

STATESMAN'S SATURDAY MORNING MARKET PAGE FOR OUR BUSY HOUSEHOLDS

Molasses and Squash Pie
Beat together one egg, one cup milk, one-fourth cup of sugar...

Make a white sauce, in the top of a double boiler, of the first six ingredients, mixing the mustard with the other dry ingredients...

Apricot Pie
Fresh apricots are usually rather insipid so if you would have a really tasty pie use the canned product in the following recipe...

Bulky Foods Necessary
It is more common to find sickness among people who do little work than among the working classes...

Five-Minute Pie
When the call comes for a quick dessert your problem can be solved in five minutes if you happen to have in the house a can of fresh fruit...

The diet of laboring man usually consists of simple, plain and generally, coarse foods...

A Cooling Diet for Warm Weather
During the summer a great many office workers begin to lose flesh, because of eating unwisely...

Green vegetables, legumes, fruit and some cereals are, owing to their cellulose formation, found to be laxative...

The fact is few people eat correctly during this season of the year. Hours of hot cooking can be avoided by careful planning...

Breakfast: Cherries, pineapple, orange or fig marmalade, oatmeal and bran bread and gems.

Cooling drinks, ice water, lemonade, grape juice, milk, etc., at the soda fountain supply much of the moisture required.

For the evening meal, lettuce, sliced tomatoes, cucumbers, radishes, cress, prunes, pears and graham bread.

The fresh or canned fruits and vegetables always make excellent salads for summer and winter.

Keep the room as simple as possible, but have something, bulbs or a potted plant, for them to watch growing.

Steps in Cold Pack Canning
1. Use only fresh, ripe products; clean, grade and cut or slice.

Books, of course, are the first suggestion, and some few children would be satisfied almost indefinitely with them.

2. Blanch by lowering product in cheesecloth bag into boiling water and holding there from 10 to 15 minutes.

Keep the room as simple as possible, but have something, bulbs or a potted plant, for them to watch growing.

3. Adjust scalded rubbers and caps leaving clamp on top partially open.

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

4. Sterilize required time according to standard time.

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

5. Tighten clamps or cover. Invert to cool and test joints. Store in cool dark place.

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

Recipes
Orange and Grape Salad
2 cups orange sections
2 tsp. Grape-Juice

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

2 tsp. French dressing
Peel fine large oranges and separate the sections, removing every particle of the white inner skin.

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

Prune Whip
12 large prunes
3 egg whites
3 tsp. powdered sugar

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

Welsh Rarebit
1/2 cup milk
1/2 tsp. salt
1 tsp. flour

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

2 cups milk
1/2 cup butter
1/2 cup sugar

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

1/2 cup milk
1/2 cup butter
1/2 cup sugar

For the toys, have a few old shoe boxes in which to store the things. Keep the articles belonging to each occupation separate...

Household Hints
When Milk Curdles
If the milk curdles when making milk gravy, put in a little soda and it will thicken up and be ready to serve.

To Clean Rugs
To clean a rug on the floor, and without dust, put 2 tablespoons of ammonia in a gallon of water.

For Cleaning Screen Doors
Have a stiff brush, dip it in gasoline, and go over the screens. It takes off the grease and dust, and makes them look like new.

To Brighten Steel
Steel that is rusty should be cleaned with a cut onion and left for a day. Afterward it can be polished either with emery powder and paraffin, or with a paste made with brick dust and turpentine.

Prices on books purchased this year are from 10 to 60 per cent higher than for the same texts in 1919, according to the contracts awarded yesterday.

Books adopted by the commission for a two-year period are: Elementary textbooks—Hamilton's "Essentials of Arithmetic," books 1 and 2; Gordy's "Stories of American History"; Potter, Jeschke & Gillett; "Oral and Written English," books 1 and 2; Progressive Music Series, books 1 to 4 inclusive; New World Speller, books 1 to 3 inclusive.

Books adopted for a four-year period are: Elementary textbooks—David, "Productive Farming"; Carpenter, "Stories Pictures Tell Recommended for Teachers," books 1 to 4 inclusive; Winslow, "Healthy Living," books 1 and 2; High school textbooks—Gregg, "Shorthand Manual" and "Speed Studies"; Smith, "Elementary Latin"; Kelsey, "Caesars Commentaries"; Gunnison & Harley, "Cicero's Orations"; Fairclough & Brown, "Virgil's Aeneid"; Bennett, "New Latin Grammar"; Wells & Hart, "New High School Algebra"; "Modern First Year Algebra"; and "Modern Second Course in Algebra"; Durrill & Arnold, "Plane and Solid Geometry"; "New Plane Geometry" and "New Solid Geometry"; Bergen & Caldwell, "Practical Botany"; McPherson & Henderson, "First Course in Chemistry"; Millikan & Gale, "First Course in Physics"; Millikan, Gale & Pyle, "Practical Physics"; Conn & Budington, "Advanced Physiology and Hygiene"; Robinson, "Commercial Geography."

