

MARION COUNTY RANKS NEXT TO BENTON AND MULTNOMAH IN STUDENTS AT O. A. C.

Marion Had 145 Last Year, 84 Being From Salem—Last of 40 College Buildings and Most Beautiful, \$300,000 Woman's Building, Ready Next Month—Work on the \$500,000 Union Memorial Building to Be Started This Fall—A Complete Description of the Various Activities at Oregon's Great Agricultural School

Marion county ranks next to Benton and Multnomah in the number of students attending the Oregon Agricultural college. The enrollment last year was 3593 regular students, and of this number 145 were from Marion county and 84 were from Salem.

The Oregon Agricultural college aims to bring its advantages as near to all the people as possible, to provide a liberal, thorough, and practical education.

The Oregon Agricultural college, land-grant institution established in 1882, is the state's higher institution of technology.

The school of vocational education was established to provide training for teachers of agriculture, commercial subjects, home economics and manual training.

The school of engineering and mechanic arts grants the B. S., C. E., E. B. M. E. degrees and has departments of civil engineering, electrical engineering, highway engineering, hydraulics and irrigation engineering.

The department of agricultural engineering of the school of agriculture is equipped with the most up to date machinery, which is lent to the institution by the leading implement dealers of the northwest.

The department of animal husbandry gives courses which are planned to fit the student for the actual raising of live stock on the farm so he may produce the highest grade of stock in the most economical and business like manner.

The department of dairying offers two courses for specialization—dairy production and dairy manufacturing. The former fits the student for dairy farming and the latter for technical and managerial work in the manufacturing field.

The department of farm crops deals with the problems of production, improvement, marketing, manufacture and uses of each of the field crops produced for food, storage, textile and special purposes.

The school of commerce offers a four year curriculum leading to the bachelor of science degree. Both the theoretical and practical sides of every subject are emphasized, the constant aim being to train the student for service, efficiency and business leadership.

In the junior year, the student may begin specialization in one of the following: accounting and management; advertising and selling; banking and finance; commercial education, economics and sociology; general business, markets and marketing, marketing of agricultural products, political science, and secretarial training.

The school of forestry trains men to manage the great timber properties of Oregon, that the maximum product may be received from them, that this maximum production may be continuous, and that the product itself may be economically and most efficiently utilized.

The school of pharmacy prepares students for the intelligent practice in all branches of pharmacy. Its equipment, courses of instruction, courses of study and other resources are arranged to meet the demands of the present day.

IS DISTINCTIVE SCHOOL FOR GIRLS

Activities Planned to Develop Character, Initiative, Self Reliance

By ALBERT BYERS

"Idealistic in its aim, yet practical in its operation." Such is the fewest number of words that describe The Catlin School, Westover Terrace, Portland, Oregon.

Admission to the college is contingent upon the presentation of fifteen acceptable units of high school work or the equivalent.

Graduates of the O. A. C. keep in touch with the college through the alumni association. The organization includes a general secretary in charge of alumni headquarters on the campus.

personality, combined with a commanding presence, a good voice and a smile which is the index of a cordial nature.

Everyone in Salem seems to know "Spec" Keene—and to admire him. The city and the athletic fans especially will support his endeavors with enthusiasm.

Miss Alida Gale Currey will be in charge of physical education for women. She is a graduate of the New York State College for Teachers; has studied at Cornell university and is now studying medical and corrective gymnastics at the Walter Reed general hospital at Washington, D. C.

Lestle Sparks, who has been a part time instructor, will be employed full time next year by the university. He will have charge of the gymnasium classes for men.

With these three competent instructors and with the health service continued under Dr. C. A. Downs the university has a program for the care of the physical well-being of its students which is surpassed by few universities.

Williamette limits attendance to a workable number of students. This number is about five hundred. The university would be known for the high character and scholarship of its students rather than for numbers.

"I should like this school to be the best college in all the land. It has the possibility, the right of way. Why do I think so?"

"1. It has a history built into it which inspires like a heavenly vision and thrills like a bugle call.

"2. Its location combines in just balance the urban and the rural.

"3. Its students continue to be virile, eager, responsible—product of the West.

"4. It is unique in adhering to a code of conduct which contributes to and does not detract from scholarship and self-directing Christian character.

"5. It has an unusual body of alumni and friends.

"6. It has a substantial foundation upon which it can build indefinitely.

"7. Williamette has these strong 'roots' which are able to produce, if properly cultivated, the perfect fruitage of a thoroughly great college."

The university also maintains a summer school, which is steadily growing in size and importance. This year it has a faculty of sixteen and a student body well over a hundred.

Situated on the slopes of the heights overlooking the city of Portland from the west the school enjoys the dual advantage of city conveniences with rural attributes of pure and invigorating atmosphere.

The school is by far the largest in the state, and judging from inquiries received the enrollment for future years will have to be limited.

Pomeroy & Keene, jewelers, never fail to give you 100% on the dollar. Watches, clocks, pins, charms. Standard high grade stock in all departments.

H. T. Love, the jeweler, 335 State St. High quality jewelry, silverware, and diamonds. The gold standard of values. Once a buyer always a customer.

Behnke-Walker students have made the highest records in the country, reaching as high as the correct adding of 100 figures in 5.7 seconds, and this department has won more gold medals than any other school in America in this class of work.

This college enables students to accomplish, in from four to six weeks, the completion of studies for which public schools require one whole year. After two months' tuition one student, without any previous training was typing without error at the rate of 45 words per minute.

