

BUSY MUSSOLINI IS GIVEN OTHER WORK

Premier Undertakes to Become Historian of Movement He Has Created

ROME—Not satisfied with having created Fascism, with having put it into effect during three arduous years, and with bearing the Herculean responsibility of holding simultaneously five cabinet posts, Benito Mussolini is now undertaking the task of incorporating his achievements by becoming the interpreter and historian of the political creed he brought into power.

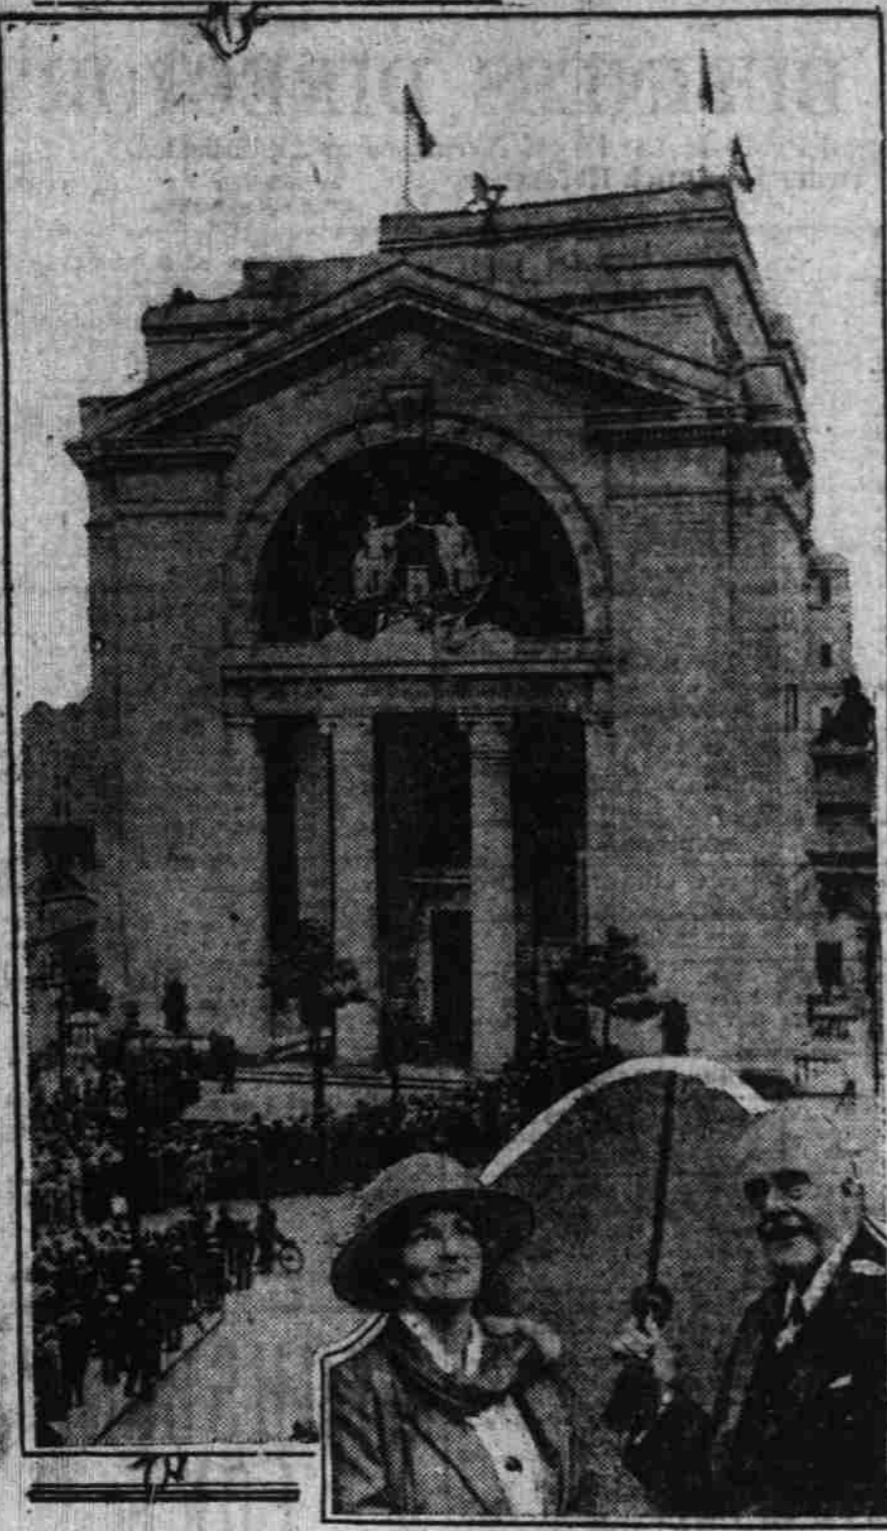

Undaunted by the almost superhuman exertions and responsibilities of his unusual position, the premier has found time and energy to contribute to the political monthly, *Gerarchia* (Hierarchy), which he founded, two carefully written articles, explaining the Fascist conceptions of the 1922 revolution and of the new labor union.

The articles, apparently the initial ones of a series, each militant and controversial in tone, survey the historical background of the subject matter, justifying the Mussolinian point of view, and aggressively point out how the 1922 revolution and the Fascist labor union can be used as weapons in the struggle to Fascistize Italy.

Writing on the labor unions organized by his party, Mussolini argued they are different from those in all other countries in two respects: they accept fully the idea of Fatherland, rejecting any internationalism which implies political adherence or class fealty breaking through national boundaries, and they consider capital not as an element to be suppressed but as one to be liberated and strengthened for the benefit of the Fatherland.

Supporting the thesis that Fascism came into power by a revolution and is now defending itself as a revolutionary government, the premier asserts that the two years before the now famous "March on Rome" constituted a war between Fascism and the government then in power. Answering the objection that the march on Rome was a parliamentary coup d'état, Mussolini maintains that it was an insurrection, adding that a revolution does not necessarily coincide

