

On the Way to the Beaches

Ott's Service Station, at Hebo, familiar landmark to all Salem people who go to the coast by that route, is owned by P. D. Ott of Salem, and managed by Don L. Murry. Hebo is 72 miles from Salem and is at the cross roads of dividing line between the upper Tillamook county beaches and the lower Tillamook county and Lincoln county resorts. Hugh Arstiff operates a repair shop in connection with the station.

RING MAN VISITS

W. E. Burns had all week as his guest, P. C. Wilson, who represents the Perfect Circle Ring Co. Mr. Wilson is well versed in the principal of the Perfect Circle Ring, whereby it saves oil to the motorist, and was able to give the mechanics much valuable information.

MOTOR TRUCK HITS ENGINE

UNIONTOWN, Pa.—Because of a crash between a motor truck and a locomotive in which the locomotive got the worst of it, the Pennsylvania railroad recently started suit for damages against G. L. Hamilton, the motor truck owner.

In nearly every grade crossing race between a railroad locomotive and a motor vehicle that ends in a tie, the locomotive comes out on top. The tables were recently turned in New England, Penn., however, when a heavy coal truck crashed into a Pennsylvania railroad locomotive. L. L. Hamilton, owner of the truck filed suit against the railroad in which he asked \$3,800 damages.

Roadroad officials immediately filed counter suit against Hamilton claiming that he was the cause of the crash, since in their legal opinion the non-provision of anti-skid chains when needed constituted reckless driving. They further claimed that the locomotive had been damaged by the motor truck to the extent of \$157.81.

Pomeroy & Keene, jewelers, never fail to give you 100% on the dollar. Watches, clocks, pins, charms. Standard high grade stock in all departments.

Hospital: A way station on the road to the cemetery.

EARNINGS LARGE

OAKLAND, Cal., Aug. 21.—The earnings of the Star Car division of Durant Motors, Inc., including Hayes-Rund Body corporation, in the month of June, were \$511,658.97, after depreciation and federal income taxes, according to H. S. Jones, sales manager of the Pacific coast Star factory here.

Virtue: An attribute that can be maintained only by constant effort not to be caught.

Ford to Have Largest Steam Generating Units

DETROIT, Aug. 21.—The Ford Motor company has placed an order with the International Combustion Engineering Corporation for the equipment of three additional boilers at the River Rouge plant, with complete water walls and all heaters, amounting to more than \$500,000.

These boilers, together with one boiler already fitted with international combustion equipment, will be the four largest capacity steam generating units in the world. Each will have a generating capacity of 500,000 to 550,000 lbs. of steam.

GASOLINE AND DEMOCRACY OF FAR WEST

The Far West is the best place in the world to live in, to raise children in, to come to and stay in because it has more automobiles per thousand population and consumes more gasoline per car than any other region of similar dimensions on the globe. That is a real mouthful. Sounds like an old-time booster blurb, doesn't it?

Look at it this way: The possession of a car per family indicates a huge purchasing power in every stratum of the population. Gasoline consumption indicates that the families are using the bus. More families in the Far West have more money to spend for rubber rides, which means that they can afford to send their children to school for a longer time than anywhere else. Which in turn means broader education, better citizens, a wider, deeper democracy. And school statistics confirm the deductions drawn from automobile ownership figures.

Automobile Safety in One Finger

Ira Vall, national dirt-track champion, demonstrating the new safety vacuum gear shift to Harry Hartz, winner of the 150 mile race at Speedway, N. J., and to racing drivers and officials. Left to right: E. L. Thompson, Chairman Contest Committee, A. A. Freed Wagner, starter at the big races, Ira Vall and Harry Hartz.

