

Now Father has a day just like Mother

"Dad's the best Pal you've got."

WELL, Well! — so we're going to honor the most neglected member of the family—the one who works like a wheel-hoss, foots all the bills and never expects anyone to make a fuss over him!

Father's Day will be remembered in churches, theatres, on the radio, and in thousands upon thousands of homes all over the United States.

Showers!—of neckties, smokes, books, safety razors, flowers, jewelry—and many other things that can contribute to his comfort and enjoyment.

EUROPEAN NATIONS TO ADOPT OUR GOVERNMENT

UNITED STATES HAS BEST FORM YET DISCOVERED

Realtors Hear Splendid Address By Oliver Wayne Stewart Thursday Noon

Oliver Wayne Stewart, of the Flying Squadron Foundation, nationally known speaker and student of constitutional government, addressed the Realtors at their regular meeting yesterday in which he discussed the merits of the modern judiciary system of the United States.

Arthur J. Balfour, noted law authority declared that in latter half of the eighteenth century, no better form of government existed than was found in the colonies along the Atlantic seaboard," declared Stewart.

"No one" paid much attention to this statement, which I think is the most thoughtful one made. Our early ancestors had to understand government, because they were building a nation. They paid the price and as a result the best world's great democratic government was formed."

The speaker declared that within ten years of time, the governments recently organized will remodel their form of government to conform to a basis similar to the one of the United States government.

"Nations have risen and fallen because of the loss of their judiciary power, Rome fell because the power of the senate was taken away from her. The United States is the only established government with a strong executive power that was obtained after bitter experience."

Mr. Stewart called attention to the need of quality and character of the people of today and urged that the paramount idea be the character. He illustrated his point by telling about Johnson, the famous ballplayer, who won a great victory after years of defeat. He told a very interesting story, but failed to tell what kind of a ball that Johnson threw that won the victory.

LINEN MACHINERY HERE

FURTHER SHIPMENTS EXPECTED TO ARRIVE SOON

Eight pieces of linen mill machinery, weighing seven tons, were unloaded in Salem yesterday. They included the Brownell twisting frame, to be used for twisting the twines and yarn softening machines. These were shipped directly from Leeds, England, where they were manufactured.

B. C. Miles, owner of the Miles' linen mill, announced that the machinery would be installed as soon as the building located in North Salem near the Southern Pacific track would be completed, which will be no longer than two weeks from now.

The machinery unloaded yesterday is but a small amount in comparison to that which is expected. Twenty tons will arrive the first of July, while the bulk of the order will be filled in the middle of July when 45 tons will be unloaded.

In the meantime everything will be made in readiness for its immediate installation. Doors will be placed on the new building immediately so that the machinery that arrived yesterday may be uncrated.

Tag Day For Whales In Antarctic Ocean

PORTSMOUTH, Eng.—An expedition which is to tag whales with identity discs, and take other steps to discover more about their haunts and habits, will set out from this port in June for the Antarctic regions to remain for many months while engaged in research work. The scientists hope to determine, among many other things, whether whales are polygamous; their birth rate; how long they live; how far and where they travel, and what floating organisms constitute their food.

To test whether whales breeding in African waters migrate to southern seas to feed, small darts bearing metal labels will be fired from a specially designed cross-

"Door of New World," Ellis Island, Nears Closing

The death-knell of Ellis Island, world famous immigration station in New York harbor, has been sounded. R. C. White (left), assistant secretary of labor, Dr. J. W. Kerr (right), assistant chief of the public health service, and other members of a special commission have begun a tour of inspection in Europe preparatory to conducting all immigration examinations abroad. The idea is to stretch health and immigration officers to all consulates abroad.

bow into the thicker layer of blubber on the back. These tags are all numbered, and a record of each one shot into a whale will be carefully kept. In the event that any of these discs are subsequently found by whalers or other persons, it is hoped that the expedition leaders will be communicated with, as each label contains a request as to whether the whale was caught and under what conditions.

The expedition will probably make its base at the Falkland Islands. It is under the auspices of the colonial office, and its task is designed to aid the whaling industry.

Captain Scott's old ship, the Discovery, will be used by the scientists, and Lieutenant J. R. Stenhouse, who has had much experience in chasing whales, will be the vessel's master.

JUVENILE DELINQUENCY DECREASES

DENVER, Col.—Criminal acts by juveniles have decreased in the United States since the advent of national prohibition, rather than increased, according to Charles L. Chute, of Minneapolis, Minn., general secretary of the National Probation association. Mr. Chute came to Denver to attend the nineteenth annual conference of the organization.