Anglo-American Unity Symbolized on New U. S. Structure in London

with its most important insurrectional acts which, he declares, is but a single moment of the revolution were comparatively bloodless, it was merely because the government in power realized it would have been folly to resist.

The premier concludes his survey with a plea that Fascists realize the possibilities and necessities of the revolution, that they keep ever in mind the need for defending it and using it militantly against its opponents who are hence not merely peaceful parliamentary enemies but traitors and subversives.

Japan to Study Growing of Rice From Americans

TOKYO.—The department of agriculture is planning to send an expert to the United States to study and report the agricultural situation, especially with regard to the cultivation of Japanese rice on American farms.

The output of Japanese grain in America is said to have been on the increase up to 1923, when 270,000,000 pounds were produced. The subsequent decrease is ascribed to the rise in dollar ex-

WALLACE ROAD PROJECT SUBJECT OF INTEREST

COMMUNITY CLUBS ARE NOW MAKING INQUIRIES

Callers at Chamber of Commerce Indicate Participation to Become General

H. C. Gilbert, president of the Parent Teacher association of the Liberty district, was a caller at the Chamber of Commerce yesterday, securing information regarding the big corn show to be held next November at the Armory under the auspices of the Salem Chamber of Commerce.

Mr. Gilbert says the Liberty district is figuring on putting on a community exhibit early in November and then bringing the prize winners to the corn show and industrial exhibit at the Armory.

A delegation from Marion also called at the Chamber of Commerce a few days ago, bringing the news that Marion would be represented at the corn show this fall and that the Marion community would put on its home community show and then bring its winners to the November show to be held in the Armory.

Scotts Mills will also hold a home community show first, by which its best products may be selected for the big corn show in Salem.