After four years of rigid test an important safety device for automobiles has been perfected in the vacuum gear shift which makes the shifting of gears as simple as retarding the spark. By the use of a partial vacuum obtained from the engine all faults of electrical, mechanical and magnetic gear shifts are avoided. For beginners and those nervous when driving in traffic the vacuum gear shift removes their great handicap since no complicated coordination of leg and arm movements is necessary. The full braking power of the engine may be used descending steep dangerous grades. Left hand turns and stopping and starting in dense traffic becomes a simple question of moving one finger.

The gears can be shifted by the finger without taking either hand from the wheel. It is only necessary to move the speed selector just under the rim of the wheel and then throw out the clutch as usual. A special latch makes it impossible to go into reverse and gears cannot be stripped.

A final test of the new device was recently made. Three cars equipped with the shift started from Larchmont, N. Y., and made the trip to Boston with the driver

GROWTH DURING '25 LISTED BY STAGES

President of Oregon Motor Stage Association Sees Progress

"Stage service in the northwest has increased by leaps and bounds during the last year. Many new services have been inaugurated, additional schedules have been added on existing lines and new and improved equipment has been placed in service on all lines," so said Mr. Lemen, President of the Oregon Motor Stage Association, in a recent interview.

"The recent U. S. C. hearings over the United States have disclosed the fact that this growth and development is typical of the whole country," continued Mr. Lemen. "In every section feeder lines have sprung into existence, serving the sparsely settled districts and giving regular scheduled service into the metropolitan areas."

"This growth has been so rapid and conditions are changing so fast that it is impossible to say just what this new system of transportation will grow into." "Authorities at each of the hearings have advised that it would be a great mistake to handicap this new transportation agency and prevent its growth and development. No limiting regulation nor excessive tax should be imposed that will discourage or retard this development until it has had a chance to expand and prove

its economic worth. Within the next few years, when things have settled down and after the stages have taken their proper place in the transportation system, they with all the facts before them, the legislature can decide the proper place for the stages in the transportation field and can intelligently provide regulation and taxation."

"The Truck and Bus Bill was passed, imposing an excessive taxation on the motor stages, which would have compelled 85% of the stage lines to cease operations. This would have been a terrific blow to the isolated sections and towns, as there are a great number of towns in the State which have no other means of communication with the outside world besides the motor stage."

What is Kelp Ore? What Will It Do?

Why hunt all over America for a warmer climate for the winter when we have it here on the Nestucca Bay, in the southern part of Tillamook county, Oregon.

Why hunt for mineral springs when you can buy a pound of mineral that will make 20 gallons of the best mineral water in the world?

Why hunt for a health resort and good water, when we have them here? Millions of gallons of the best drinking water are going to waste every year.

Take advantage of this great opportunity. I will assure that you will be honestly treated and reasonably charged.

Kelp ore is mined from a blue shell rock formed by a sea-kelp deposit. The mineral is found only three feet underground. It belongs to the ocean.

The magnetic water is the water that is on the ore and the granite and the water from the surface can not come in contact with it. This magnetic water is very pleasant to drink, but the air must be kept from it.

The color is blue, but as soon as it gets in contact with oxygen on a low temperature (30 degrees) it turns red as paint and it will charge with an iod or earth at 50 degrees. It will charge on vegetation at a temperature of 90/100, when it is impossible to drink it. Also, the magnetic water will charge with microbes at a temperature of 105-120. The magnetic water is undoubtedly the water that was on the earth in the beginning of all vegetable and animal life millions of years ago, and I call it "Magnetic Eocene Water."

WHY BROOTEN'S KELP-ORE CURES

(Mildred J. Stott) The following is a conversation the writer had with Mr. Brooten of the Brooten Kelp-Ore Baths recently:

"Can you give me some points on Kelp-Ore?" I asked. "Why is it so curable and how come you to know of its curative power?"

"I can't spare much time," Mr. Brooten replied. "You see all my time is taken up by people who come here for help. I have to stretch my time as far as possible. I don't get more than five hours sleep in every 24 hours, but that's enough."

"But couldn't you in a few minutes give me some light on the mysteries of its

H. H. Brooten

curative properties so I can't get an idea?" I persisted. "An idea would be worth a lot to the people."

