TRUCE PLAN REJECTED BY PRESIDENT CALLES

canvassed. Reports filing into the nation's capital necessarily are but abbreviated on account of an excessive amount of governmental telegrams, the Herald's corre-

spondent declares.

The remainder of the Herald's story follows:

"Conditions in the interior, particularly in the states of San Luis Potosi and Nuevo Leon are grave, and considerable trouble was encountered by state and federal officers in carrying out the central government's closing orders and the sealing of the church doors. Sunday morning, it is reported at Mexico City unofficially, but reliably, orders were issued by the federal government that strict prohibitions be placed on the sale of all arms and ammunitions and that the order be conveyed to all persons engaged in the sale of armaments. Violation of the new order will meet with drastic punishment.

"The military and police of Mexico City continue to be on the alert. Centers are heavily guarded and streets are under armed guards of police.

"Although an undercurrent of dissension is very evident, there has been no mass demonstration other than those of Sunday when bands of more devout church followers, forming human barricades, sought to prevent the execution of the closing order."

NOGALES, Ariz., Aug. 2.—Former President Alvaro Obregon, considered a potential presidential candidate in the 1928 Mexican elections, late today threw his support to President Calles in the nation's religious controversy by declaring the "high dignitaries of the Catholic church provoked this conflict."

The statement was contained in a signed declaration given to the Associated Press.

It was General Obregon's first public statement regarding the central government's policy since the religious law was enacted, and was issued after he had refused earlier in the day to commit himself.

the latest and greatest development in motor fuel

\$10000 in cash for a name for GENERAL GASOLINE

Every General Independent Dealer is now pumping this latest and greatest of gasolines—the gasoline that on May 30th broke the world's record at the hydroplane races at Newport. It was developed for hydroplanes. Now it is ready for your automobile.

\$1,000.00 in cash for the winning name

We need a name for this new gasoline—a name that will be expressive of a motor fuel that is well worth a premium but costs no more than others.

Here's what you will get from this new gasoline

The first time you use this new gasoline you will get

- A noticeable increase in power and pick-up both winter and summer
- Less carbon deposit
- No crank-case dilution
- A noticeable increase in gas miles
- No fuel knocks
- No pitted valves or fouled spark plugs
- Lower transportation cost

Drain your crank-case and fill up with Parabise. It's your insurance for as perfect a motor at the end of the run as at the beginning. For Fords use Para4rd.

Here's why you will get it

This new gasoline is highly volatile but perfectly balanced. Gas miles have not been sacrificed to produce that increase in power. Every drop vaporizes—it burns clean, leaving no deposit to produce carbon. It contains no acids or sulphur to pit valves or foul spark plugs.
