

PROHIBITION HELD BIG MORAL REFORM

Dr. Tully on "Faith" at Kiwanis Club Luncheon Tuesday Noon

"A man should believe in himself, in his neighbor, in his government, and in his God," declared Dr. Norman K. Tully, new pastor of the First Presbyterian church of Salem, in an address before the Salem Kiwanis club at its luncheon yesterday noon.

"Faith" was the topic chosen for discussion by Dr. Tully, and he declared that faith is "the mortar which holds the bricks of the walls of society together." He further asserted that "it is up to us to see that the mortar is of good quality and that the bricks are well laid in it."

Quoting the advice William Jennings Bryan was given by his father, "You can better afford to go out into life with a big head than with a little one," Dr. Tully said. "The elder Mr. Bryan was right. A man can get his head whittled down if it is too big, but he can't get it built up if it is too small."

"The greatest fault of the organized church," Dr. Tully pointed out, "is its cold aloofness. And while I respect learning and admire educational institutions, I believe that they also breed a disinterested aloofness from the great mass of the human race."

"The greatest moral reform in history," Dr. Tully stated, "is prohibition." He further declared that it is "so much of a success that bootleggers howl and say it is no good, and some of us are gullible enough to believe them."

close upon their heels but were brought to a stop by meeting another car which had just met the vehicle which the fleeing pair had passed. As the cars met, Talent was standing on the running board with his gun drawn on the driver of the stolen car, was thrown to the ground and the car caused by his falling discharged the gun. The bullet entered the left side of the driver about three inches below the shoulder blade, a little above the heart.

Louisignot kept on driving his car for a distance of 42 paces after he had received the fatal wound and then brought the car to a stop beside the road. He stepped from the car into the road and walked back toward his pursuers. Talent shouted to him to stop or he would shoot again, but Louisignot kept on approaching until he was within about three paces of them, when he fell to the ground.

Five shots were fired in all, the last one being the fatal one. At the Howell undertaking parlor the girl, in tears, told a sordid tale of her relations with the dead man. The pair had met while they were working in a hop yard at Grandview, Wash., two weeks ago, she said.

