How To Solve Cross Word Puzzle

Each number is the start of a word. Each white space represents a letter. Look at the key printed and see the definition for the word you seek. Select a word that has the right number of letters for the space allowed it horizontal or vertical, as the case may be. Remember the word ends in the square just before the first black square you reach or at the border of the puzzle. After you have found one or two words you will have clues to still others.
