fort is being made to complete the job by September 15 when it is hoped that the Northwestern river freighter operated by the company between Portland and Salem, will resume its schedule. The elevator, according to company officials, will make it possible to load and unload the boat in eight hours, four hours less than the time now required on a maximum tonnage of 200 tons. The platform of the elevator will not move straight up and down, but will move at an incline. Elimination of much of the danger of breakage is anticipated by the use of the elevator.

Service Day Planned—
Inauguration of a "Service Club day" at the Oregon state fair is the plan of Mrs. Ella S. Wilson, secretary of the fair board, a proposal for which was submitted to the Rotary club here at its noon luncheon yesterday. The club was asked to signify its willingness to sponsor the move. Sentiment at the luncheon approved the plan but held that the three Salem service clubs should join in acting as hosts for visiting club members of other cities. If the plan is adopted a silver trophy will be offered to the club having the largest delegation. Thursday has been suggested as the day best suited to the special program. The matter is to be presented to the other Salem clubs.

Invalid Woman Wins Health
And Fortune as Ship Skipper

Forced by ill-health to seek exercise in the open air, Mrs. Dan Lewis, Everett, Wash., woman, bought a boat and induced her husband to join her in a salmon fishing expedition to Alaska. The venture was a failure, but the boat enabled them to start a towing business under her management that in four years has grown so that they now operate three boats, and have contracts for many thousands of dollars worth of business. Mrs. Lewis, her husband, and their first boat is shown.

Bits For Breakfast
Introducing Salem—
As a payroll city.

And as such developing a Gibraltar prosperity.

The time when Salem was known as a slow town was before she began developing a dinner bucket brigade, and those days are gone forever.

The more industries we get, the more we can get, and the easier we can get them. Industries are gregarious. They are prone to group together, for mutual helpfulness.

Compare These Suits
With 2 Pair—at a Price
You'd Pay for One!
\$25.00 to \$50.00

If sheer compelling value will bring you to us this fall—if you are half way here now.

We are featuring, in autumn's newest shades, suits with two trousers at a price you'd easily, outside of this store, pay for a suit with one.

And—with all our efforts, we don't feel that we are going to do you a favor—we want to be favored with your clothing business.

Bishop's
CLOTHING—SHOES—HATS—TRICOT

Absolutely. And with an average and production much greater than we have heretofore thought possible.

When we raise a crop and manufacture and market it, we have produced new wealth. We are doing this every year, and every day, in the Salem district. More and more of it. That is the main reason why Salem is growing, and will grow indefinitely.

The people of Salem are to be given an opportunity to vote upon the question of the municipal ownership of the water system. If there can be put before them a thorough understanding of the matter, with a valuation that is reasonable, they will vote for the proposition, almost unanimously. And they will vote for mountain water, as soon as they can be assured that they can afford the expense.

Ditch Work Starts

Work of filling the Division street ditch will be begun within the next few days, it was announced Wednesday by Walter S. Low, city street commissioner. The first loads of dirt will probably be filled in Thursday. The work will probably proceed slowly, he declared, as the dirt will be filled in, only as fast as it is available from other city jobs. There are two and a half blocks to be filled, requiring a total of from 6,000 to 7,000 yards. After the street has been brought to level it will be necessary to wait until the dirt settles before the street can be paved.
