SEVENTY-FIFTH YEAR

SALEM, OREGON, THURSDAY MORNING, DECEMBER 31, 1925

PRICE FIVE CENTS

CLIMATIC CHANGE IN NORTH IS FORECAST

Eruption of Mount McKinley Said to Promise Radical Permanent Change

TEMPERATURE IS HIGHER

Previous Volcanic Outbreaks Believed to Have Been Responsible for Present Spring Weather

ANCHORAGE, Alaska, Dec. 30.—(By Associated Press.)—The return of volcanic activity to North America's loftiest peak, Mount McKinley, 20,300 feet high, indicated by the volume of smoke and steam arising from the mountain, which has been reported yesterday, is one of a series of volcanic phenomena in which many observers today saw a promise of radical permanent climatic changes for the southern part of Alaska.

Since Mount Shishaldin in the Aleutian Islands, 800 miles southwest of McKinley, erupted November 14, this region has experienced a springlike November and December unparalleled in the memory of the oldest inhabitants. Streams, usually frozen at this season, have remained open and in places the usual snowbound landscape is green vegetation. The affected area covers several hundred square miles, all along Cook Inlet to the northwest of which Mount McKinley rises, and far up into the valley of the Sushitna river. Anchorage had a Fahrenheit temperature of 28 degrees above, Christmas day, when the mercury usually is around zero.

Mount McKinley's smoking appears to mean a shifting northward of Alaska's volcanic activity, which hitherto has centered in the southern end of the Alaskan range, of which McKinley is a northern outpost.

The greatest recent outburst was in 1912, when Mount Katmai blew off its three mile wide cap and the Valley of the Ten Thousand Smokes came into being. A year ago Mount Pavloff erupted and last month Mount Shishaldin followed suit. The eruptions were accompanied by earthquakes and climatic changes. Since the Shishaldin blowoff, the warm air from Cook Inlet's heated waters has caused considerable melting of large glaciers.

Observers believe that subterranean fires are growing their way northward, producing temperatures below the ocean surface which like the Gulf Stream and Cape Current cast their warming influence inland.

Geologists consider these forces similar to those which ago ago submerged the land between North America and Europe, and which caused many think the banishment of the former bitter waters from this part of Alaska may be permanent.

Immense billows of steam issuing from the saddle between Mount McKinley's topmost peak and the lesser one to the north were plainly visible from Broad Pass on the Alaska railroad, Conductor F. Knight said today on his arrival here with the train.

The earthquake which occurred December 22, tossed sleepers about in their beds and was the most severe in years, was the report here today from Curry, about 35 miles southeast of the mountain. It is believed that a heavy displacement in the Alaskan range has opened a steam vent in the vicinity of the peak.

Clouds surrounding the mountain shut off a view of the peak from here today.

AUTO THIEF SENTENCED

GETS ONE YEAR AND HALF IN FEDERAL PENITENTIARY

SPOKANE, Dec. 30.—(By Associated Press.)—Lawrence Dunn, alias William Berry, was sentenced today to a year and six months in McNeil Island federal penitentiary when he pleaded guilty before United States District Judge J. Stanley Webster here today on a charge of transporting stolen automobiles from one state to another. He was arrested in Chicago some ten days ago after having broken jail in Coeur D'Alene, Idaho.

His wife, Lydia Dunn or Marlon Berry, entered a plea of guilty but asked that her sentence be deferred until tomorrow. Perry Scott, alias Perry Lewis, held on the same charge, also will be arraigned tomorrow.

The federal authorities allege that these defendants have been engaged in an extensive traffic of stolen automobiles over the Pacific northwest.

CRASH VICTIM MAY DIE

PORTLANDER PLUNGES OVER TERWILLIGER DRIVE

PORTLAND, Dec. 30.—(By Associated Press.)—Robert Gilles, 32, of Portland, suffered injuries which physicians said might prove fatal, when his automobile which he was driving plunged over a 10-foot cliff on Terwilliger boulevard, on the heights south west of this city. The accident was said to have been due to a broken steering post.

RADIO TO CARRY GAME

EAST-WEST CLASSIC TO BE PUT ON AIR

LOS ANGELES, Dec. 30.—(By Associated Press.)—What is believed to be the first play by play radio relay of a football game west of the Rockies will be given in the wireless report of the Alabama-Washington game New Year's day in the Rose Bowl at Pasadena when KFI, Los Angeles, will relay the description of the game to KPO, San Francisco, by telephone. The two station relay will make certain that the Washington fans will be able to follow their team in the contest. KFI officials said in announcing the relay plans. The stations will go on the air at 2 p. m., Pacific time.

