

Banner Building Year Forecast With Home Construction Starting

Plan Number 384
Five Rooms Planned for Narrow Lot

This five room bungalow is designed to give ample garden space, a 100 by 50 foot site. No residence lot should be of smaller dimensions, especially in Salem, where ground is cheap and climatic conditions are favorable to growth of lawns and shrubbery. The house is well planned to afford comfort to the average family. The porch across the front is attractive, and may be used to excellent advantage during the summer months. If the sun faces the west the porch will serve to shelter the living room from the afternoon sun. The front entrance is convenient to the stairway and is well located relative to the privacy of the living room. The fireplace is of course indispensable and the rug should be selected with care, considering the abundance of light from the front windows. The two downstairs bedrooms are large, and provided with plenty of window space. Tendency to

use the front bedroom as a hall-cheery, and the kitchen, with its adjoining breakfast nook, is well equipped. The plan for the enclosed back porch may be altered to afford space for a refrigerator and a small cupboard. Floor area totals 1144 square feet.

EXCAVATION DONE FOR NEW THEATRE

Construction of Office and Store Structure Will Start Soon

Excavation for Frank Bligh's \$250,000 theatre, office and store building to be constructed on the southeast quarter block of High and State streets has been completed. The steam shovel has been removed from the location. Approximately 5000 yards of dirt was removed from the location, most of it being dumped between Trade and Mill streets for the South Liberty street fill. Several trucks were kept busy removing the dirt, the excavation covering a period of several weeks. Construction of the building is to start immediately. The excavation for the Chambers building on High street between Chalmers and Center streets has also been completed. Carpenters will start immediately constructing the forms to hold the concrete walls of the basement.

I. L. PATTERSON ASKS SUPPORT AT PRIMARIES

outstanding in the state of Oregon, and no adequate provision has been made for their retirement. The state should authorize no more bond issues until a definite plan has been adopted for retiring those now authorized. All future issues should carry adequate and definite redemption provisions. No more tax-free bonds should be issued. All property should bear its just proportion of taxation. Salary Increases Opposed. If elected I will request the next legislature to submit to the people a constitutional amendment preventing an increase in the salary of any official of state or county during the term for which such officer is elected. Consolidation of State Offices. If investigation proves it necessary to maintain branch state offices in Portland, those branch offices should be consolidated under one roof, thereby effecting a saving in rental and an added public convenience. No prudent business man would have the several departments of his business scattered as are those of the state now in Portland.

WOOD'S AUTO TOP COMPANY TO MOVE

Will Occupy Weller Building On North Side of Center Street

Wood's Auto Top and Painting company will move into the Weller building on the north side of Center street between High and Church streets when it is finished. Installation of the gas tank near the curb has already been accomplished and the gas pump has been put in place. Forms to receive the concrete walls of the building have been completed and about half the concrete poured. The walls will be completely poured Monday. The building is to be two stories high. It is thought the building will not be completed in less than a month's time. Portland—Volunteers of America plan \$300,000 home for girls.

forth above a binding contract between the people of the state and myself, and I am signing this statement because I consider it my contract with the voters, and want to make the responsibility personal, rather than to have the statements made for me by friends, a club, a committee or a manager.

BOY SCOUTS PREPARE FOR SUMMER PROGRAM

(Continued from page 1) horse and rider contest, knot tying relay, mile relay race, fifty yard dash, 100-yard dash, water-bolling contest, first aid, tug-of-war, judging and rescue race. The events listed above will count on the general contest for the Burnett Trophy. There will be two special events in wall scaling and fire by friction. To the winners of these special events will be awarded pennants for first, second and third place in each event. It is up to every troop to get in and train for this rally so that they will make a creditable showing. Troop officers may receive a detailed program of the rally by applying at scout headquarters.

American Forestry Week

Here's a real good turn for every scout! Save a forest that's green now but is in danger of being burned down this summer! Take part in Forestry Week! Forestry Week is April 18-24 and Boy Scouts throughout the United States will do their part in making it a success. Government and state forest protection agencies rely upon scouts for reliable, constant, intelligent help. We must justify their confidence in us!

A considerable part of the annual smoke screen which cuts off the view of our superb scenery is due to small clearing fires which have been neglected or only partially put out.

A Safe Camp Fire

"Did you ever ask a scout how he would put out his fire before leaving camp? If you have, the average scout will answer: 'Put some dirt on it,' or 'stamp it out,' or 'wrong both times.' The only way to put out a camp fire is to put water on it and plenty of it. So that not a single spark is left. That's the way to leave a safe camp fire. A safe fire is dead fire. 'Earth, half leaves and needles, rotten wood and trash, won't put out a fire; in fact when this debris dries out as it will over coals, it makes a very fine fire starter. 'Stamping out a fire doesn't hurt the fire very much, and may hurt the soles of your shoes a lot. Water, and plenty of it, is what will kill a smoldering camp fire—dead. Pour on lots of water, stir the embers with a stick, pour on more water, and then run your fingers through the dead coals, and then, maybe, you'll decide to pour on some more water.' —W. G. WEIGLE, U. S. Forest Supervisor Snoqualmie National Forest.

While it is true that our annual accident fatalities here far exceed the total of American lives lost in the World War, it is also true that the saving of lives during the past 16 years—the difference between actual deaths during that period and the total would have been at the 1907 rate—is about five times our loss of life in the war. Every two years—despite the automobile—we save enough lives, as compared with the 1907 rate, to replace our sacrifices in France.

MACK'S BUILDING WORK IS FINISHED

Barber Shop Now Running, Millinery Shop Opened Yesterday

Mack's building on the southwest corner of High and Center streets has been completed. The corner store is occupied by a millinery and ladies' ready to wear establishment. The center store is occupied by a barber shop. What concern is to be established in the south room has not yet been disclosed.

