

### CURRENT NEWS OF THE INDIAN SCHOOL

#### Where Original Americans Are Given Chances to Be Useful Americans

(The following items are taken from this week's copy of the Chemawa American, the paper published at the Salem United States Indian training school.)

Miss Barbara Burland of Rochester, N. Y., has entered on duty as head nurse at Chemawa.

Mr. Jean K. Stacey is our senior high school teacher. He comes to us with no little experience and is starting out well with his classes.

The sophies are honored much in having Mrs. Hilt as an English teacher. We greatly appreciate her teaching. We are studying from a textbook used at O. A. C.

Percy Woodcock spent the summer at his home in South Bend, Washington. Percy worked on the railroad and the juniors expect him to be a great help in making things run.

Charles Moon returned on Saturday and added his "force" to the mighty juniors. Charles home is in Nome, Alaska, but he spent the summer working in the hay fields in eastern Oregon.

Alex Petellin, an Alaskan boy and a graduate of Chemawa class of '22, is enrolled as a student at the Oregon Agricultural college, Corvallis. Alex is a good boy and we wish him every success.

Clifford McCloud did not return to his home in Montana this summer, but worked in a sawmill in Washington. He returned to Chemawa on Friday and received a hearty welcome from his classmates.

Raymond Barnes recently climbed to the top of our 100-foot flag pole and passed a new rope through the pulley for raising and lowering the "Stars and Stripes". This climb demonstrated that Raymond is not "light headed."

The sophomore class made two houses for the state fair. One represents the health house, the other the unhealth house; they are a demonstration for health. The houses were made by Raymond Jones, Jacob Atkins and Walter Metroken.

Mrs. Gertrude A. Turney, our music teacher, received first prize at the Oregon state fair for excellence in an oil painting which she exhibited. She has received a premium on her work in painting for some years at the state fair in competition with hundreds of other exhibitors.

Domestic Science Notes  
Tuesday evening of last week the vocational domestic science classes prepared and served a dinner for Congressman Cramton and his party. Although we had short notice, we hear the dinner was up to the usual high standard.

This year there are only three high school students but we have a Willamette university student, so we are still making lunches. This week Iva Dupont, Oxenia Hendrickson and Emily Ivanoff are taking care of the lunches.

Chemawa at the Fair  
The Oregon state fair was larger and better this year than ever before and the same can be said with emphasis of Chemawa's participation in the fair. It is never the intention of Supt. Hall to anything by halves—it is the whole thing or nothing with him—so our readers can safely assume that our exhibit was immense. Thousands upon thousands of people passed by our large array of booths and commented upon the marvelous display in evidence—domestic art, domestic science, nursing, farm products, carpentry, tailoring, painting, printing, machine shop, blacksmithing, and other departments of a vocational character, to which must be added work from the academic building, all contributor to the glory of our great school on this occasion.

### Kills Catarrh Germ in Three Minutes

Chronic catarrh, no matter how bad, and cases of bronchial catarrh now yield instantly to the surprising discovery of a French scientist. This drugless method called Laver kills the germ in three minutes, yet is positively harmless to the most delicate tissues. Your head and lungs are cleared like magic. Sufferers are relieved in a single night.

To prove it and to introduce Laver to a million sufferers in one month, I offer to send a treatment free and postpaid, to any one who will write for it. No obligation. No cost. If it cures you, you can repay the favor by telling your friends—if not, the loss is mine. No matter what you have tried, send me your name and address for this generous free treatment and prove that you can be rid of catarrh.

W. R. SMITH, 6028 Laver Bldg., Kansas City, Mo.

Jersey City, N. J.—"For years my skin would break out every once in a while, and ointments did very little to help me," writes Robert Koenig. "I read a doctor's article stating that pimply skin usually comes from the stomach—and bowels not getting rid of the poisons. I tried Carter's Little Liver Pills for a few days—and since that time my skin is smooth and clear. Now I tell my friends the right way of getting rid of a broken out skin—and also of steering clear of upset stomach and sick headache. Carter's are all you claim for them." At all Druggists. Adv.

