More live stock—  
And more and more—  
That is what we must get. Let us get beet sugar factories, and the live stock industries will flourish, and the fertility of the soil will be conserved and built up.

There is no other one thing that will do as much in this respect; and that is wonderfully important in building up a solid and well balanced prosperity that will endure; a Gibraltar prosperity.

Have you seen Upjohn's gladoll at 21st and Chemeketa streets? If not, you owe yourself the treat. That corner has been made a beauty spot worth going a long way to see. Mr. Upjohn has the growing of the glad flower down to a fine point. He has gone through the mill of experience.

"When girls receive less than a living wage they must sponge off their parents or often use other means to live." The quoted words are those of S. B. Davidson, business agent of the Salem Trades and Labor council, referring to the girls working in the Argo and Home restaurants. The institution is a dirty one. It is unclean for it cannot be excused, short of an open apology, which in all decency ought to be made. There are no

**Bleeding Gums Are Dangerous**  
GUMS that bleed easily when the teeth are brushed or a toothpick is used are a sign of pyorrhea, and pyorrhea is a very dangerous disease. It eats under the gums along the tooth roots, sets up inflammation and causes a poisonous pus to form. Some of this pus is absorbed in the blood, and is the direct cause of rheumatism, lumbago, neuralgia, liver, heart, kidney and blood diseases. Some of the pus is swallowed with food, and leads to serious stomach and digestive disorders.  
Pyorrhea, if neglected, causes the teeth to become loose and eventually they are lost. Very many people have pyorrhea—probably 70 out of every 100. It is a disease that can be largely controlled and sometimes cured.  
Registered Dentists using the E. R. Parker System treat many cases of pyorrhea, and have much success in controlling it. If your gums are not firm and healthy, if they bleed easily and have a bluish red color, and you are not feeling very well, you are invited to call at any of the offices using the E. R. Parker System and have your teeth examined free. It is high time to look after both your teeth and your health.

tlement in discharge of some of the accrued interest, having reduced the former total of the treasury's debt figures. Of the 29 nations which borrowed, only Cuba has paid all of the debt and interest marked up against it, while five others—Great Britain, Finland, Hungary, Lithuania and Poland—have entered upon funding operations and the English debt, by far the largest of the war account, has been reduced in large amount.  
The French, Italian and Russian obligations are the largest yet unfunded. France received during and after the war, in actual loans from the United States, \$3,340,516,043.73. Under the treasury system of calculation, interest is figured at 4 1/2 per cent on this total from the different dates at which parts of the loan were actually made, thus adding, \$70,040,804.55 to the principal as accrued interest, making the total to be funded, from the American standpoint, \$4,210,586,848.27. Calculations of the Belgian indebtedness on a similar basis had resulted in a total of \$480,503,983.

### Lemons Bleach the Skin White

The only harmless way to bleach the skin white is to mix the juice of two lemons with three ounces of Orchard White, which any druggist will supply for a few cents. Shake well in a bottle, and you have a whole quarter-pint of the most wonderful skin whitener, softener and beautifier.  
Massage this sweetly fragrant lemon bleach into the face, neck, arms and hands. It can not irritate. Famous stage beauties use it to bring that clear, youthful skin and rosy-white complexion; also as a freckle, sunburn and tan bleach. You must mix this remarkable lotion yourself. It can not be bought ready to use, because it acts best immediately after it is prepared.—Adv.
