### Many Smaller Ones A Salem Project. A Salem Project. DEVELOPMENT THAN EVER BEFORE

There Are Indications of a Number of Big New Projects Getting Under Way, and Thère Are Inquiries Indicating a Large Number of Small Developments Being Con-templated in This Section

Rhea Luper, state engineer for operating in the Deschutes coun-Oregon, says there is more in- try, supposed to be backed by the quiry concerning water ower developments in Oregon, and especially this part of Oregon, than ever before. He looks for the early coming of very great activity in this field; the forerunner of a per- lem, on an air line. iod of industrial progress such as has been only dreamed of hereto-

Some Are Known

While Mr. Luper is necessarily rivers, and there will likely be secretive concerning some of the early developments there. movements in this field, he is There are some transfers and nepleased to be able to give the gen- gotiations being made in the Deeral information contained in the chutes country which indicate that above paragraph.

It is known that the Oregon- Bank of Italy group of California California Hydroelectric company may be looking to developments on has recently acquired the water that river. This is the greatest power appropriation of Joseph R. group of financiers on this coast. Keep and others on the Zigzag . And there are filings on the Mcriver, tributary to the Sandy, and Kenzie river and its tributaries has asked for an order as to time which may be connected with maof completion of the project. The jor developments in water power company has paid the annual fees activities. of \$7800. This is a very fair indication of early activity there. There is a Philadelphia group

DID YOU KNOW That water is running idle down the defiles of the Cascades and the Coast Range within easy distance of Salem (within an average of less than 50 miles) affording cheaply developed hydro-electric projects that would aggregate more than 250,000 horse-power; that within a radius of 100 miles over 500,000 horsepower could be developed, and, with power lines no longer than some lines in use in California, three to four million horsepower; that Salem may absolutely assure her steady growth by the development of the first named 250,000 and over horsepower for use here in industries; that she may become a city of a half million population by developing and using the powers within a radius of 100 miles, and that it would be a splendid and sound move for this city, as a city, or as individuals organized into companies, to undertake water power development here on an ambitious scale, and to do it

# POULTRY INDUSTRY IN WILLAMETTE VALLEY GETTING TO BE A BIG GAME

No Line of Industry Has Gone Forward With Such Strides in Last Five Years, and the Reason Is That There Is No Other Locality Any Where That Is Superior as a **Poultry Country**
