### Motorcyclists Worried

Motorcycle owners have begun to wonder what their fate is to be when the new "head-in" parking ordinance goes into effect. No exception was made for motorcycles which will have considerable difficulty in conforming to the new regulations. The steel stands of the machines are on the back wheel and it will be exceedingly inconvenient to park them head-on toward the curb. Drivers with a side car would also have difficulty through being required to push the heavy machines backward into the street. Information available yesterday was to the effect that the cycle owners were simply up against it and forced to grin and bear it. The parking ordinance was signed by Mayor Giesy yesterday and will go into effect ten days from that time.

THREAT BY ADMIRAL IS DECLARED UNAUTHORIZED. SEN. McNARY DOES NOT AGREE WITH PALMER ATTITUDE. Merchant Marine Fleet Should Remain at Portland, Is View of Senator

"If Admiral Palmer, as newspaper reports say, is threatening to take the merchant marine fleet from Portland he is acting without legal authority in my opinion," United States Senator Charles McNary declared in an informal statement here yesterday, with reference to press reports that Palmer was planning such action. The senator further expressed the opinion that indications pointed to the possibility that Palmer was seeking to concentrate control of the merchant marine in the hands of a few, which, he declared, would be contrary to the intent of the merchant marine act.

Senator McNary was a member of the senate commerce committee and of the sub-committee that framed the present merchant marine act.

"I was not in sympathy with the resolution passed by the shipping board transferring the control of the emergency fleet corporation to the shipping board. I believe that it was contrary to the letter and the spirit of the merchant marine act and consequently I feel that Admiral Palmer, in threatening to take the fleet from Portland, is acting without legal authority." One of the primary principles of the act, he explained,

was to secure geographical distribution of the fleet in order to serve every large port.

Before he left Washington, he declared, he had occasion to talk the matter over with President Coolidge who expressed similar desire for decentralization of the merchant marine.