LIQUOR RUNNERS FROM ENGLAND LOSE HEAVILY

SHIPMENT TO UNITED STATES PROVING DEAD LOSS

Sir Broderick Hartwell, Titled Rum Runner, Files for Bankruptcy

LONDON, Dec. 30.—(By Associated Press.)—Many of the seven hundred investors who took a flier in liquor running got little comfort out of a statement which Sir Broderick Hartwell, England's titled rum runner, made today at a meeting of his creditors. Sir Broderick appeared in the bankruptcy court. He declared his liabilities as 250,000 pounds sterling (\$1,200,000) and said that his only assets were amounts due from dealers who got the liquor in the United States and who apparently never would pay him.

His final shipment to the United States he asserted, alone was worth 250,000 pounds sterling, but his partner and the dealers to whom the liquor was turned over never paid him a cent.

The baronet said he met an American in 1923 who induced him to ship him liquor to the United States. Eventually several shipments were made in September 1924 the seventh and last shipment containing 56,000 cases of proprietary brands of whiskey was dispatched.

Pessimistic reports about the weather and the activities of prohibition officers reached him; then came the report from the captain that the ship's crew was in mutiny and that he had put into Halifax. Later he was advised that the liquor had been transferred to smaller ships and that 350 cases had been seized by prohibition officers.

The creditors gloomily passed a resolution for bankruptcy and adjourned for the appointment of a trustee.

42 BODIES RECOVERED

COAL MINE EXPLOSION IN MEXICO TAKES TOLL

EAGLE PASS, Texas, Dec. 30.—(By Associated Press.)—Forty-two bodies, many badly mangled, have been brought out of a Mexican National railway coal mine at Palan, state of Coahuila where an explosion occurred Saturday.

News of the disaster reached here by courier and last reports this afternoon were that other dead probably were in the mine. A score of miners seriously injured have been accounted for.

The blast is supposed to have been caused by the breaking of a miner's safety lamp, which ignited gas in the mine. Palen is about 85 miles from Eagle Pass.

MAN KILLS WIFE, SELF

SHOOTING SAID TO HAVE FOLLOWED FAMILY ROW

SPOKANE, Dec. 30.—(By Associated Press.)—A. Richie Bruno a lumberjack, shot and killed his wife, Maggie and then ended his own life in their room in a hotel here tonight. After an investigation, police declared the shooting followed a family quarrel. John Johnson, a roomer at the hotel, told police that he heard Bruno shout to his wife, "I'm going to kill you." He said he heard Mrs. Bruno say, "Go ahead and kill yourself too for all of me." Johnson told police that two shots followed.

When police entered the room a few minutes later both were dead.

Both were about 35 years old.

SUNDAY SPORTS UPHELD

BISHOP MANNING SEES NO HARM IN ATHLETICS

NEW YORK, Dec. 30.—(By Associated Press.)—Bishop William T. Manning, speaking today before the convention of the National Collegiate association approved the playing of golf and tennis on Sunday, provided they do not take the place of proper religious duties. He said he could see no reason why a well played game of polo or football is not just as pleasing to God as a beautiful service in a cathedral.

He told of plans to have sculptures of polo ponies, football players and figures representing other forms of athletics in the "sports day" to be included in the completed cathedral of St. John the Divine.

MILL EXPERTS BUY EASTERN MACHINERY

Oregon Linen Group Saves \$50,000 by Taking Secondhand Equipment

ALDRED NAMED MANAGER

Foreign Purchases May Total \$100,000; 15 Freight Cars and Two Months Required for Shipment to Salem

Purchase of the machinery from the linen mill at Lockport, New York, was completed yesterday by the directors of the new Oregon Linen Mills, Inc., when they wired the amount of \$25,000 to the eastern company, in full payment of the machinery.

Although the machinery is secondhand, agents of the Oregon company have inspected it thoroughly and found it to be in excellent condition. By purchasing this machinery, the directors were able to save about \$50,000, as it is said the same amount of machinery new would cost in the neighborhood of \$80,000.

