

# Banner Building Year Forecast With Home Construction Starting

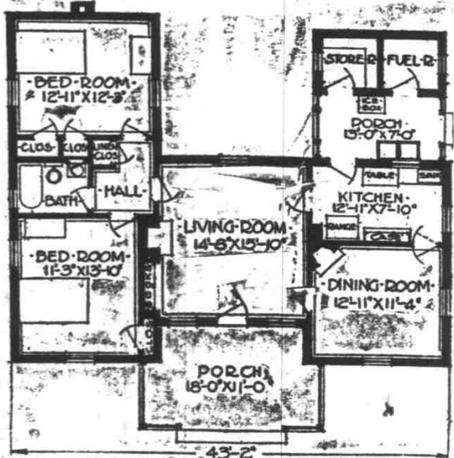

## Designed for Lovers of the Light and Open Air

THE SANDIA, DESIGN A510

**E**ITHER as a summer cottage or for permanent occupancy where the climate is mild this little bungalow offers exceptional promise of comfort and enjoyment. It is built with a view to insuring at all times and under all conditions the maximum of light and cheerfulness. Really it is merely an adaptation of the old Southern idea of two wings to the home with an open, covered living room between them.

In this instance the living room is inclosed but has handy entrances into dining room and kitchen on one side and into the hallway which leads to sleeping rooms and bath on the other. It is fitted with a big open grate that in itself is a promise of enjoyment beyond the average in the cool evenings of early fall and late spring when there is still a bit of tang to the air. Every room in the home has at least two exposed sides with windows, affording unusual lighting facilities. All are uniformly large and comfortable. The living room and dining room both have built-in features while the bedrooms are amply supplied with closet space. In the little hallway is a very commodious linen closet. The bathroom is conveniently located and large. Back of the kitchen an inclosed porch is partly taken up by storage and fuel rooms both of which are necessary in the absence of a basement. For the bungalow is of a distinctly Southern type, has no heating system and would be suitable only for an extremely mild climate if permanently occupied. The open porch is also fitted out for laundry uses. Were it desired to build this bungalow in any section of the country where severe winters are experienced the heating problem might be easily solved by installing the system in a basement under the living room.

The Common Brick Manufacturers' Association, Cleveland, Ohio, can furnish complete drawings for this design. Leaflet on brick construction sent upon request.

### HOUSES BUILT OF PERMANENT MATERIALS COST BUT LITTLE MORE THAN THOSE CONSTRUCTED OF MORE TEMPORARY MATERIALS

#### But the Upkeep Expense of Such Houses Is Small

See us for—common brick, face brick, building tile, partition tile, silo tile, sewer pipe, drain tile, vitrified sewer pipe.

## PAPER MILL ROOF SUPPORTS PLACED

### Between 4000 and 5000 Rivets Used in Constructing Addition

The construction work to support the roof of the new annex to the paper mill on South Commercial street has almost been completed. There is some riveting yet to be done before it is entirely finished, ready for the complete roof to be put on. Between 4000 and 5000 rivets were used on the building.

The roof has been laid over one third of the new steel work. The riveting is expected to be finished by the end of this week, when the rest of the roof can be finished. It is expected to take until the last of the month to complete this roofing.

The forms and reinforcing for the front wall of the upper part of the building have been put in place ready for the pouring of the cement. This is expected to begin Tuesday.

Tiles for the sidewalls are practically all laid on the basement part of the building. Some tile laying has been done on the first floor and it will be completed rapidly. This tile is hollow fire-proof clay tile.

Cement work at the rear of the building, where a stairway and elevator will be installed, is ready to pour. Some of the pouring has already been done, and it is expected to be finished soon.

Machinery to be installed on the first floor is expected to go in about August 15. Pits in the cement floor have been prepared to hold the machines.

## SALEM CLEANERS AND DYERS EXPAND

### Will Move Into a Very Fine New Building the First of the Month

The Salem Cleaners and Dyers, now located at 1215 South Commercial street, is to have a new home about August 1, in a building that is nearing completion, at 1077 South Commercial street, next to the Harrison filling station.

The new building is 25 by 60 feet, being erected by Jim Young. It will be a handsome structure, with stucco finish.

This will enable P. L. Fahlander, owner and manager of the Salem Cleaners and Dyers establishment, to accommodate his growing custom in much better shape, with new machinery and appliances; with everything modern and strictly up to date. It will put this establishment a block or so nearer the business center of the city, and right in the business center that is growing up in that part of Salem—which in a few years will make Commercial street one line of commercial concerns for a couple of miles.

Mr. Fahlander is to be congratulated on his business expansion, starting with small beginnings and growing through hard work and faithful service.

