Did You Ever Stop To Think?

By E. E. Wain, Secretary Shawnee, Okla., Board of Commerce

That electric irons are time, labor and health savers.

That when using an electric iron, you do not have to keep upon your feet constantly.

That the saving of time and health of the house-wife is one of the most important things that can be done.

That electric irons are no longer a luxury, but a necessity which no home should be without.

That their small cost and the small cost of operation make them within the reach of all.

That it is a great convenience to have an electric iron just where you want it and when you want it.

That electric irons are thoroughly practical and perfect in the work they do, and it takes but a few moments to heat them.

That electric irons do much to

take the drudgery out of housework because it makes ironing easy.

Every housewife needs an electric iron. She should have it. Dad, brother or husband should get busy and get her one and do it now.

The best electric irons are always advertised. Read the ads; drop in and buy an iron and take it home.