The Oregon company took over the option on the machinery from J. J. Aldred. Aldred has been made manager of the Oregon plant and agreed to turn over the option without commission to himself.

Tuesday Aldred paid down \$5,000 to assure the purchase, and wiring of the entire sum yesterday means that action has been definitely placed under way for the erection of the Oregon mill.

Included in the machinery purchased from the Lockport plant are 55 individual drive motors, 116 looms and several units of finishing machinery. The machinery also includes a complete bleaching plant. It is estimated that 15 freight cars will be required to transport the machinery from the eastern plant to Salem.

Preparing and spinning machinery for the Oregon plant is to be purchased in Europe. The best of machinery is to be obtained. It is estimated that this machinery will cost between \$90,000 and \$100,000. This price includes the duty.

J. J. Aldred will start immediately to prepare the shipment of the machinery to Salem. He will direct the disassembly and the crating of the machinery. It is expected that about two months will be required for disassembling and crating.

Site for the new mill has not yet been decided. It is the belief of the board that the most important object at present is to obtain the proper equipment. Besides the building to house the mill will be fashioned to fit the machinery. The site will be chosen with the idea of getting the location best suited for the type of building decided upon.

RACER IS DIVORCED

SEATTLE, Dec. 30.—Joseph A. Thomas, auto racer, here today obtained a final decree of divorce from Gladys Thomas. They were married in Los Angeles in January, 1918.

BASL BROTHERS JAILED FOLLOWING QUICK RAID

ONE CHARGED WITH THREATENING OFFICER WITH GUN

Both Are Held for Possession and Sale of Intoxicating Beverages

Prompt action on the part of State Agents R. E. Amy and C. B. Hill last night prevented a possibly serious shooting affray when William Basl, alleged liquor handler, drew a gun upon the state men when they attempted an arrest.

Late yesterday afternoon the two state officers and Deputy Sheriff Roy Bremmer approached the Basl place, about five miles south of Sublimity. Amy and Hill, though strangers to the Basls, are said to have negotiated for the purchase of three gallons of liquor. Deputy Sheriff Roy Bremmer, who has made several notable arrests in the Sublimity district, remained out of sight, being too well known.

Their suspicions lulled, Ben Basl is said to have made a short trip to the woods near his home and returned with the three glass containers of liquor.

As the liquor was placed on the ground, Agent Amy started to place the brothers under arrest. With a quick motion Basl is alleged to have drawn a .38-caliber revolver and covered the officers.

State Agent Hill, standing near Basl, made a lunge for the Sublimity man and swept his gun down. Agent Amy, in the meantime, had drawn his own weapon and in the ensuing struggle struck Basl a slight blow on the head before he would submit, inflicting a small scalp wound.

While the two agents were engaged in the brief struggle with the prisoners, Mrs. W. Basl, mother of the two men, seized the liquor and attempted to remove it but was prevented by Deputy Sheriff Bremmer and Agent Hill.

The two brothers were lodged in the Marion county jail facing charges of possession and sale of liquor. In addition, William Basl faces the serious charge of threatening an officer with a deadly weapon and resisting arrest.

State Agents Amy and Hill are concluding a series of successful arrests in this district, operating under the direction of State Prohibition Director William Levens.

Officer Amy is well known as the police officer who several years ago made a single-handed arrest of the notorious Burns and Smith following their successful robbery of the bank at St. Paul, C. B. "Charley" Hill, for 14 years was a member of the inspector's office, Portland police department.

POLICEMEN OFFER BLOOD

LEADER IN RECALL MOVEMENT OFFERED AID

SPOKANE, Dec. 30.—(By Associated Press.)—Twenty Spokane policemen today offered their blood if it is needed to save the life of Rev. C. A. Rexroad, a leader in the movement here to recall Commissioner Charles Hedger of the city department of public safety. Mr. Rexroad is in a local hospital suffering from stomach trouble. Commissioner Hedger commended the action of the officers.

PATTERSON SENTENCE IS UPHELD BY COURT

UNDER SENTENCE FOR EMBEZZLEMENT OF \$34,500

Fear of Prosecution Held Not Sufficient to Excuse Him From Guilt

The state supreme court, in an opinion written by Justice Burnett yesterday, affirmed the conviction of Earle E. Patterson, who is under penitentiary sentence for larceny by embezzlement of approximately \$34,500 from the Lumbermen's Trust company in Portland. The opinion affirmed Judge Louis P. Hewitt of the Multnomah county circuit court.