No adoption was made on household administration, domestic arts or manual training.

At each farm where a stop was made conditions under which the crop was grown were analyzed and the problems of culture discussed. Groves were visited that had produced a successful yield and others where the yield had been poor and were the causes were examined.

Several experts from Oregon Agricultural college were on the trip, among them C. V. Rusek, expert on soils, D. C. Mote, of the entomology department, D. L. Long, of the extension department and C. E. Schuster of the horticulture department.

LOANS SHARKS PLAYED
SEATTLE, Aug. 21.—City Comptroller Carol tate ordered members of his office to honor no further assignments of city employees' unearned salaries, to "loan sharks." He also sent a letter to Corporation Council Kennedy asking for advice as to what further action to take.

CHILEANS OFFENDED BY SALE OF PERUVIAN PAPERS
ARICA, Chile, Aug. 21.—(By Associated Press.)—Gen. John J. Pershing, president of the Tacna-Arica plebiscitary commission, intervened today when he hostility of Arica's Chilean inhabitants to the newspaper published and distributed here by the Peruvian delegation to the commission, resulted in disorders in front of his residence.

A Chilean crowd this morning frightened newcomers into the doorway of General Pershing's residence where three members of the American delegation intervened. When the general's attention was called to the incident he immediately visited Augustin Edwards, head of the Chilean delegation and afterward announced that the Peruvians "will have a perfect right to sell papers or to go anywhere in the city."

TEXTBOOK PRICES HELD STABILIZED

Commission Fails to Obtain Lower Figures After Two Day Session

COSTS SHOW INCREASE
Books Raised From 10 to 60 Per Cent Over Figures for 1919; Adoptions Are Listed for Periods

While members of the state textbook commission failed to obtain lower prices for the books adopted for two and four year periods at the end of their two-day session Friday the meeting at least served to stabilize prices.

With only one exception, that of a history by Gordy, was the price lower than that quoted as the lowest current price obtained by the so-called "textbook" trust in other states upon which basis J. A. Churchill, superintendent of public instruction, proceeded to base his course of study and order books.

Prices on books purchased this year are from 10 to 60 per cent higher than for the same texts in 1919, according to the contracts awarded yesterday.

Books adopted by the commission for a two-year period are: Elementary textbooks—Hamilton's "Essentials of Arithmetic," books 1 and 2; Gordy's "Stories of American History"; Potter, Jeschke & Gillett; "Oral and Written English," books 1 and 2; Progressive Music Series, books 1 to 4 inclusive; New World Speller, books 1 to 3 inclusive.

SEVEN HOMES BURNED

FOREST BLAZE DESTROYS MANY RANCH BUILDINGS
SPOKANE, Aug. 21.—(By Associated Press.)—Seven ranch homes were destroyed today by a forest fire which has burned over nearly 10 miles of cut-over land on a two-mile front near Deer Park, Wash. The fire was near a commercial timber tract and all available men are fighting the blaze.

The fire started last night at a point about one and one-half miles from Deer Park. At 11 o'clock this morning it was believed under control but a strong east wind spread it over six miles in a few hours. The blaze jumped Blake Lake, at a point where it is a quarter of a mile wide, and late tonight had burned over three miles on the other side of the lake.

The property damage to the ranches is estimated at \$30,000.

STANDARD RATE ASKED
ADVERTISING PRICE SHOULD BE BASED ON COST, SAID

SPOKANE, Aug. 21.—A standard advertising rate for all country weeklies was urged by E. P. Murphy of the Entiat Times at the afternoon session of the 39th annual meeting of the Washington Press association here today.

Mr. Murphy declared that advertising space should be sold on the basis of cost of publication instead of having circulation set the advertising rate. He added that costs of publication were virtually the same for country weeklies.

The matter will be taken up later by the association.

J. C. Harrigan of the Colville Examiner talked on "political limitations and the danger zone." The afternoon session included the address of Dean M. Lyle Spencer of the school of journalism, University of Washington, on "how much shall we edit?"

The night program included a dinner with talks by Dr. Henry Suzzallo, president of the University of Washington and John M. Allen, service manager of the Washington Press association.

COOLIDGE PARTY BACK
PRESIDENT TO CONFER WITH POSTMASTER GENERAL

"SWAMPSCOTT, Mass., Aug. 21.—(By Associated Press.)—President and Mrs. Coolidge returned late today to the summer White House after an absence of one week. Their 745 mile afternoon automobile ride from Northampton, Mass., where they stayed overnight on their way from Plymouth, Vt., was without incident.

Still undecided as to when he will return to Washington, the president on his arrival, found a mass of routine business and a crowded calendar for tomorrow.

During the day he will confer with Postmaster General New, Senator Wadsworth, republican of New York; Senator Edge republican, New Jersey and State Senator Whitney, republican, nominee for governor in that state and also Edwin Bartley, secretary of state of Liberia.

