

# HAVE FAITH IN SALEM!

*The City of To-day*

*The City of the Future!*

**F**EW American cities have such limitless possibilities for growth and development as Salem has today. Its rise in a few short decades has been amazing; and this is merely a forerunner of the great future that looms just ahead---a future full of thriving industries, fine residential areas, unprecedented civic advantages.

Yes, Salem will GROW! Will you grow with it? Have you the vision and ambition to stake out a claim to a share of the greater prosperity? If so, you will NOT wait until realty and other property has doubled and trebled in price; you will invest NOW and profit by the upward rise; you will get in on the ground floor---while the timid man hesitates and waits until values go soaring!

Salem will grow because there are enough men and women with faith in its future. And as these men and women grow with Salem, so will their bank accounts! Every time property values increase, it will mean one more step toward a well provided, comfortable independence.

---

Opportunity is at your door now. Join the up-and-coming group whose faith in Salem is going to pay them handsome dividends

---

Salem will grow because there is being built here the first linen mill in the western half of the United States, and there is to follow a second linen mill --- the twin pioneers of the certain rapid development of Oregon's greatest and solidest industry; to be followed by other manufacturing industries that will make ever widening markets for the diversified raw products of our soil, in forms bringing the highest prices.