Fruitland has also sent word to the Chamber of Commerce that it would put on a community exhibit at Fruitland and then let the winners be entered with the Fruitland community exhibit at the big event next November.

Sunnyside, North Howell, St. Paul, Salem Heights and Lash Center will in all probability put on their own community shows first, whereby each community will be enabled to exhibit its very best products at the November show in Salem.

Early in September the Salem Chamber of Commerce will call a meeting of delegates from each of the nine communities to be represented at the corn show, for the purpose of discussing points on which rating are to be made and several other matters.

change against moneys of importing countries.

In addition to studying the rice cultivation in America, the agricultural department investigator will also look into the system of selling farm products and the supervision of traffic bearing upon agriculture.

HOUSEHOLD HINTS

MENU HINT
Breakfast
 White Cherries
 Bran with Top Milk
 Raisin Bread Toast
 Coffee Substitute
Luncheon
 Corn Chowder
 Whole Wheat Bread
 Baked Bananas
 Milk
Dinner
 Chartreuse of Meat and Spaghetti with Tomato Sauce
 Baked Onions String Bean Salad
 Saratoga Corn Cake
 Cherry Caserue
 Blackberry Pit Coffee

TODAY'S RECIPES
Chartreuse of Meat and Spaghetti—Simmer one-half pound of ground round steak slowly with one tablespoon of finely chopped onion, one tablespoon of finely chopped green pepper, salt and pepper to taste and two cups of stock, for 20 minutes. Cook one-half pound of spaghetti in boiling salted water for 15 minutes. Mix meat with one-fourth cup of bread crumbs, two beaten eggs and the spaghetti. Steam in a greased mold for 40 minutes and serve with tomato sauce.

Baked Onions—Wash large onions. Boil in salted water for an hour, adding boiling water as it boils away. Dry onions and roll each one in a piece of buttered waxed paper, twisting at the top to keep it closed. Bake slowly for an hour or until tender all through. Peel and put in a deep dish and brown slightly for 15 minutes. Season and pour melted butter over them.

SUGGESTIONS
 Beat very lightly the yolk and white of an egg separately. Add a little salt. Set in a china cup in a pan of hot water and stir constantly. The egg thickens slightly, puffs and fills the cup with creamy custard. Set in the oven for a minute and serve immediately.

SPICED PEARS
 Four pounds pears, four lbs. sugar, cook one hour. Two small lemons boiled in a little water until tender, then chop in small pieces one-half lb. candied ginger root. Add ginger and lemon to the pears and cook half an hour longer.

You can crystallize your own preserved fruits, peaches, pears, quinces, apples or any other. Drain from the fruit all syrup possible. Cut in any size desired, sprinkle with sugar, and dry in a very slow oven. It may be necessary to sprinkle the fruit again with sugar during the drying. When dry enough not to be at all sticky, sprinkle with sugar and pack in layers with wax paper between. This fruit may be used for dipping in bitter chocolate for bitter-sweets and can be given to children, as it is pure.

To make potato biscuits add to the cold mashed potatoes about twice as much flour and the same number of teaspoons of baking powder as cups of flour, a little salt, and enough milk to make a very stiff biscuit-like dough. Mold quickly into biscuit form and place in a greased pan. Bake as you would a baking powder biscuit.

Worn spots on polished floors in doorways or at the foot of stairs may be prevented by applying a thin coat of wax once or twice a month. Put the wax in cheese-cloth and rub over the worn spots, allowing 15 minutes for drying, then polish. In an hour or two apply a second coat of wax and polish again.

RUMANIA EXPECTS WHEAT SURPLUS

BUCHAREST — A decrease of 8,000,000 acres of grain-sown land in Rumania in the present year is shown by government statistics recently issued. Despite the decreased sowing, the crop conditions are reported as excellent, the weather throughout May having been exceptionally favorable.

Agricultural experts are predicting that the 1925 wheat crop will leave a large exportable surplus.