"Bootlegging may have increased," he said, "but the number of spectacular crimes, and the total number of law violations of all kinds have steadily decreased among juveniles since the national prohibition law went into effect."—Christian Science Monitor.

SCHAEFER'S HERBAL COUGH REMEDY

Will stop that cough. It is the best and most economical cough remedy made.

Try It Once! You'll always use it

Musicians of Moscow Opera Form Leaderless Orchestra

COLOGNE—An orchestra without a conductor was one of the strange discoveries which Hermann Abendroth, director general of the Cologne Opera, made during a recent trip to Russia. This unusual orchestra was organized in Moscow by members of the State Opera Orchestra and other musicians.

It required 50 rehearsals for this novel orchestra to perfect itself in a number, but Herr Abendroth says there are so many musicians in Russia who accept this burden without grumbling. In his opinion this orchestra without a conductor affords an excellent schooling for musicians in technique and accuracy, and that the brilliance of the Moscow State Opera is probably due in large measure to training of many of the orchestra members without a leader.

FIRE THREATENS MILL

PROMPT WORK BY SILVERTON DEPARTMENT PRAISED

SILVERTON, Ore., June 18.—(Special to The Statesman.)—Only due to the quick work of the Silvertown fire department is the Silvertown Lumber Mill still standing. Wednesday afternoon a spark caught under the dock, burned for 50 feet and caught in a lumber pile which had to be torn down to stop the flames. The fire department was on its way to the mill before the signal whistle had stopped blowing. This is the second time a fire has caught in this mill during the past two months.

Are you telling your friends about the Slogan section of The Statesman? This paper's policy is for the upbuilding of the city and the surrounding farming community.

WOUNDED DEPUTY AIDED

KLAMATH FALLS OFFICER IS FIRST UNDER LAW

Deputy Sheriff Ed Kendall of Klamath county, who was seriously wounded in a duel with a bootlegger this week, is the first peace officer of the state to receive the benefits of the workmen's compensation law as amended by the last legislature, declaring the peace officers of the state to be engaged in a hazardous occupation, and thereby bringing them automatically under the protection of the law. Deputy Sheriff Kendall is in the hospital at Klamath Falls and is reported by the commission's representative there to be in a very serious condition, according to D. A. Elkins, industrial accident commissioner.

RATE SUSPENSION ASKED

20 PER CENT INCREASE IN NORTHWEST DUE JULY 9

Suspension of a proposed increase in rates on interstate shipments of fresh fruits and vegetables, effective July 9, is asked of the interstate commerce commission by the state public service commission. The rates apply to Oregon, Washington and California, and provide for an average increase of approximately 20 per cent.

MORE CHINESE ON STRIKE

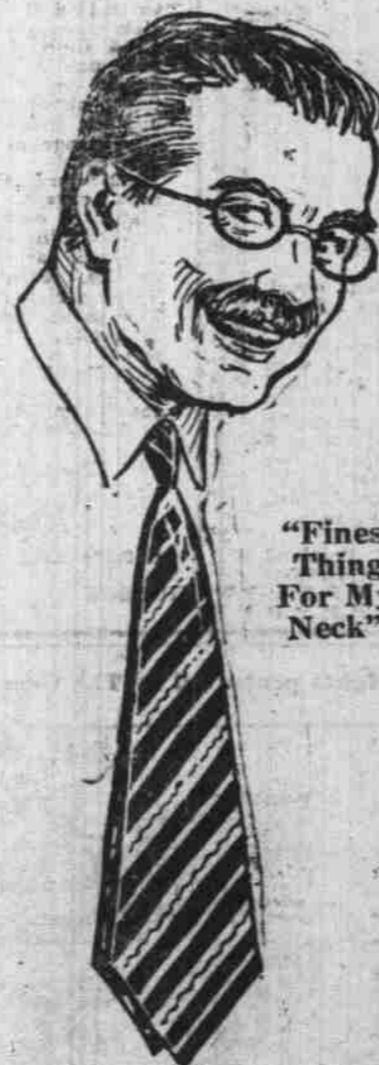

HONG KONG, June 18.—(By The Associated Press.)—A small percentage of the elder students of Queens college, the principal government educational institution for boys, went on strike this morning in sympathy with the Shanghai students' agitation. The strike is attributed to intimidation.

Salem industries are stable. Salem is not a fly-by-night town. It is being built on a real foundation.