The records in the case showed that Patterson, while in the employ of the Hartman and Thompson bank in Portland, without authority of the officers or directors of the institution, gave the money that concern to an individual who failed to repay it.

To cover up his default it was alleged that Patterson borrowed from a man by the name of Osler the amount of \$3500 with which he made good his shortage. Patterson then accepted employment as cashier and teller of the Lumbermen's Trust company, and in this capacity was in full charge of the money in the institution.

"In time," the opinion read, "Osler, knowing of Patterson's shortcomings, applied to the defendant for money to be paid him out of the funds of the Lumbermen's Trust company, accompanying his demands with threats of exposure of the defendant's former offense. Complying with Osler's request from time to time, he accumulated a shortage of upwards of \$34,000.

"The only question in the case is the refusal of the trial court to sustain his theory that the fear of prosecution and exposure for his defaultation with the Hartman and Thompson company bank was sufficient to exonerate him from criminal intent and so work out his acquittal.

"The situation had its origin in the defendant's own voluntary shortcoming.

"The theory of the defendant is tantamount to saying that if a man steals enough to make him afraid of prosecution he should be excused. If the question were between Osler and the defendant in a civil suit on an issue of whether or not the money he paid to the former was a gift or a loan, it might be competent to introduce the threats of prosecution to rebut the contention of Osler that the money was a gift, but that is not the rule in criminal proceedings."

AMERICANS GOING NORTH

THOUSANDS TO CELEBRATE NEW YEAR'S IN CANADA

VANCOUVER, B. C., Dec. 30.—(By Associated Press.)—Thousands of Americans, coming from as far south as Los Angeles, were here today preparing to celebrate New Year's eve. In former years dancing downtown was confined to one large hotel, but in the past two or three years all the leading cafes, clubs, cabarets, and many hotels have made special arrangements to care for the large crowds.

SPIRITUAL ASPECT OF SCIENCE GIVEN

Contemplation of Wonders of Nature Is Said to Stimulate Intellect

THREE REALITIES VIEWED

Tiny Electron Declared to Coordinate "Chaotic Energy" of Universe; Electricity Is Keynote

KANSAS CITY, Mo., Dec. 30.—(By Associated Press.)—Great aid and evidence as have been the material services of science, there is another—spiritual, aesthetic, intellectual—which Dr. M. I. Pupin, president of American Association for the Advancement of Science, holds "is the noblest service of science to the human soul."

Contemplation of those wonders which men of science have revealed, stimulates man's intellectual and spiritual activity, he said today in a symposium on the role which science should play in education.

"During the last three centuries," he said, "science has revealed three distinct physical realities: the first through the science of matter in motion; the second through the science of electricity in motion, and the third through the science of cosmic energy in motion.

"Everything that moves and has its being in this boundless universe seems to be deriving its breath of existence from electrical forces which have their origin in tiny electrons—the unchangeable granules of that subtle substance which we call electricity.

"The book of Genesis, composed by a Moses of modern science," he continued, "would probably start as follows:

"In the beginning God said: 'Let electricity move and the embryo of the universe began to form.'"

"If the contemplation of this physical reality does not uplift the soul of man and stimulate his intellectual and aesthetic as well as spiritual activity, then St. Paul was in error when he said: 'We all with open face behold the glory of the Lord as changed in the same image from glory to glory.'"

"Each organic cell performs the miracle of coordinating 'chaotic energy' as do the man-planned engine and galvanic battery.

"Is there a guiding coordinator attached to each of these tiny organic cells, and if there is, does it operate in accordance with some intelligent design and purpose as is the case in the calorific engine and the galvanic cell?"

Burton E. Livingston, director of plant psychology of Johns Hopkins university, spoke of "the great relay of human evolution," urging heed for the preservation and dissemination of knowledge acquired by each successive generation.

DRUSE GENERAL KILLED

LEADER OF SYRIAN REBELS MEETS DEATH IN BATTLE

DAMASCUS, Syria, Dec. 30.—(By Associated Press.)—Hassan El-Kharrat, a former night watchman in Damascus, who was considered the leader of the Druse incursion which led to the French bombardment of Damascus on October 18 to 20, has been killed in the fighting outside the city.