## SIX STEEL GIRDERS ARE BEING SET UP

### Forms From Concrete Work Being Removed From Bligh Building

Six huge steel girders, weighing two tons, are now being put in place to support the roof of the auditorium in the new Bligh theater building. They are expected to be all installed by the end of the coming week.

The forms are being removed from the concrete work in the lower part of the building. The cement work on the upper part of the building, projecting above the stage, will start this week. Plasterers and plasterers in the office section of the building will also commence operations this week.

The ventilating installations for the air supply system are being installed. Several large galvanized iron pipes are included in this. Inclines leading from the main floor of the building to the balcony of the theater are also being built.

A large crew of men is working on the plastering downstairs in the offices, so completion of this work is expected soon. Hogan of Portland, who did the plastering work on the Elsinore theater, is in charge of the job on this theater also.

The next concrete work to be done on the building will start as soon as the roof girders are laid. It consists of the rest six feet of wall on the top of the auditorium, where the girders join the wall.

The flooring on the mezzanine floor of the building is being laid and is expected to be finished within a few days.

## WILLAMETTE WORK BROUGHT TO END

### Alterations Show Marked Improvement Throughout Building

Work of repairing the registrar's office at Willamette university was completed Friday. A new partition running east and west through the office is in place and the office fixtures have been remodeled and rearranged.

A door has been put in the wall leading from the registrar's office to the classroom on the east side of it, which will be fitted up for use as an office for Dr. C. G. Doney, president of the university. Dr. Doney's old office will be used by Dean Erickson. The partition in the old museum room on the third floor of Eaton hall is finished, thus making the museum into two classrooms. Work of moving the museum exhibits to their new quarters on the balcony of the university gymnasium will begin soon.

Buster Brown Shoe Store. High class, stylish looking, comfort giving, long wearing shoes for the least money. Go and be convinced. 125 North Commercial St. (\*)

## CHAMBERS STORE PARTIALLY DONE

### Quarters for Capital Business College Said to Be Up to Date

The upstairs part of Chamber's and Chamber's furniture store on North High street is practically completed except for painting. This upstairs will house the Capital Business College, and is said to be one of the most efficient and up-to-date business college plants on the Pacific coast. The downstairs portion of the building is nearing completion and rapidly and the whole thing will be ready for occupation August 1, according to C. O. Engstrom, the builder.

Finishing touches such as sanding the floors are being made upstairs. The windows, blackboards and other equipment have all been installed. The basement is also completed and practically ready for use.

The plastering has been finished both downstairs and upstairs. It was finished upstairs the first part of the week, while the part downstairs was finished Saturday.

Lighting and plumbing fixtures have not yet been installed. The rest of the work must be finished before they can go in. It is expected that their installing will be done in a week or two.

With the plastering completed downstairs, the windows and woodwork will go in as soon as possible. This work will begin immediately and much of it is expected to be finished this week.

The side walk doors and thick glass lights for the basement under the sidewalk are on the grounds and are now being installed. There will be two side-walk lights of the usual kind and one double steel door.

## Sweden's State Labor Insurance Has Failed

STOCKHOLM.—Sweden's state organization for labor insurance has failed. Parliament has decided that the venture is too expensive, and the business will be liquidated. When compulsory insurance of employees was introduced here

twenty two years ago, a special department, acting as a government insurance company, was formed. Much pressure was exercised upon employers in favor of the national insurance body. Private companies persisted in competition and were able to under-sell premiums to such an extent that the bulk of the business went to the private companies.

## Busy Readers' Newspaper

(Continued from page 1.)

September 1. The motor vehicle department has been in the state house.

Dr. J. D. McCormick, for several years an instructor at Kimball College of Theology, has been promoted to dean, and will act as president of the institution after D. E. C. Hickman leaves, until a permanent head of the college is announced, it was stated by Dr. G. L. Tufts, field secretary. Dr. Keefer of Boston has been appointed to the faculty to succeed Dr. Riddle, resigned.

Friday, July 16

A meeting at which farmers and consumers will be able to discuss the proposed Salem public market, and at which the public market master of Eugene, and Eugene Chadwick, secretary of the Eugene chamber of commerce, will describe the Eugene market in detail, its operation and success, will be called next week, it was learned. Invitations have been sent to th Eugene mn and the meeting will be called by the local chamber of commerce as soon as it is learned when they can come.

Fire destroyed the Phelps aManufacturing company shop at Stayton, with a loss of about \$4500. The fire is thought to have started from a dust explosion in the wood-working department. The blaze was confined to one building and did not spread. The fire department from Salem went as far as Turner on its way to the fire, having heard a rumor that the flax fields were burning. The reports were found to be in error, and the local firemen turned back after learning at Turner that the fire was under control. Chairs and tables were manufactured in the plant prior to its destruction, and the chief loss was in the machinery used in this work.