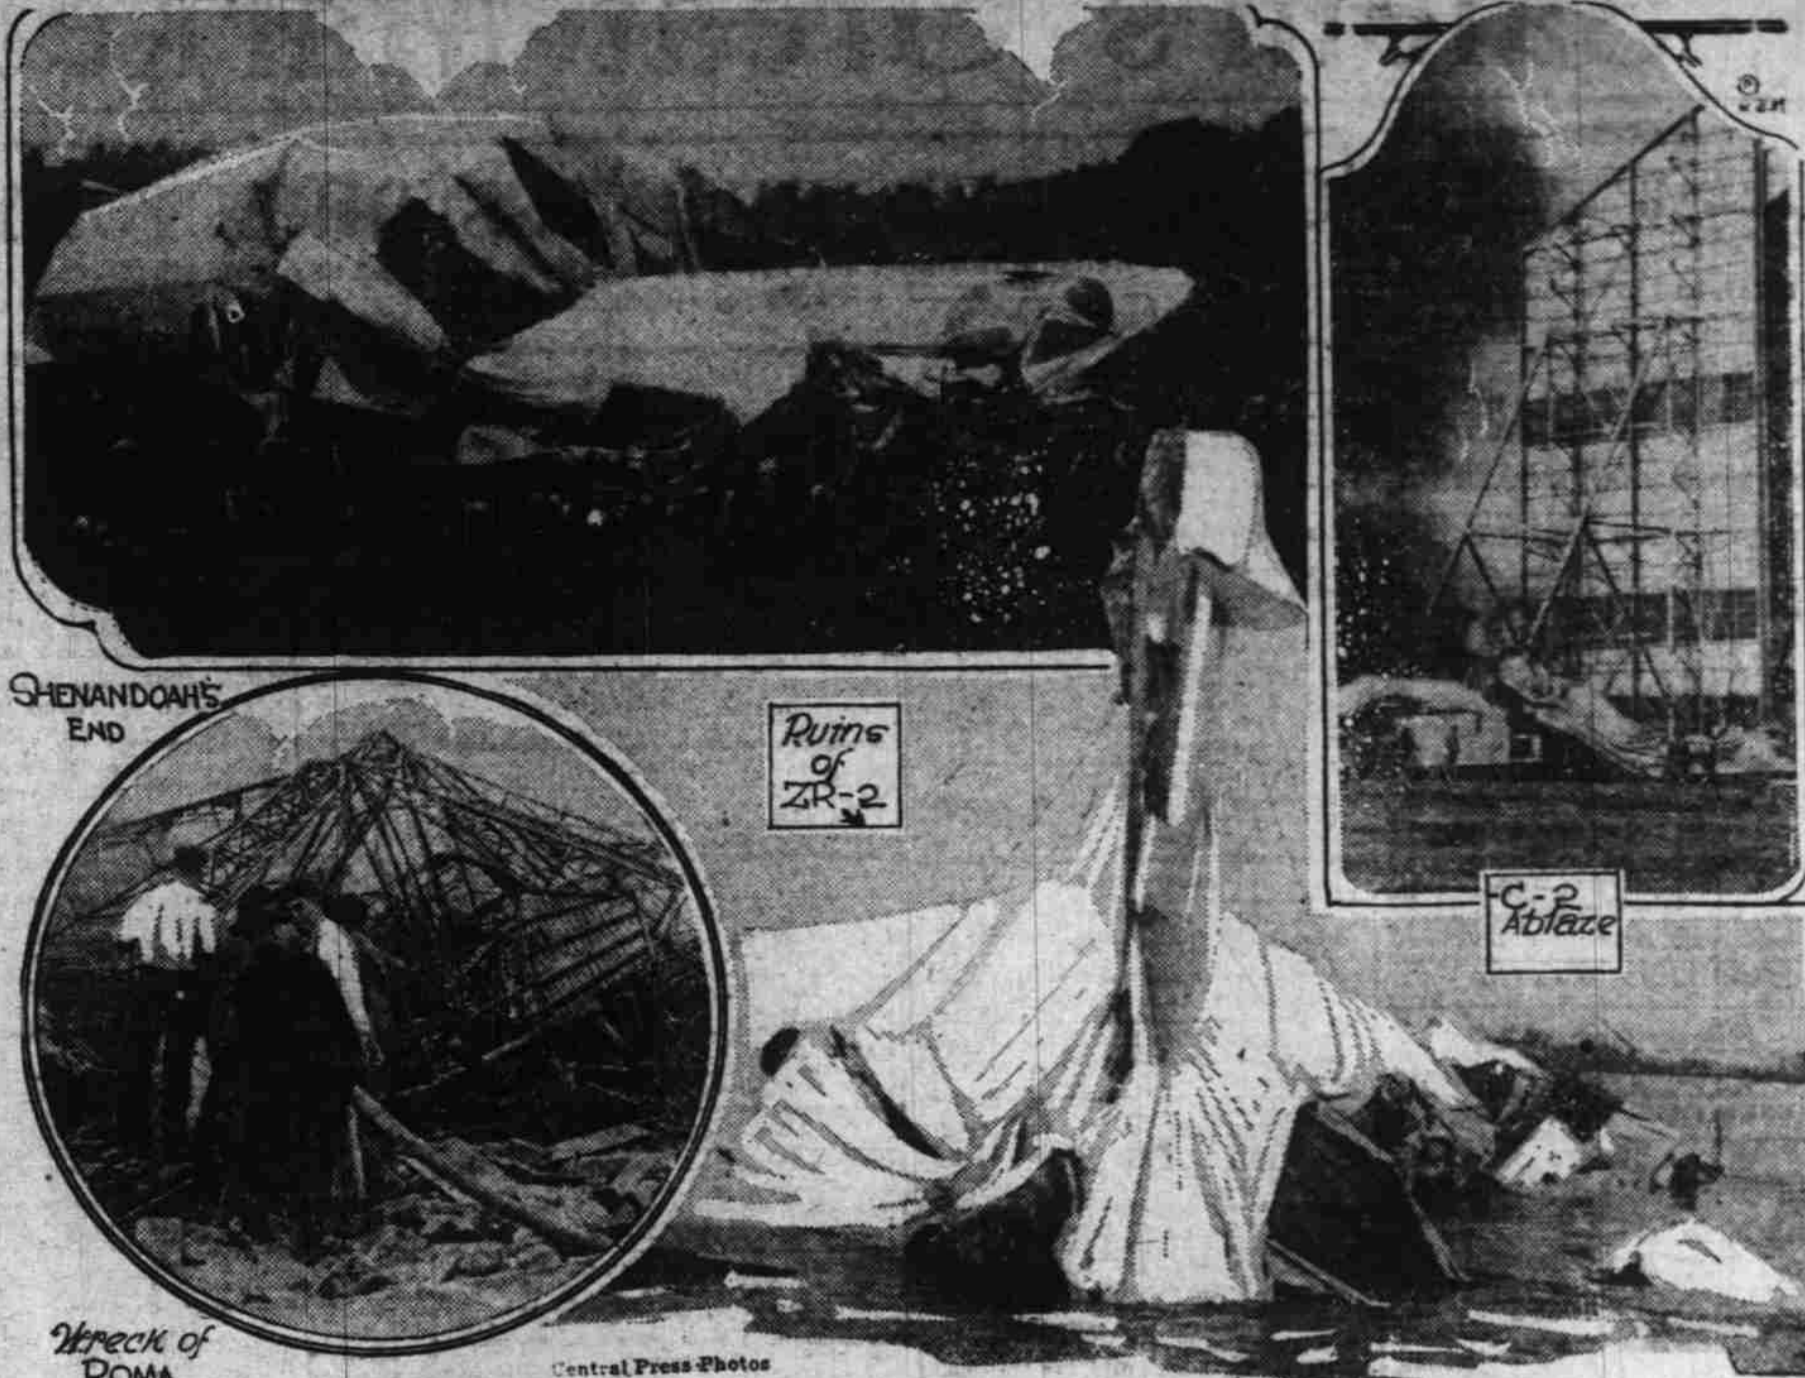

Telling the story of her association with the man, the girl said that she left Troy, Mont., where she has a sister, Mrs. Edith Edwards, and joined her parents two weeks ago in a hop yard at Grandview, Wash. Since she met Louisignot, the two had taken trips to several places, Cle Elum, Tacoma, Centralia, Yakima receiving mention. At Tacoma they had spent several nights and they had lived together in a Centralia rooming house. On their trip to Yakima, Louisignot had told her that he was going to marry her there, but he failed to do so. Following their excursion, Louisignot sold his car at Raymond, she said, for \$17.00.

Yesterday morning, the girl stated, the man told her that he was going to Raymond to buy a new car and they would go south to Albany where his mother is living. No woman by the name of Louisignot is known here.

The pair left Raymond about 9 o'clock yesterday morning and crossed the Columbia river into Oregon at Astoria. They journeyed to Portland where they headed south. They spent last night in the car, the girl said, a few miles north of Portland, because the car's tail light had burned out and they did not dare to drive and run the risk of detention.

The coroner's jury this afternoon returned a verdict completely exonerating Officer Talent and finding that he had shot the man while in the discharge of his duty. Members of the jury were C. C. Hall, Dennis Merrill, Glenn Junkin, O. T. Hockensmith, F. O. Carly and Ed Washburn.