Kharrat, who styled himself "Pasha," has played a romantic and at times a comic role in the Syrian revolt. His intimate knowledge of streets and alleys made him a useful leader in the revolutionary raids. He never interfered with the Christian population, and once he sent a sarcastic note to General Sarrail, the former French high commissioner, twitting him with responsibility for the sufferings of the Christians of Damascus.

NO AGREEMENT REACHED

MEETING OF COAL MINERS AND OPERATORS ADJOURNS

NEW YORK, Dec. 30.—(By Associated Press.)—The anthracite miners and operators' joint wage conference adjourned at midnight without reaching an agreement after being in session 41 hours. They will meet again tomorrow.

Arbitration, on which both sides are deadlocked, was again under consideration tonight, with some consideration of the check-off. Opinions were expressed by both sides that a wage contract can be negotiated at the present conference.

OREGON TEAM NAMED

HONOLULU, Dec. 30.—(By Associated Press.)—J. A. Heavens, sports promoter, announced that he is negotiating for the Washington high school football team of Portland, Ore., to play here at the close of next season.

MANY CROSS BORDER

VANCOUVER, B. C., Dec. 30.—Nearly 20,000 more persons entered British Columbia over the Pacific highway this year than last, figures show.

SIKI LEAVES BUT \$600

SENEGAL BOXER ONCE CONSIDERED WEALTHY

NEW YORK, Dec. 30.—(By Associated Press.)—"Batling" Siki, Senegalese boxer who once held the world's light heavyweight championship, left an estate of less than \$600, it was shown by papers filed today by the widow asking for letters of administration. During his ring career, Siki won what was regarded as a considerable fortune. He was found slain two weeks ago.

OLDER GENERATION TOO EASILY SHOCKED, SAID

SPIRIT OF MODERN YOUTH IS UPHELD BY MINISTER

"Shockability" of Parents Is Said Chief Difficulty in Youth Problem

PORTLAND, Ore., Dec. 30.—(By Associated Press.)—Confidence in youth of today was voiced by Dr. Harold Bowman, pastor of the First Presbyterian church of Portland, in an address on "plastic youth" delivered today before the meeting of the deans of women of the educational institutions of the state.

The meeting of the deans of women was one of 16 similar sessions held by various departments of the Oregon State Teachers' association.

The association will conclude its three day convention tomorrow.

"The chief difficulty in dealing with the problem of youth is the shockability of the older generation," declared Dr. Bowman. "If we can overcome this tendency on the part of parents to become shocked at everything their sons and daughters are doing and catch an understanding glimpse of the world by the things they are accomplishing, we shall be in a fair way to solve any problem that may exist."

Young people today are facing life with a frankness and a genuine desire for truth that exceeds any former generation, he said.

Dr. Ellwood P. Cubberly, dean of the school of education at Stanford university, lauded the results obtained by American schools in comparison with those of continental Europe. Stressing individual development instead of group action has greatly enhanced the self-reliance of the American he said.

Among the other speakers at the convention were Mrs. Mabel V. Wilson, president of the grade teachers' club in Seattle; Mrs. J. V. Hill, vice president of the national congress of parents and teachers; Cornelia J. Spencer, who retires as president of the association, delivered the annual address of the president.

BANK ROBBED BY TRIO

OVER \$20,000 IS TAKEN IN DAYLIGHT ROBBERY

KANSAS CITY, Mo., Dec. 30.—(By Associated Press.)—After locking 11 persons in a vault, three robbers today robbed the Argyle State bank at Thirteenth and McGee streets, a busy downtown corner, of \$20,624 and escaped.

The robbers entered the bank at 10 a. m. and ordered officials and employees and two customers into the record vault, scooped up the currency in the cages and, mingling with passersby on the street, disappeared.

Motorcycle Patrolman O. B. Flaherty is believed to have engaged the robbers in a running pistol fight. The officer attempted to stop a speeding automobile containing three men, shortly after the robbery and was fired upon. He pursued the car, firing at it until knocked from his machine by a bullet which struck the metal visor at his cap.

Police had found no trace of the robbers tonight.

SUNDAY WANTS LICENSE

FAMOUS EVANGELIST 'LOSES' TITLE CERTIFICATE

W. A. (Billy) Sunday, celebrated evangelist, is not immune from the difficulties that have been experienced by thousands of other persons in their desire to comply with the provisions of the so-called motor vehicle title registration law enacted at the 1925 session of the legislature.

