## "When Nature Warns"

If people understood the ABC of eyes and eyeglasses, we would have less eye trouble.

No organ of the human system is so abused and neglected. Nature gives warnings innumerable—such as dimness, headaches, eye pains and reflex symptoms in organs remote—and all are unheeded.

The time comes when necessity knows no law but attention, but if the eyes have been pushed beyond natural limits, normal vision may then be unattainable.

"A stitch in time saves nine."
