Why Do French Women Always Look Young?

In France mothers and daughters look like sisters. How are the women there able to retain their youthful looks until long past middle age? It is known that they are much given to the use of mercolized wax. This wax possesses a remarkable absorbent property which quickly removes the fine particles of cuticle which are constantly dying and which are the immediate cause of an old-looking complexion. Thus the livelier, healthier, younger skin beneath is given a chance to breathe and show itself. You can try this treatment yourself. Your complexion soon will become as clear, soft and beautiful as a young girl's. One ounce of mercolized wax (all American druggists have it) will suffice. This is put on nights, like cold cream, and washed off mornings.—Adv.