Airplanes Will Use Steam as Power, Now Predicted

CARDIFF — The use of steam engines in airplanes was predicted by Dr. John S. Haldane at the annual meeting of the Institute of Mining Engineers.

In the course of a paper on coal and steam, Dr. Haldane said in the very near future he believed steam engines would take the place of internal combustion engines to a very great extent, and that the future development of the steam engine would be along the lines of increased steam pressure with smaller and lighter engines. The complete engine and boiler would be much smaller and lighter than an equivalent internal combustion engine, and would in all probability be more suitable and even superior for use in airplanes and motor cars.

Another scientist, Sir John Cadman, said he looked upon oil as a phase which was passing. What oil was doing today coal would do

FIRST TOUCH OF POSLAM STOPS ALL ITCHING!

The gently healing medication of Poslam is so CONCENTRATED that it stops itching instantly. It penetrates every tiny pore, and quickly drives away eczema and other torturing eruptions when other remedies are worse than useless. Costs only 50c—at all druggists.

To Retain Your Youthful Beauty We recommend the daily use of

Which contains 7% of Poslam Ointment —Adv.

Lemon Juice Whitens Skin

The only harmless way to bleach the skin white is to mix the juice of two lemons with three ounces of Orbead White, which any druggist will supply for a few cents. Shake well in a bottle, and you have a whole quart-pint of the most wonderful skin whitener, softener and beautifier.

Massage this sweetly fragrant lemon bleach into the face, neck, arms and hands. It can not irritate. Famous stage beauties use it to bring that clear, youthful skin and rosy-white complexion, also as a freckle, sunburn and tan bleach. You must mix this remarkable lotion yourself. It can not be bought ready to use because it acts best immediately after it is prepared.—Adv.

JULY 23 and 24

Admission Free

VICK BROTHERS High at Trade

Special display and demonstration of Willys-Knight and Overland Six Cylinder Cars. See these Fine Motor Cars!

Plan Novel Showing of Willys-Knight and Overland Cars With Cut-away Motors

Mr. Lee R. Bryant, undoubtedly one of the most interesting lecturers on the internal combustion motor in the entire automotive industry, has been secured by Vick Brothers for two days of special demonstrations here.

Mr. Bryant will deliver an instructive lecture on the design, construction and advantages of the Knight Sleeve-Valve motor.

Assisting him in the lectures Mr. Bryant will have two cut-away motors, one an Overland 6, the other a Willys-Knight 6.

The lectures will start promptly at 8 o'clock and it is hoped that the people of Salem and vicinity will take advantage of this exceptional opportunity to familiarize themselves at first hand with the workings of a motor car.

This afternoon Mr. Bryant will hold a parade of the new Overland 6's and the new Willys-Knight 4's and 6's. These new models of the Willys-Overland factory are the last word in automotive engineering and design, and the reception accorded them throughout the United States has been nothing short of miraculous.

The two new Overland 6 models—the Standard Two Door Sedan and the De Luxe Sedan—are unquestionably the most beautiful new closed cars on the market at anywhere near the price. The two door sedan is finished in Duco, is equipped with a 40

h. p. motor of Willys-Overland design, balloon tires, 29x4.95, mounted on artillery type wood wheels; long easy-riding semi-elliptic springs, front and rear.

This sedan contains more room than many of the present sedans costing \$300 to \$400 more. A novel arrangement in driver's compartment and passenger seat makes easy access to the rear compartment without the necessity of front passengers leaving the car.

The De Luxe four door sedan, fitted with disc wheels and balloon tires, is beautifully finished in two tones of blue and gray. The arresting beauty of this car was one of the outstanding features of the recent automobile shows.

If you have not already seen these models and ridden in them, it is decidedly worth your while to attend this lecture and at the same time ask Mr. Bryant to show you the new Overland 6's.

Cut-away Motors Shown

See for yourselves—Willys-Knight 6 and Overland 6 motors in operation.

One of the most novel and most interesting automobile shows ever staged.