During the afternoons of the week a fine musical program was given by the pupils of Mrs. Turney, solos, quartets and octettes (all vocal), and by the school orchestra. The various singers of Mrs. Turney certainly did well from every point of view and were the recipients of much enthusiastic praise, while the work of the orchestra was well received and added largely to the occasion. We believe that our singers are better this year than ever before and the same may be said of our orchestra—at least thousands of fair visitors said so.

We believe that Supt. Hall and all of his co-workers at the fair should be happy over their great success. We understand that they are, too.

### ASPIRIN BRACES UP FLOWERS

Experiments have confirmed the fact that cut flowers may be prevented from fading by giving them an aspirin tablet. The experiments were conducted with chrysanthemums. The treated blooms outlasted the untreated by three days. Flowers which were badly wilted were given fresh water and an aspirin tablet. They revived in two hours, looking as fresh as they did when picked. The leaves, however, remained wilted. The aspirin acts as an antiseptic, interfering with the enzyme which causes the clogging of the stem at its cut surface.

### DEATH NEAR OMAHA OF ARTHUR E. HUNT

#### The Family Lived in Salem, and the Hunt Boys Still Call Salem Home

Arthur Elester Hunt died at the home of his daughter, Mrs. R. C. Harris, near Omaha, Neb. Friday, September 25, aged 77 years.

Over 50 years ago he settled on a farm near Republican City, Neb. Later he moved to Belvidere, Neb., where he was engaged in the grain business for over 20 years.

In 1880 he was married to Clara W. Hole. To this union two children were born: William, who died in infancy and Alice M. Harris. In 1889 death claimed his wife. In 1898 he was married to Eva M. Winter. This union was blessed with two sons, Harlan A. and Carson E. Hunt, both of Omaha, Neb. In May, 1920, his second wife died, and since her death he had made his home with his daughter, Mrs. R. C. Harris.

He leaves to mourn his loss in addition to his children, four grand children, a brother, Wallace A. Hunt of Republican City, Neb., a number of cousins and other relatives, many of whom live in the east.

Both Harlan A. and Carson E. Hunt still look on Salem as home. Harlan attended high school and Willamette university here, and Carson attended high school.

Their father was quite well known here, and the mother was active in the work of the First Methodist church of Salem.

They bought the home at 1450 Court street, and lived in Salem about 10 years, from 1910 to 1919.

### REV. FERESHETIAN GOING TO CLEVELAND

#### Pastor of First Unitarian Church Is Guest of Laymen's League Here

Rev. Martin Fereshetian, minister of the First Unitarian church of Salem, will attend the General Unitarian conference to be held in Cleveland, October 13-15. Mr. Fereshetian has been invited to go by the Unitarian Laymen's league which is sharing the expense of the trip.

Ever since the organization of the Laymen's league in 1919 its program has been directed to-

ward upholding the hand of the ministry. In the summer of 1921 the first of a series of ministers' institutes was held at Harvard university. The following year Harvard and the University of Chicago were the centers to which the laymen invited their ministers. In 1923 the famous academy at Andover, Mass., was the setting. Last year the ministers took over the management of the institute. The Laymen's league making an appropriation which reduced the cost to all who were present and enabled some to attend who felt that neither they nor their churches could bear the entire cost.

This year the Cleveland meetings of the General conference suggest the opportunity for the laymen to make possible a large attendance of their ministers at a great denominational gathering. A dozen Unitarian leaders are on the program, which also includes Dr. S. E. Parkes Cadman, president of the Federal Council of the Churches of Christ in America; Rev. John Haynes Holmes of the Community Church, New York City; Karl de Schweinfelt, social service expert, of Philadelphia; and Prof. W. T. Waugh of the department of history of McGill university, Montreal.

### HUNDRED THOUSAND BUSINESS IN YEAR

#### The Smart Shop Books Show Big Volume of Trade in Twelve Months

Lester Schlosberg opened the Smart Shop, at 115 North Liberty street, on July 31st, 1924.

