"TOO SLEEPY, JUDGE?" "NO," REPLIES SMALL.

Justice of the Peace Has Early Sunday Morning Lumber Disturbed by Portland Couple.

Brasler C. Small, Salem justice of the peace, holds the undisputed record for performing early morning marriages. This record was established at 1:30 o'clock Sunday morning when Wallace G. Stockton and Pauline Pauling, both of Portland, were married at Judge Small's home.

The front door bell rang insistently at 1 o'clock. Mr. Small answered it. "Is it too late to get married?" an inquiry came out of the darkness.

"Well, I wouldn't say that," the judge replied. "It's rather early."

"What I mean to say," the voice countered, "is, can we get married?"

"Have you a license?" "No—not yet."

This presented another difficulty. The county clerk's office closes promptly at five o'clock every evening. A deputy clerk was finally aroused, however, after persistent pushing of a door-bell. The license was obtained, and the ceremony was performed at 1:30 o'clock.

"I guess there aren't many people get married this late, are there?" asked Stockton, as he thanked the judge profusely.

"No," Mr. Small replied sleepily, "they usually get here earlier—that is—they get here—yes, well, good luck."

FAIR IS TAKING SHAPE PAVILIONS WILL BE CROWDED AGAIN THIS YEAR

Applications for places to exhibit during the state fair are being received, it is announced by Ella Schultz Wilson, manager. Early indications point to crowded pavilions for all the space in the machinery building has been allotted and tents will be necessary to take care of all.

At least 24 of the 36 counties in the state are expected to have booths this year.

Work on the \$30,000 boys' and girls' club work building, authorized by the last legislature, is progressing rapidly and will be completed in plenty of time for the fair.

Nearly every event in the racing program has been filled and entries close. American Legion day will be held Saturday of fair week, and an attractive program is expected to bring out large crowds.

Fault Under Mouth of River May Cause Quakes

TOKYO—A scientific opinion on the recent earthquake in the Tajima region of Japan, which took several hundred lives, has been submitted to Governor Hiyataki of Hyogo-ken by Dr. Nakamura of the Tokyo Imperial University, the leading seismologist of the empire. In his report Dr. Nakamura stated:

"The existence of an earthquake belt running from Aomori, in the northeast to the neighborhood of Sabae town, in Fukui prefecture on the Japan sea coast, has been well known, but in this zone no strong shock has ever been recorded. On the southwestern Japan seacoast, including Inaba, Hoki, Idumo, Iwami and Oku provinces, also no disturbances of importance has taken place since the establishment of Tokyo University.

"I am inclined to attribute the origin of the recent destructive quake to a deep fault below the mouth of the Maruyama river, as mentioned by others who have inspected the Tajima region. There might have been a local isocostion of strata near Kunimatsu, in Western Tango province, and any immediate destructive shock is hardly conceivable in the vicinity of the river mouth mentioned. Anyhow, a sounding of the sea bottom near the river might furnish valuable data."

DID YOU EVER STOP TO THINK

By E. R. WAITE, Secretary Shawnee, Okla., Board of Commerce

That the building of permanent roads is not only a matter of convenience, but a matter of straight economy.

That good roads are essential to the development of any community.

That a growing community must have good roads radiating in every direction, of lapse back to where it was in the beginning. Many sections stand between good roads and ruin.

That on account of poor roads many rural sections are practically isolated from their natural trading points.

That good roads mean better farming, better business, better markets, a better relationship between the city and rural sections and a growing community.

That poor roads hold back production, immigration, development, schools and churches.

In sections where good roads are not first in the thought of the business farmers and city business men means that the lack of energy, intelligence, progressive and far-sightedness of these men are holding back from their community things that would insure of incalculable benefit to