The Rev. Mr. Sunday, after making a futile effort to locate his certificate of title to the family car, sent two affidavits to the secretary of state to the effect that the certificate had been lost and could not be located.

While investigating the records in the motor vehicle department yesterday it was discovered that the certificate had not been sent to Rev. Mr. Sunday and consequently had not been lost by him as alleged in his letters.

It will now be possible for the evangelist to obtain his 1925 license.

FRATERNITY ORGANIZES

SPOKANE, Dec. 30.—A Spokane alumni chapter of Sigma Delta Chi, national journalistic fraternity, was organized here tonight to include alumni of eastern Washington and northern Idaho. C. D. Hudson of Spokane was chosen president.

STREET CAR DIVES FROM SPAN, 4 DIE

Woman, Six Year Old Son, and Two Men Are Killed in Tacoma Wreck

CAR PLUNGES INTO BAY

80 Foot Dive Taken When Street Car Crashes Through Open Draw After Speeding on Bridge

TACOMA, Wash., Dec. 30.—(By Associated Press.)—Four persons were killed and four others injured this evening when a municipal street car plunged through the open draw of the 15th street bridge and dived 80 feet to the waters of the bay.

The dead: G. A. Farrow, railway clerk. Mrs. Robert Scott and Robert Scott Jr., six, her son. Tolojiro Obayoshi, 51, a Japanese.

Earl Harm, a railway engineer was slightly injured. Lucien S. Simard, 22, and K. Kaga were also in the hospital, suffering from shock and slight injuries.

Shris Nelson suffered a broken shoulder and other injuries. Charles Staley, motorman, escaped by jumping.

Eye witnesses of the accident and survivors expressed the belief that there were more than eight persons in the car and that other bodies will be found in the wreckage at the bottom of the bay.

These witnesses declared that the car, which was outbound to the tide flats district, approached the closed warning gates of the bridge at a rapid rate of speed. An automobile standing on the tracks waiting for the draw to be closed, was struck violently and thrown to one side against the railing of the bridge. Its one occupant was uninjured. The street car then crashed through the gate and toppled over the bridge, breaking in pieces as it hurtled through the air.

Just before it took the dive, however, the motorman was seen to jump clear of the car and toward the shore. There was no force to obstruct the view of the closed gate, and the warning red lights, witnesses declared.

Life boats were put out from the steamer Virginia No. 5, tied up to a dock beneath the bridge and the victims struggling on the surface of the water were picked up. Four died after being taken to hospitals. Tugs and launches combed the scene of the accident for several hours in the hope of picking up other bodies.

Clyde Staley, motorman of the car, was taken to the hospital in a daze for some time, telephoned the superintendent of the municipal railway his version of the affair. Staley declared that he saw the warning in plenty of time to stop the car under ordinary circumstances but the air brakes refused to function. He then tried the hand emergency brake and this, too, failed, he declared.

As a last resort he opened the sand box and three his motor in reverse. The car continued on its way toward the open draw, he asserted and as he saw an accident was inevitable he threw open the doors and, with a warning cry to the passengers, leaped out just before the car toppled over the brink.

The grief in Staley's family is heightened by the death of his wife's father this evening, a short time before the fatal street car accident.

CANCER CAUSE STUDIED

THREE OUTSTANDING CONCLUSIONS ARRIVED AT

NEW HAVEN, Conn., Dec. 30.—(By Associated Press.)—Three outstanding conclusions were announced by leading experts of medicine genetics today during a symposium on cancer conducted at Yale university by the American Society of Zoologists.

These conclusions were: That cancer is not an infectious disease. That cancer cannot be developed except by persons in whom there is a hereditary cancerous strain.

That even persons tainted at birth with a cancerous strain cannot develop the disease spontaneously but only through the agency of environmental factors, chief among which is frictional irritation.

The first was expounded by Dr. James D. Murphy of the Rockefeller Institute for medical research. Dr. L. C. Strong of the Bussey Institute, Harvard university, supported Dr. Murphy in his findings and added his convictions on heredity, which were disputed, however, by Dr. James Ewing of Cornell university.

MOTORSHIP FLOATED

VANCOUVER, B. C., Dec. 30.—(By Associated Press.)—After working all night salvage vessels today floated the motorship Boobyalla of the Pacific Steamship company which stranded yesterday in a heavy fog, while attempting to enter the harbor here with cargo from San Francisco.