The millinery shop opened Saturday. The barber shop has been running for nearly a week.

READ THIS STORY OF BARN-RAISING

(Continued from page 1) earnest. The boss carpenter was in charge. Patrick Dolan was everywhere at once. When the first frame (or bent, as it was called), was put together and firmly fastened at each joint with the wooden keys driven in, the men took their place to lift the top end, some few holding the foot of the posts. At first the men lifted the top end a little at a time, until the plike-poles could be brought into use. Jim Robertson, the boss, directing and giving the word to lift all together. He would call out, "Ready, men. Now all together. Heave-o-o-ee." The last word, "hee," would be given in a short, sharp command and at

that every man lifted until the frame was standing upright and braced. The second frame was put up and the two fastened together, and so on until the five great frames were set up and all braced securely and joined by the wooden pins or keys.

Now, the most exciting part of the job came with the setting of the purlin-plates. There were two of these, one at each side and on the top of the frame. They are set up to hold the rafters. There is always a race to see which side can put up the purlin first. The boss carpenter takes charge of one side and his assistant the other. Jim Robertson chose 20 men to go up on the building to put up his side, and Patrick Dolan took 20 men for his purlin. The men took their places and at a word of command they started in. It was a race for the word "go." Billy Lund went up to hold the foot on one of the posts for Patrick's side. Jim Stone was up on the other side to help the boss and hold the foot of a post so it would not slip out of place. Just as Pat's men were ready to raise the purlin, and they were a little ahead of the other side, one of the men seeing that his end of the plate needed shifting a little, took a bar to move it. He gave it a shove and the purlin swung around, for the men were not expecting this, and in its swing threw Billy off his balance. He fell, but as luck would have it, he was able to catch with his hands the frame on which he was standing, and save himself from what might have been a serious accident, for it was more than 20 feet to the ground. This incident put Pat's men behind and they lost the race.

Just at the moment the last key was driven into the last brace, the dinner bell rang. Out under the trees, long tables had been set, loaded with roast beef, vegetables, dishes of gravy, bread, pies and cakes. With a shout, the men gathered around the tables and the women were busy pouring coffee and waiting on the hungry workers.

When the dinner was over the fun really began. There were races, contests of strength, lifting, jumping, wrestling. All very good-naturedly entered by the men, but taken quite seriously by some who boasted their ability. A footrace between the boss carpenter and his assistant brought a good deal of amusement. Patrick won it easily.

The last thing on the program was to raise the boss carpenter on the shoulders of the men and carry him around the new barn. Jim Robertson said he would not be carried. That was a challenge for the crowd. The struggle lasted for a long time, until at last, clothing torn and tired out, he was forced to give up and allow himself to be carried, amid cheering and shouting. This ended the day and the barn raising at Bill Bitter's.

Snakes in India kill about as many persons as automobiles in the United States, reports the National Safety Council, which says that the accident situation in any country, at any time, naturally reflects existing conditions and habits of living. Wild animals in India kill about as many people as street cars in the United States; deaths by snake bites or wild animals are negligible in this country, and so are deaths by automobiles and street cars in India.

ELLSINORE THEATRE SIGN IS PLACED

Seats Will be Installed When Decorations Are Completed

Work on the front of the Ellsinore theatre, under construction on High street between State and Perry streets for George Guthrie, owner of the Oregon theatre, is being completed. The front of the large theatre extends across the street. The building has been set in sheet metal. Sockets for lights are so placed that the name of the theatre will be lighted generously. Sheet metal work on the marquee has been completed. The marquee has received its first coat of paint. This is red, to protect the metal. The finished coat

will probably be bronze, or some color in keeping with the general architecture of the building. Because of the intricate, hand work of decorating, this phase of the work has not progressed markedly during the past week. It is thought that about three more weeks will be required for the completion of the decorations. Immediately after the decorations are finished, the scaffolding in the auditorium will be torn down, and the seats will be installed.

"Help to Prevent Drownings," is the slogan that will be broadcast this summer by more than 60 radio stations in leading cities which are cooperating with the National Safety Council in its perpetual campaign to prevent accidents in public places, at homes and throughout industry generally. Appropriate literature on the subject of safe swimming will be circulated by 65 community safety councils. C. E. Hill, vice-president of the council, believes that the 1926 war on drownings will result in a substantial decrease in the number of deaths from drowning which in 1925 claimed approximately 6,506 precious lives.

WOOD'S AUTO TOP COMPANY TO MOVE

Will Occupy Weller Building On North Side of Center Street

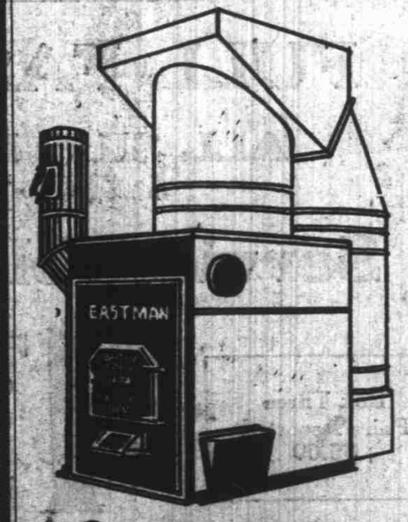

Wood's Auto Top and Painting company will move into the Weller building on the north side of Center street between High and Church streets when it is finished. Installation of the gas tank near the curb has already been accomplished and the gas pump has been put in place. Forms to receive the concrete walls of the building have been completed and about half the concrete poured. The walls will be completely poured Monday. The building is to be two stories high. It is thought the building will not be completed in less than a month's time. Portland—Volunteers of America plan \$300,000 home for girls.
