## Look On The Inside of the Bridge-Beach Superior Circulator

*It is built like a furnace  
—a stove within a stove*  
Will heat three or  
four adjoining rooms

The cold air enters at the bottom, is heated and humidified between the fire-pot and the outer casing—and passes out through the top, CIRCULATING the warm, moist, healthful air to the most distant corners of the adjoining rooms. Has wonderful heating capacity—will heat three or four rooms comfortably in the coldest weather—takes the place of several stoves and requires no more fuel than an ordinary heater. The price is less than you would expect for a heating stove of such outstanding superiority. Shown in various finishes—the mahogany enameled finish is especially popular.

Sold in Salem only by **The Giese Powers Furniture Co.**

# \$5.00
