STROKE KILLS GUARD
CHICAGO, July 4.—(By Asso-
ciated Press.)—While patrolling
a rifle at a prisoner who was trying
to escape, Marcellus Kelly, for 30
years a guard at the house of cor-
rection, dropped dead today.

LEADER IS ELECTED
PORTLAND, July 6.—Miss Mar-
ion Jenkins of Vancouver, was
elected president of the Washing-
ton state society of Christian En-
deavor at the state convention.

STROKE KILLS GUARD
CHICAGO, July 4.—(By Asso-
ciated Press.)—While patrolling
a rifle at a prisoner who was trying
to escape, Marcellus Kelly, for 30
years a guard at the house of cor-
rection, dropped dead today.

Tests Seek to Develop
Standard Mail Airship
CHICAGO—On the Monmouth-
Maywood air mail experimental
track are being tested eight new
different types of airplanes from
which it is hoped to develop a
standard mail plane.

The all-metal monoplane, the
first of the Ford series, is capable
of carrying 1,000 pounds or more
of mail, while the Carrier Pigeon
and Mercury have similar capacity.
The others include a "World
Cruiser" type, a Boeing, a Huff-
Deland and a Cox-Clemens.

Present air mail planes of the
De Havilland type carry only 500
pounds of mail, due to lack of
cubic capacity.

Since the three-mile-a-minute
army biplanes have visited the
Maywood hangars, the aerial post-
men have become a bit discontented
with their 100-miles-an-hour
cruisers. If the new type planes
carry several hundred pounds
more mail and fly only 95 miles
per hour, they are likely to be
declared "too slow" by the pilots.

This may seem queer to non-fliers,
but to airmen it is logical, for
speed in the air means better con-
trol. Control in turn means a
greater safety for the pilot and
his cargo.

From experiments with the new
type planes it is desired to develop
a more efficient plane to be built
in quantity.

Dentist Foresees England
Weakened by Poor Teeth
LONDON—During the last few
generations the teeth of the na-
tion have been getting steadily
worse, according to J. H. Badcock
who, in his presidential address to
the 45th annual meeting of the
British Dental association, con-
tended that the strength of the
country is being sapped by dental
disease. Bad teeth, he said, was
one of the results of civilization,
and roughly speaking, the nearer
people got back to nature the
better the teeth.

Mr. Badcock said that during
the last 50 or 60 years there had
been a great change in the na-
tion's food, and that the increase
in population and the concentra-
tion in cities had involved the im-
portation of more food, largely
canned or preserved. The softness
of modern food, Mr. Badcock be-
lieved, failed to provide that fric-
tion and cleansing to which gums
should be naturally subject in the
mastication of hard foods.

Taking the nation as a whole,
said Mr. Badcock, it appeared that
at least 85 per cent of the popula-
tion under 20 years of age and an
increasing percentage over that
age, were sufferers from dental
diseases. There was a higher in-
cidence among women than men.
"Dental disease was to be found
among all civilized people," ob-
served the speaker, "but we in these
islands undoubtedly exhibit a bad
pre-eminence. It is sapping the
strength of the nation."

Antelope Herd Thrives
in Canadian National Park
CALGARY, Alta.—Antelope
which were threatened with ex-
tinction in Canada have been suc-
cessfully preserved in Nemiskam
National Park. When the preserve
was established in 1915 there
were only 45 in the herd, the last
survivors of the thousands that
once had roamed the prairies.
There are now 235 animals in the
herd, a gain of 190. How well
they breed in captivity is shown
by the fact that there was an
increase of 55 in 1924 alone.

Antelope were prized
trophies and suffered such ravages
in numbers that extinction of the
species was in sight. A herd finally
was discovered in Southern
Alberta and the tract of 5,000
acres on which the animals were
feeding was surrounded by a fence
of woven wire and all the work
as done without disturbing the
animals.

Many Important
Conferences Staged
LONDON—London has been the
leading center of the world for
international conferences this
year. Nearly 700 American and
Canadian doctors attended the
recent convention. After that the
next important gathering was the
world railways conference brought
to London at the invitation of the
Institute of Civil Engineers. Their
sessions will end July 2.

An international conference of
bankers will be held in August
and will be attended by bankers
from the principal cities of the
world.

In addition to these conventions
the year's schedule includes sev-
eral important sporting events,
including international tennis and
polo matches.

LEADER IS ELECTED