His books show that he did a business of over \$100,000 the first year; that is, that he sold goods in that volume.

He contends that in doing this he took no trade away from any Salem merchant, but that he took nearly all his trade away from Portland merchants. He was in business in Portland before coming to Salem, and he has done a larger business here than he did in the metropolis. He is naturally a Salem booster.

His receipts in his Salem store have been as high as \$1300 in one day.

He carries millinery and ladies' ready-to-wear goods. In the month of September the receipts of the Smart Shop were over \$13,000. Mr. Schlosberg says he is obliged to carry a stock of about double the value of a month's trade, in order to have a proper assortment.

### THE TUBERCULOSIS TESTING IN MARION

#### Working to Stamp Out the Scourge From Cows of This Section

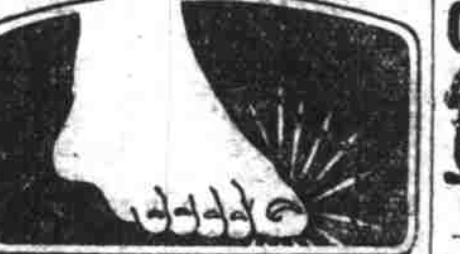

QUINABY, Or., Oct. 10.—Dr. Fred W. Lange, veterinarian of Salem, has been engaged for the past week in the vicinity of Quinaby testing cows for tuberculosis, under the ruling that went into effect this year. There are six men working throughout the county, but single-handed, Dr. Lange has given the test to 2500 animals since June. The operation consists of placing a drop of vaccine or serum beneath the skin of the animal by means of a hypodermic needle and clamping a metal tag upon its ear to indicate that the work has been done, and for future identification. This sounds somewhat simple, but only those who have attempted to "doctor" animals know that it is some feat to accomplish this without loss of life or limb to the operator. Dr. Lange works with lightning-like rapidity, and had he chosen a regular course in materia medica there is little doubt that his skill would have equalled the celebrated Mayo brothers of Rochester, who remove their appendix in 15 minutes and send you home in three days, because "they know where to cut," they say, and are not in favor of "prolonging the misery." But Dr. Lange knew that there were many skilled doctors and surgeons for human beings, while animals numbering many thousands annually, of great value intrinsically and priceless to the

### Silverton

SILVERTON, Oct. 10.—(Special to The Statesman.)—The Brush Creek and Paradise road communities which have been in a game preserve for the past three years, announce that they will remain in the preserve again this season. The land owners of these two districts report that a few years ago outside hunters overran the land here without as much as asking permission from the owners; that these same hunters were not particular if they trampled down a field of corn, kale or anything else which might be in their way. That they often shot around farm buildings and that if domestic poultry came in the way of the shot, the hunters seemed to think that this was as good as wild game. Another thing the landowners objected to was that there were never any pheasants left for them to hunt when they got the

### INGROWN NAIL

#### Turns Right Out Itself

A few drops of "Outgro" in the crevice of the ingrowing nail reduces inflammation and pain and so toughens the tender, sensitive skin underneath the toe nail, that it can not penetrate the flesh, and the nail turns naturally outward almost overnight.

"Outgro" is a harmless antiseptic manufactured for chiropodists. However, anyone can buy from the drug store a tiny bottle containing directions.—Adv.

owners who loved them, go down to death because there has been no one at hand to do the helpful thing that might have spared their lives. And so he took up this profession, which stands higher every year not only to those who hate to lose the money value of an animal, but to the great part of the world known as humane people. Without training there are few who can remove a bone from a dog's throat, give him an antidote for poison or set a broken bone.

Outstanding among his qualifications as a surgeon is his extreme kindness and his love for animals. In this connection it may be mentioned that Dr. Lange and Dr. W. G. Morehouse, with whom he is associated, are strongly opposed to the brutal practice that has begun in Salem, as well as elsewhere, of trimming dogs' ears. That this cruelty, as well as the more prevalent one of cutting off dog's tails, will come up before the legislature is the hope of the Humane society, who seek preventive measures, since prevailing horror of the practice has not seemed sufficient to abate it.