Shenandoah Disaster Darkens U. S. War Aviation Development Outlook

United States' tragic experience with lighter-than-air craft, emphasized now by the Shenandoah disaster, darkens the outlook for new war aviation ventures in this country. Congress is expected to be reluctant to provide money for further experiments. Fatal terminations of the careers of the Roma, ZR-2 and Shenandoah are seen above. Also shown is the end of the C-2, largest army blimp.

driven by Philip Yagelski, who was accompanied by Wayne Overholzer, the impact caused him to pull the trigger and threw him from the running board. Talent was standing with the door of the car open and one foot on the running board, pointing the gun at Louisignot. He stated that he was pointing the gun at about five feet from Louisignot.

Mr. Chaney, as did Talent, described the chase and the incidents leading up to the shooting. He added that Talent has a good reputation, confirmed Talent's statement that he had never carried a gun before this month, and that the officer had often been chided about failing to protect himself with a weapon, and added that he was patient and not hasty in his action with prisoners. Talent has been on the state force about two years.

Wayne Overholzer told of hearing a shot behind the car he was in, of the Louisignot car passing them on the right side, of the Chaney car striking the Ford, the shot of Louisignot's rolling out of his car and walking towards the officer before he finally dropped.

Yagelski told about the same story. Dr. B. R. Wallace, who performed the post mortem examination, testified that the shot entered the abdomen between the fourth and fifth ribs at the left side of the back, then ranged down, penetrating the diaphragm and into the abdomen just behind the stomach, through the right lobe of the liver and hit the right kidney, cutting off the arteries to the kidney, causing fully a gallon of blood to seep into the abdomen and caused unconsciousness within a short time.

Talent had testified that Louisignot walked 15 steps towards him before the wounded man fell. Genia Owen, tear-stained, bob-haired girl with blue eyes, reiterated her story of her meeting Louisignot at Grandview, Wash. She gave her age as 18 and said that Louisignot was 38. However, examination of the dead man showed him to be at least 50 years old. She said that after working in the hop fields at Grandview she left with Louisignot and traveled over Washington in a Star bug. They went to Cle Elum, Wash., and Monday morning at Raymond, Wash., the Star car which caused the shooting was secured. They crossed the Columbia river at Astoria about 3:35 yesterday afternoon and spent the night in the car about 30 miles north of Portland. She testified to staying in hotels with the man while in Washington.

She claims not to know that the car was stolen. She insisted that she told the man to stop after the officers started the chase because she did not want to drive so fast. She had previously told the officers that Louisignot asked her to leave the car and get away when they turned off of the highway.

20 FOOT FALL FATAL.

SPOKANE, Sept. 15.—An unidentified man was killed by a fall through an opening in the floor of a vacant brewery here late today. Railroad workers nearby saw him enter the building and were attracted to the place by his moans later. He had fallen down a 20-foot shaft. He died a few minutes after he was taken to the hospital.

A heavy surf along oceanic shores causes vibration in the earth that are registered by seismographs hundreds of miles inland.

SWITCHING PLANT NEARS COMPLETION

West Salem to Witness Opening of New Equipment Later in Week

The new \$75,000 switching plant at West Salem which has been in the process of construction since August 24, will be completed some time this week, it was predicted yesterday. It is expected that the plant will be in full operation by October 10. The station will be outside of Portland, and is being supplied with the very latest equipment.

A concrete station built beside the 13 towers that compose the station is being prepared to house a huge storage battery that will be kept constantly charged for use in case of emergencies.

Within a week the line of the Mountain States Power company, which will use the station, will be in active use. The line, which will run to Dallas, will form a connecting link in a complete line owned by the company some 2700 miles in length, and running from Montana to Reno, Nevada.

The station itself covers an area measuring 50 by 100 feet, and has been laid out with a view to increasing the size by 100 per cent when need arises.

