

One drop of water does not make a waterfall-- One man's effort will not build a community

PATRONIZING of YOUR COMMUNITY STORES AND INDUSTRIES MAKES PAYROLLS

How great this community may grow, how prosperous and complete it may become, depends upon us--our willingness and our desire to work together-- ONE for ALL and ALL for ONE

WILD BLACKBERRIES MAY MAKE AN IMPORTANT NEW COMMERCIAL CROP

B. C. Zielski, of the Hazel Green District North of Salem, Has Succeeded in Bringing the Plants Under Successful Cultivation, Treating Them Just as Loganberries Are Handled in This Section

Wild blackberries under cultivation may make a very valuable new commercial crop for the Salem district. B. C. Zielski, whose farm is eight miles northeast of Salem, has succeeded in "taming" the wild blackberry of the Oregon woods and lanes and burned over lands. One may reach the Zielski place by turning at the Chemawa four corners on the Pacific highway and going straight east on the Silverton road, to the Hazel Green school house. His place is across the

LEGAL NOTICES

ADMINISTRATOR'S NOTICE OF SALE OF REAL PROPERTY

Notice is hereby given that the undersigned administrator of the estate of Floyd C. Perkins, deceased, will, on and after Saturday the 12th day of June, 1926, at the hour of ten o'clock a. m. of said day, at the office of Ronald C. Glover, 203 Oregon building, in Salem, Marion county, Oregon, sell at private sale, for cash in hand on the day of sale, all of the right, title and interest of the estate of said Floyd C. Perkins, deceased, in and to the following, described real property, to-wit:

Beginning at a point on the east line of the right-of-way of the Southern Pacific Railroad company, 37,865 chains south and 13.58 chains north 89° 59' east of the northwest corner of the Louis Vandall D. L. C. No. 70, in township 6 south range 2 west of the Willamette meridian in Marion county, State of Oregon; thence north 89° 59' east 21.22 chains to the center of the Salem and Brooks county road; thence north 89° 59' east 9.60 chains to a stone and iron bar; thence north 0° 38' west 15.02 chains to a stone and iron bar on the east line of the Salem and Brooks road; thence north 33° 6' east 10.35 chains along the east line of the Salem and Brooks county road to an iron bar; thence west 21.976 chains to the east line of the right-of-way of the Southern Pacific Railroad company; thence south 31° 10' west 27.695 chains along the east line of said right-of-way to the place of beginning, and containing 58.25 acres of land, more or less, in Linn county, State of Oregon, and being a part of the Louis Vandall D. L. C. No. 70, in township 6 south range 2 west of the Willamette meridian, save and except all roads and rights-of-way.

NOTICE OF FINAL SETTLEMENT

Notice is hereby given, that the undersigned W. S. A. Massey, executor of the estate and last will and testament of Ira Stanley Massey, deceased, has filed his final account of the administration upon said estate, in the county court of Marion county, State of Oregon, and said court has appointed the 6th day of July, 1926, at the hour of ten o'clock in the forenoon of said day at the county court room in the court house at Salem, Marion county, Oregon, as the time and place for the final hearing of said final account and for the final settlement of said estate. Now, therefore, all persons interested in said estate are hereby notified and required to be and appear at said time and place so appointed for the hearing of said final account and then and there to show cause, if any exists, why said final account should not be allowed and approved, said estate forever and finally settled and said executor discharged.

road from the school house; north of that building. Mr. Zielski tells an interesting story of how the native Oregon wild blackberry has been lured from its haunts and made to grow successfully under cultivation. He says that one man in the valley tried for seven years to transplant the blackberry plants and secure berries from them. But his results were failures. The plant in some instances would grow, in others die of the blight, but in all cases refused all efforts to make it bear. His father also worked on trans planting of the berries, until finally a seed was persuaded to grow, shoot up a plant and from this seedling has come his two acre patch. It was found that this seedling could be tipped the same as a loganberry or any other blackberry and develop producing bushes. Mr. Zielski has been raising these and cultivating them for six years, and enlarging his patch as fast as he could produce the plants, until he now has two acres of them. They are earlier than usual this year, but he says the cultivated berries always are earlier in producing than the wild ones. The cultivated berries will run from a ton to a ton and a half to the acre. He has been selling

IRRIGATION AND DRAINING LANDS

A Statesman reporter ran across H. E. Brown of the firm of Brown & Johnson, realtors, Murphy building, Salem, yesterday. Mr. Brown told the reporter that he still has the idea he has advanced heretofore, of putting water on the land in the Willamette valley. He outlined a system which he thinks has merits. It consists of ascertaining the amount of tile needed to properly drain the water from the land in the winter, then so arranging that when the superfluous water has been drained from the land the tile may be plugged at the end and the water forced through the irrigating system into the tile, thus sub-irrigating the land. Mr. Brown claims that the water used in this manner will force plant growth much faster than that applied to the surface, as it is warmed by the soil before it reaches the roots of the plants. Another project which was advanced was the possibility of securing storage water which would be warmed by the sunlight before it was turned into the field. Mr. Brown cited as an instance of where this is practical, a place on the Little North Fork of the Santiam where it is possible with a small dam, to store approximately forty acres of water; also it is claimed that this water is absolutely pure and close enough to Salem that it may be utilized as a source of water supply for the city without undue cost.

