of the car, both fenders, the running board, and crashing in a part of the body.
 Reports of the accident indicated that the driver of the other car was drunk. He did not stop to examine the damage he had done but increased his speed and fled down the highway. A trunk, torn from the side of the other car, from which personal belongings were distributed for yards down the highway, furnished the name of C. A. Robinson. The directory of the state automobile department shows that a car is licensed to Robinson and that his home is in Portland.
 The accident was investigated by State Traffic Officer Reinhard, and William Walsh, special officer of the local police department.

FORD EMPLOYEES FIRED
WORKMEN CAUSE DELAY IN FITTING NEW MODELS
 DETROIT, Sept. 15.—(By Associated Press.)—The Detroit Free Press tomorrow morning will say that an effort of employees at the Ford Motor company to improve upon methods of Henry Ford caused a delay of two weeks in the production of the new model automobiles of the company. The story says that Henry Ford previously insisted that all parts be worked out in wood before being made into metal to insure perfect fitting.
 This time, according to the story, several Ford employees, without consulting any one decided to work direct from the blueprints and for this reason it was impossible to fit together machines shipped to Ford assembling plants throughout the country.
 Officials of the Ford company, it is stated, refuse to comment on an article yesterday in the Wall Street Journal asserting that the two weeks delay had cost the company \$5,000,000. It was denied that there had been any wholesale dismissal of employes as a result of the error and also