CROSSLEY IS CANDIDATE EX-SERVICE MAN WOULD BE REPUBLICAN SENATOR

James J. Crossley of Portland has announced his candidacy for the republican nomination for United States senator at the May primaries. The candidate was raised on an Iowa farm, educated in the public schools of that state and later took a post-graduate course at Yale. He saw national guard and Mexican border service and spent 29 months overseas with the Rainbow division, participating in the Champagne and Oise-Aisne offensives. Mr. Crossley served four years as county school superintendent; five sessions in the state senate and six and one-half years as United States attorney under Roosevelt and Taft.

BREEDERS WILL MEET STATE LIVESTOCK MEN IN SESSION DURING FAIR

The Oregon Pure Bred Live Stock Association will hold its regular annual meeting on the State Fair grounds, Wednesday, Sept. 30 at eight o'clock P. M., holding forth in the assembly room of the Boys and Girls new club building.

At this meeting announcements will be made regarding the annual banquet which will occur the following evening. The visiting judges have all had urgent invitations to attend these meetings and some of them have already signified their intention to do so. Their presence and participation will aid materially in making the meetings interesting and profitable and every member who possibly can should attend and bring with him one or more new members. If each member will thus take an active interest in the membership and strength of the association will be maintained and its usefulness perpetuated.

RICKEY RESIDENTS TO RECEIVE POWER

Electric Line Serving Fourteen Families Will Be Constructed Soon

A new electric line to serve at the start 14 customers in the Rickey district is to be constructed soon, it was announced yesterday by the Portland Electric Power company. The line extends 2 1/2 miles on route 5, running from the Meadowlawn dairy onto the Macleay road and passing the Rickey schoolhouse. For the time the school will not be connected on the line.

Each of the customers is required by the company to put up \$108 to cover part of the cost of the extension. The policy of the company provides that it put up \$60 per customer and that the remainder of the cost of an extension is paid by the consumers. A refund is later to be made to the present contributors as soon as more customers are secured for the line. The meter charge in the country is the same as that in the city, but patrons on the Rickey line will be required to pay \$1.08 as a flat rate per month to cover the cost of upkeep and losses through transmission.

Present customers on the line are A. A. Hager, A. W. Binegar, C. A. Warner, George Edwards, G. Messerli, W. H. Humphreys, Jr., W. J. Culver, county road master, H. D. McMillan, D. A. Harris, O. E. Fryselle, D. B. Maxfield, T. D. Wallace, William Sheridan and A. B. Steinke.

SIX PRISONERS ESCAPE FROM JAIL IN SEATTLE

(Continued from page 1)
description of the men tallied with Ward and Kilbourne. A posse speeded to the wooded region. Deputy Sheriff Riley and August Rosenfeldt, a fingerprint expert, were returning Kilbourne to a large cell called tank No. 2 after he had had a finger treated, when Kilbourne backed suddenly against the door of the cell holding it open for the others to come out. Kilbourne was shot in a hand in the Bothell robbery. The six then put Riley and Rosenfeldt in the tank and trooped into the jailer's office, where they held up Head Jailer Morgan and two oth-

era. These men were forced into tank No. 2. The prisoners then escaped by a rear entrance, driving away in the automobile.

Universal Heaters

Combination Fuel and Air Blast Heaters

Every One a Money Saver

The Palace Universal

Needs no introduction in this vicinity. It embodies all the conveniences and qualities of a good wood heater. Several distinct styles and sizes made.

LARGE DOORS—HEAVY HIGH LINING

The whole line of Universals invite your inspection. Don't buy that heater until you see these stoves—you will save money.

Universal Air Blast Heater

This is a well-built heating stove embodying the Universal "Air-Blast system" by means of which coal gasses and smoke are converted into heat. It burns coal, wood, bark, coke and briquettes. Holds fire a long time, and heats the floor as well as the upper portion of the room.

ECONOMICAL, ATTRACTIVE AND EFFICIENT