MAJORITY RULE STAYS

ATLANTIC CITY, N. J., June 2. (By Associated Press)—The eighteenth biennial convention of the General Federation of Women's clubs today defeated the resolution of the Louisville delegation for "minority-voice" and refused to rescind the policy of binding majority rule. Only two of the five delegates of the Louisville women's club succeeded in addressing the convention, the others being shut out with cries of "question, question."

MINORITY VOICE BEATEN BY WOMEN'S CLUBS

GENERAL REVIEW OF FRUIT CROPS

cherries in California with the result that a number of California canners have invaded the north-west and have bought up practically all of the surplus. Loganberries Conditions so far have favored a good yield of good quality loganberries. Excess heat during the month of June, however, would have a very serious effect on the last half of the berries. Bartlett Peaches The crop looks good at present, both in Oregon and Washington, and the same is true of California, and it looks as though the quality will be very good. Growing conditions have been excellent, and there has been practically no difficulty from pests of any kind. Canned Fresh Prunes The fresh prune crop looks very good at present. The blooming weather for prunes was unusually good, there being no rains and consequently no scab or other defects, unless we experience rain at harvesting time a very fine quality of prunes will be packed this year, which will undoubtedly go a long way toward increasing the total pack of this item, which is gradually becoming more and more popular. Dried Prunes The above reference to fresh prunes, pertains also to dried prunes. The crop of dried prunes will be very fine quality this year and owing to the fact that the prunes are about two weeks ahead of normal they are considerably larger in size than we generally anticipate at this time of the year, for as heavy a crop as the orchards are now carrying. Young orchards are well loaded. Old orchards are more or less spotted. It looks as though the crop will probably be limited by drying capacity which is generally around sixty to sixty-five million pounds, unless we should have a long drying season like we had one year which lasted forty days, in which we dried seventy-two million pounds. Nuts Both filberts and walnuts look very good at present. Crops of both will be much heavier than last year, due to increased acreage and increasing age of trees. C. F. Brethaupt, florist and decorator, 123 N. Liberty. Phone 380. Flowers, bulbs, floral designs for all occasions. Pioneer and leader in Salem. An important western power consolidation recently announced, is the purchase by the Inland Power & Light Co. of the stock of the Grangeville Electric Light & Power Co. of Idaho; the Enterprise Electric Co. and the Deschutes Power Co., both of Oregon. All the stocks, 12,000 shares worth \$2,000,000, were bought at a good premium above par. Inland Power is an associate of the strong, enterprising Pacific Power & Light Co. of Portland. The plants are to be strengthened and extended, though no present physical connection is contemplated with the coast lines. Darby's Drug Store, where quality service and low prices meet. Everything in the drug line, nothing wanting in high class service. Court at Liberty St.

Loganberries Conditions so far have favored a good yield of good quality loganberries. Excess heat during the month of June, however, would have a very serious effect on the last half of the berries. Bartlett Peaches The crop looks good at present, both in Oregon and Washington, and the same is true of California, and it looks as though the quality will be very good. Growing conditions have been excellent, and there has been practically no difficulty from pests of any kind. Canned Fresh Prunes The fresh prune crop looks very good at present. The blooming weather for prunes was unusually good, there being no rains and consequently no scab or other defects, unless we experience rain at harvesting time a very fine quality of prunes will be packed this year, which will undoubtedly go a long way toward increasing the total pack of this item, which is gradually becoming more and more popular. Dried Prunes The above reference to fresh prunes, pertains also to dried prunes. The crop of dried prunes will be very fine quality this year and owing to the fact that the prunes are about two weeks ahead of normal they are considerably larger in size than we generally anticipate at this time of the year, for as heavy a crop as the orchards are now carrying. Young orchards are well loaded. Old orchards are more or less spotted. It looks as though the crop will probably be limited by drying capacity which is generally around sixty to sixty-five million pounds, unless we should have a long drying season like we had one year which lasted forty days, in which we dried seventy-two million pounds. Nuts Both filberts and walnuts look very good at present. Crops of both will be much heavier than last year, due to increased acreage and increasing age of trees. C. F. Brethaupt, florist and decorator, 123 N. Liberty. Phone 380. Flowers, bulbs, floral designs for all occasions. Pioneer and leader in Salem. An important western power consolidation recently announced, is the purchase by the Inland Power & Light Co. of the stock of the Grangeville Electric Light & Power Co. of Idaho; the Enterprise Electric Co. and the Deschutes Power Co., both of Oregon. All the stocks, 12,000 shares worth \$2,000,000, were bought at a good premium above par. Inland Power is an associate of the strong, enterprising Pacific Power & Light Co. of Portland. The plants are to be strengthened and extended, though no present physical connection is contemplated with the coast lines. Darby's Drug Store, where quality service and low prices meet. Everything in the drug line, nothing wanting in high class service. Court at Liberty St.

GENERAL REVIEW OF FRUIT CROPS

cherries in California with the result that a number of California canners have invaded the north-west and have bought up practically all of the surplus.