Nearly \$2,000,000 will be needed besides the funds now obligated under the state bonus law to comply with the recent ruling of the state supreme court that members of the SATC during the war were members of the United States army and hence entitled to benefits under the loan provision of the act. More than 1000 men will come under this ruling in Oregon, it is estimated.

Three fatalities in Oregon due to industrial accidents during the week ending July 15 were reported by the state industrial commission. The victims were Fred Peterson, Bray Hill, planer feeder, George Bairey, Salem, pondman, and Edgar Berry, Veronia, underdecker.

The boys band from Father Flanagan's Boys' Home near Omaha, Neb., won the approval of two Salem audiences in their appearances at St. Joseph's auditorium under the auspices of the local council of the Knights of Columbus. The boys range in age from 9 to 13 years, and displayed phenomenal talent for such young performers.

## Students at Minnesota Ask Adoption of Rowing

MINNEAPOLIS.—Minnesota, home of the internationally known Duluth Boat club, would be represented in intercollegiate rowing circles under a student-backed movement initiated at the University of Minnesota.

To give the campaign an auspicious start two crews, wearing the colors of honorary senior societies recently staged a race over the Mississippi river course which skirts the campus. Although contesting in two old work boats borrowed from the St. Paul Boat club the ambitious oarsmen provoked considerable enthusiasm and 2500 students signed a petition urging the adoption of rowing as an intercollegiate sport. Minnesota has been deprived of rowing because of limited funds.

## Kiwanis Head Says Body Has Extended Its Service

MONTREAL.—John H. Moss of Milwaukee, president of Kiwanis International, who will end his administrative duties following the tenth annual convention to be held this week, said upon his arrival here that "the last year has been productive of great results." "The field of unselfish service has been shown to the world by what Kiwanis has been and is accomplishing in civic and many other ways," he said. "We have furthered the work of aiding the under-privileged child, made efforts to create a better understanding between the town and country people, promoted vocational guidance, and dedicated the President Harding International Good Will Memorial at Vancouver.

For forty years Patton's Book Store has carried a certain line of Bibles every one guaranteed against hard usage. If you wish a Bible, come see us. (\*)

## Charles Bryan Campaigns

(Continued from page 1.) contest in the republican primaries. The democrats in most of these states are, politically speaking, merely innocent bystanders. They resemble in this the boy who stood on the river bank when the water was rising. He said it would soon overflow the banks, and he added: "I wish that there was some one here who could prevent it."

**McMullen Gets "Normal" Vote**  
Adam McMullen, the republican candidate, is running for re-election in a state which is normally republican on local issues. In the contest of two years ago McMullen received 229,000 votes; Norton, the democratic candidate, 184,000, and Butler, the LaFollette nominee, 35,000. The administration of Governor McMullen has been in the main satisfactory to the great majority of the republican voters of this state, and he received, two years ago, the bulk of the republican insurgent vote, running on the ticket with George W. Norris, an insurgent republican for United States senator. J. Norris had 275,000, John J. Thomas, the democratic candidate, 165,000—a clear cut republican majority of more than 100,000. The LaFollette voters, numerous in the state, supported McMullen.

**Bryan's Platform**  
Former Governor Bryan, at a recent meeting in Beatrice, thus defined his platform: "Opposition to an increase in the two cent gasoline tax, opposition to the code system and a decrease in cost of the state government. He went on record as favoring the passage of a bill which would give every city and village the right to establish municipal oil stations and coal yards. He advocated further lower taxes, prohibition enforcement and removal of state officers who have been found guilty of violating the laws of the state.

**Harrop's Candidacy**  
Harrop is one of the outstanding progressives of Nebraska. Two years ago he was the progressive candidate for congress in the second district, which includes the city of Omaha, described locally as "where the west is at its best." Harrop polled 6000 votes in a contest practically decided in favor of the republican nominee, Sears, in advance.

## OYEZ GANDER SAUCE GOOD FOR GOOSE TOO

(Continued from page 1.) go well until he'd do the same thing over again. Suppose the beater could have been beaten legally; the dealer in blows dealt a few by the hand of the law. And not privately, but in the open, where all men might see his shame! His temper might not have improved, but it is possible he might have learned better control of it.

"Oh, you women! Hard on the man, as usual, I see!" exclaims an indignant masculine voice. "Be honest, now. Under certain circumstances isn't wife-beating justifiable? What about the nagging wife who wears her husband's nerves to a frazzle? Would you have a man pay full penalty for the rage a nagging wife arouses in him and let her go scot free?"  
Oh, no! We may be a woman but we hate a nagger as much as any man. We suggest that if the whipping post is to be reintroduced for the wife-beater the ducking-stool be brought back for the scold. What is sauce for the gander in all fairness must be sauce for the goose.  
"Shame greatly hurts or greatly helps mankind," once remarked Homer.  
Which effect does it most often have, we wonder!