JAPANESE VOICE PLEA
DISCRIMINATION IS CHARGED WITH REFERENCE TO QUOTA

WASHINGTON, Aug. 19.—(By Associated Press.)—The Japanese do not object to America's restriction of immigrants, but to discrimination against their nationals, Motosada Zumoto, editor of the Herald of Asia said here tonight, asserting that if they were placed on a quota basis as Europeans are, the situation would be greatly relieved.

Mr. Zumoto explained that he was in the United States to observe public opinion through interviews with influential persons, to ascertain whether anything was being done or contemplated to alter the present law by congressional action or through state legislatures.

As the representative of the Japanese-American relations committee, with headquarters at Tokyo and comprising influential Japanese leaders in business, education and religion, he declared feeling over Japanese exclusion was strongest among the "young intellectuals," of his country. He had found that Japanese were treated much better in Hawaii than in the Pacific coast states, where "discriminatory" laws existed.

UNUSUAL WEATHER PROBED BY BOARD

Geographic Society Unable to Determine Cause of Complex Conditions

WASHINGTON, Aug. 22.—(By the Associated Press.)—The unusual weather conditions in the Arctic which caused abandonment for this year of the MacMillan expedition's plans to explore the polar sea were described by the National Geographic society tonight as apparently only one manifestation of nature's complexity in producing the current summer.

"A look at weather records with a view to finding whether this is a 'queer summer' as some laymen assert," said a statement issued by the society, "does not show much that is abnormal in the general weather situation, but it does show what a complex clutter of cross currents go to make up the world's weather."

MacMillan pushing up the coast of Labrador in June found more ice than had been present at that season in the memory of oldest sealing skippers. At the same time, however, the temperature over practically the entire United States was from one to six degrees above normal.

Beginning the latter part of June, there have been inroads of below normal temperatures from the northeast and north, possibly a reflection of the unusually cold conditions which MacMillan has found in the far north. This is borne out somewhat by the records from Alaska. Those available for the early months of 1925 only show consistently low temperatures than normal for the three typical stations: Juneau in the southern Pan-handle; Nome in the northwest; and Eagle in the Yukon valley, near the frontier of Canada. These abnormally low temperatures were being recorded in Alaska at the time that abnormally high temperatures were present over the rest of the United States.

"The greatest handicap to students of weather is the lack of reports from a sufficiently large area. The weather with which the United States is concerned is 'brewed' all over the northern hemisphere—in fact, it is highly probable that in its larger phases weather north of the equator is affected somewhat by conditions in the southern hemisphere. Yet the United States obtains complete reports only from its own territory.

"Conditions in a vast area in the north are unknown except when some expression like MacMillan's remains there for a time and sends out information by radio. The whole of northern Canada is uncovered by reports above the northernmost transcontinental railway, which runs 175 miles south of Hudson bay. Data comes from the Danish settlements in southern Greenland only

in a fragmentary way and the huge areas of European Russian Siberia and most of the rest of Asia must remain largely blank on weather maps. It is such incomplete data available the success of the United States weather bureau in achieving a high percentage of accuracy in its forecasts is remarkable.

John, suburbanite, kissed his wife goodby in the morning, and telling her he would be home at 6 o'clock that evening, got into his auto and started for town.

At 6 o'clock no hubby had appeared, and the little wife began to get nervous. When the hour of midnight arrived she could bear the suspense no longer, so she aroused her father and sent him off to the telegraph office with six telegrams to as many brother Elks living in town, asking each if her husband was stopping with him overnight.

Morning came, and the frantic wife had received no intelligence of the missing man. As dawn appeared, a farm wagon containing a farmer and the derelict husband drove up to the house, while behind the wagon trailed the broken down auto. Almost simultaneously came a messenger boy with an answer to one of the telegrams, followed at intervals by five others. All of them read:

"Yes, John is spending the night with me!"

A certain young man's friends thought he was dead, but he was only in a state of coma. When, in simple time to avoid being buried, he showed signs of life, he was asked how it seemed to be dead.

"Dead?" he exclaimed. "I wasn't dead. I knew all that was going on. And I knew I wasn't dead, too, because my feet were cold and I was hungry."

"But how did that fact make you think you were still alive?" asked one of the curious.

"Well, this way; I knew that if I were in heaven I wouldn't be hungry. And if I was in the other place my feet wouldn't be cold."

An old couple came in from the country with a big basket of lunch to see the circus. The lunch was

heavy. The old wife was carrying it. As they crossed a street, the husband held out his hand and said, "Glumme that basket, Hannah."

The poor old woman surrendered the basket with a grateful look. "That's real kind o' ye, Joshua," she quavered.

"Kind!" granted the old man. "I was afraid ye'd git lost!"

DINNER STORIES

ASTORIA, Ore., Aug. 21.—The seventeenth annual convention of the Luther league, Portland district, will open here tomorrow with a business meeting from 6 to 8 p. m. About 150 delegates and visitors are expected for the session which will end next Sunday night.