Asked, "To what do you attribute the rapid progress made by your students?" Mr. Walker, the president of the college, replied, "To personalized instruction. Our classes are arranged numerically so that each instructor can give every student the maximum amount of help and advice which only personal contact assures and students are advanced only as their periodical tests signify the wisdom of so advancing."

The college has on its staff a total of 21 instructors, Mr. G. S. Johnson, a man of wonderful personality who has been with the college for many years, being the principal. In addition to the instructors there are executive officers to ensure the smooth working of the integral part of this large institution. A magazine called B-W-B-C (Behnke-Walker Business College) Broadcasting is published by the college, and this periodical contains news of interest to students, faculty and alumni, interspersed with helpful advice from the president, principal and other officials to the ambitious student.

Last year the college received 2113 calls for office help. A check of the list of firms supplied with employees reveals the following number of Behnke-Walker students engaged:

warm weather clean, pure air is drawn into a specially constructed chamber in the basement where the air is passed over water cooled coils and then released to the classrooms on the floors above. In cold weather the same procedure is followed, only instead of the air passing over the water cooled coils it passes over hot water heated coils. During the recent hot spell when the thermometer rose, one day, to over 104 degrees the temperature in the classrooms did not rise above 78 degrees. In its calculator department

SALEM HAS A SPLENDID SYSTEM OF PUBLIC SCHOOLS AND GOOD PLANTS

There Are Ten Good Buildings, and an Additional Modern Junior High School Building Is to Be Added, for the Southern Portion of the City—Has a Teaching Force of 72—Good Public School Systems Throughout This Whole Section

Salem has a splendid system of public schools. The total attendance last year was 4822. The year before it was 4658, and the year before that 4399. The gain over a six year period was 1225, or 34 per cent.

There will be a larger gain than ever before the coming school year. It will pass the 5000 mark, and be well on the way to the 6000 mark.

The high school attendance last year was 1154, of which number 370 came from outside the city. The junior high school attendance last year was 1196.

There is a teaching force of 72 including superintendent and supervisors. There are ten buildings, and the school plants are well equipped.

A new building is to be erected at once on the Tuxedo park site in the southern part of the city.

It will be a junior high school building, and right up to the minute. There will be sunlight in every room. It will be artistic, sanitary and hygienic.

The Marion County Health Demonstration forces have worked with the Salem public schools the past year, making wonderful additions to their efficiency. The same is true as to the rest of the schools in this county. The public school systems throughout the whole Salem district, in cities and towns and the country are good. Will compare favorably with any in the United States.

George W. Hug is superintendent of the Salem public schools. The school board is made up of Dr. H. H. Olinger, chairman, L. J. Simeral, vice chairman and Frank Neer, Dr. C. A. Downs and Mark McCallister. The clerk is W. H. Burghardt.

NEW STATE NORMAL NOW GOING CONCERN

Southern Oregon Teacher Training School Holding Summer Sessions

By ALBERT BYERS

The new Southern Oregon Normal School for training the future teachers of the state was dedicated with fitting ceremonies on June 26. President J. A. Churchill is serving as director of training. Summer sessions are now in full swing with many prominent educators in charge of the various departments.

The major portion of the equipment installed in the new school was furnished by the Northwest School Furniture company, 244-246 Third street, Portland, Oregon. This concern acts as Pacific Northwest distributor for the American Seating company of Chicago, the manufacturers of the equipment supplied.

An unique Employees' Welfare association of the American Seating company is occasioning considerable favorable comment on the part of efficiency experts interested in development work in factories and industrial institutions all over the country.

This association is encouraged and fostered by officials of the company. Paternalism, however, in this particular organization is entirely lacking, though welfare work of many kinds is carried on. Through the authority accorded the workers' councils employees failing to produce an agreed amount of finished work are not summarily dismissed. They are moved from one department to another until

the part of efficiency experts interested in development work in factories and industrial institutions all over the country. This association is encouraged and fostered by officials of the company. Paternalism, however, in this particular organization is entirely lacking, though welfare work of many kinds is carried on. Through the authority accorded the workers' councils employees failing to produce an agreed amount of finished work are not summarily dismissed. They are moved from one department to another until

the right niche is found for them and then their powers of production developed to the utmost capacity. Pride in producing the most perfect piece of workmanship is fostered by a system of acquainting the workers with information as to the exact location where their handiwork has been installed. The consequence of this is that they all take the artist's pride in the finishing of every part they produce instead of adopting the attitude so often found in factory workers, which is, unfortunately for them as well as for their employers, "how easily can I earn my pay check?"

American Seating company officials had the vision of placing the responsibility of the operation of its factories squarely up to the men and women who were to be employed, and they have never regretted that decision, for the plan has resulted in a better product, greater business, and greater harmony between employer and employee.

H. F. Woody & Son, 271 N. Com'l. St., furniture store. Bargains in furniture of all kinds. Agent for Lang ranges, best made. Also auctioneers.

Medford—First Presbyterian church will build \$25,000 edifice.

MT. ANGEL COLLEGE IS LEADING SCHOOL (Continued from page 11.)

Oregon. It is modern, complete and thorough.

Mt. Angel Academy and Normal, located there, is a first class boarding and day school for girls. This institution was established in 1882 at Gervais; moved to Mt. Angel and opened there in September, 1888. It is conducted by the Benedictine Sisters. Teachers all grades; gives four years of high school and two years normal training, and has a commercial course. Has fine buildings and beautiful grounds.

Medford—First Presbyterian church will build \$25,000 edifice.
