An interesting personality in Salem this season is Madame Beeman of New York City, an eminent musicion of the east. Madame Beeman came to Salem through one of those queer quirks of circumstances which often leave a host of unsuspected pleasures in their wake. It had been Miss Beeman's intention to go to Bellingham, Wash., to spend the summer with friends. Instead, she came to Salem, making the change in plans by wire after she was as far west as Chicago. Miss Beeman is being entertained at the

street while here. Miss Beeman has an essential

Read this frank comparison of costs, between laundry service and electric machine. Note we now offer a service which saves you far more work, and actually at less cost.

ATTAL AND MAKE

Washing is/ hard work

Don't Be Mis-led-Know the Facts

You cannot afford to be mis-led. We merely ask that you weigh the factsfigure this out for yourself. Then make your own decision, without any salesman around to persuade you.

Machine Saves Only the Rubbing

Your only purpose in buying an expensive electric washer is to save yourself work and drudgery. But the machine saves you only the actual rubbing-and

than 10 years under constant use. So the purchase price costs you \$17.50 per year.

But your \$175 will actually pay you 7% interest, if you invest it instead of putting it into an expensive machine. That adds \$12.25 per year. Total cost. JUST TO OWN A WASHER, \$29.75 per year.

Few Realize These Costs

Few have ever checked up, kept records, and really learned how much it costs for materials. Do this and you'll be surprised! For these several little costs mount up. You never have ENOUGH hot water, without extra heating, to PROPERLY do a family washing. Actual test-actual meter read-

The Actual Comparison

Now let's summarize and compare: Per Year Cost of owning washer. . \$29,75 Cost of water heating and materials 15.60

home with machine, .\$45.35 Cost of Wet Wash at C. C. Laundry 39.00

You actually save at our laundry\$ 6,35

And in addition to this CASH saving at our laundry, you save ALL the muss and drudgery, and ALL your time besides.

Total cost Wet Wash at

not even all of that!

The machine can't draw the water, heat it, and lug it to the washer.' It can't save you from soaking your hands in hot and dirty water. It can't empty out the heavy buckets of filthy water, and fill the washer again with rinse-water. It can't drag baskets of soggy clothes to the line, pin them up, and take them down again. It can't prevent a steamed-up, sloppy house or basement, exposing you to colds and grippe. It can't give you your time-you must stay right with it constantly. You STILL have drudgery to do-and it costs more, actual cash, than to save ALL this work and slop and muss, and save ALL your time, by simply letting us do it all for you.

Figure It Out For Yourself!

Here are the facts and figures. Here is the actual comparison. Figure it out yourself!

A really worth-while electric machine, good enough to stand up for a few years constant use and wear, costs \$175 and up. Some enthusiastic salesmen, eager for a commission, stretch its promised life to 20 or 40 years, figure no additional expense whatever, and then compare to an immaginary and exaggerated laundry cost.

But they never guarantee 20 to 40 years' wear! For actual investigation shows most electric washers wear out after five to seven years. You cannot DE-PEND, at most, on more ings, and records of fuel consumption - shows it costs the average family 15c to 20c to heat this extra water. Careful records show it

costs between 10c and 15c for the several materials required for one week's average family wash.

Tubs, wash-boards, boilers, clothes-lines, clothes-pinsall this extra equipment costs money, and adds to the weekly cost, Many pay extra for water. Electric current adds more. Repair on the machine adds still more. You must pay these costs, but in order to be fair and conservative, we add nothing for any of these.

So for all these items, figuring only the cost of waterheating and materials, the amount is at least 30c per week. 52 weekly washdays brings it to \$15.60 per year

The Smaller Cost at **Our Laundry**

Now remember the machine delivers only PART of Wet-Wash. It does not dry, starch, nor iron. The average family bundle sent to this laundry is with-

in 20 pounds. We now de-liver 20 pounds, Wet-Wash -saving you ALL the drudgery, giving you ALL your time-for the low cost of 75c. That costs you only \$39 for one whole year's washing.

We Save You Wear and Tear on Clothes

Salem people are beginning to realize how we have revolutionized clothes-washing. Old ways, which brought about a prejudice a g a i nst laundries, have been entirely banished!

No caustics-no clotheseating acids or chemicals are ever used-nothing but the purest of materials. You may safely wash your face in any material we use for clothes! You cannot say as much for the materials you wash with at home.

23. - 2000

A States
