who are under surveillance here are developing a bad case of saying nothing, it is rumored, and little is said about the wild orgies and parties to which they attended.