"Well, I have no time to go thru it all," said Mr. Brooten, "but maybe I can give you an idea" as you say. To explain it all would take days."

"To begin with—I handle the most necessary things for the benefit of humans—and that is vibration. We will say that Vibration makes the world; it is the founder of life. Vibration also is the main agent in Kelp-Ore. Millions of years ago Vibration was so immense, it worked this kelp deposit and charged it so strong that today, when properly treated, it controls other Vibrations which are a detriment to people and cause much sickness."

"The sickness of people today is over-Vibration. All things have Vibration, but an intelligent human has thoughts and these thoughts, if strong enough, will materialize in the body and form a siltate. This siltate is the cause of sickness."

"I don't mean all thought is injurious, but let a person worry, get dissatisfied or angry and a lot more things that upset him and his Vibration will double its speed. The result, when Vibration has gained this speed, is the formation, by the uniting millions of tiny, hard, sharp siltate fragments, of a harmful siltate. This siltate causes sickness of all kinds. It is a killer."

"Well, now, Mr. Brooten, what does Kelp-Ore do, as you say, to this Vibration, or over Vibration in a human?"

"Well, it is plain to see that Kelp-Ore has so many more Vibrations than a human being could ever have. That when a person drinks or takes a Kelp-Ore bath or puts a Kelp-Ore poultice on the Vibrations in a human are overpowered and brought to normal."

"Now, Mr. Brooten, I would like to ask one question more. How do you know that this siltate comes in the body from these Vibrations?"

"By taking an illustration from nature, you can see it plain: You take the sand on the beach. It is a siltate formed from Vibration. Going through the water, meeting the shore and siltate is formed."

The magnetic powers of the Kelp-Ore assists to control vibration. Send for booklet which gives full information and explains Kelp Ore. Beware of imitation Kelp Ore! There is fake ore on the market. The only original Kelp Ore is that having H. H. Brooten's signature and photograph on booklet and boxes. Kelp Ore, \$2.50 per lb. Postage extra. Trial size Kelp Ore, 50c. Kelp Ore, \$2.50 per lb. Postage extra. Kelp Ore Liquid, \$1.00 per bottle. Urine analyzed free. (Send 4 oz. bottle.) Cottages with stoves, bed spring, and electric light at moderate rates. Baths, \$2.00 each.

How to Reach Brooten's Baths Take Roosevelt highway south from Hebo. Turn off on road to Pacific City, about one-fourth mile after this turn you will see sign "Brooten's Baths." Take plank road up hill.

Mr. A. W. Atterbury, of Tillamook, Ore., had been sick for many years with heart disease and stomach trouble. Could scarcely drink anything, was so weak he could hardly walk around. Took baths for one month and drank the ore water, which made him feel like a new man. Could eat anything at the table. Gained 40 lbs. in weight and ever since has been in the best of health. Has traveled some and been at work and well for 9 years. Is now 75 years of age.

Mr. John Blackwell, of Sheridan, Ore., had been in poor health for a couple of years. Was told by doctors he was in the last stages of consumption. He was so weak he could scarcely walk. Was advised to take some baths and drink the oxidized ore water. Took ten baths in magnetic water. It would be impossible to convey an impression of the impurities that came out of his system. Took 10 more kelp ore baths and began to gain in strength and weight. In 25 days he had gained 20 pounds. He became heavier than he had ever been before, at 55 years of age. He is still using oxidized ore water to drink. Will not be without it. He enjoyed the best of health for four years.

Mr. S. E. Crawley, of Rhekroall, Ore., had been in poor health for many years. Some doctors called his troubles neuralgia and some called it rheumatism, and he suffered many deaths every year. He was advised by physicians to

and massaging with the wonderful soapy mineral and bathing in magnetic water, and also sweating in the oxidized steam, a glue-like perspiration came out of the pores, and in five days more of the perspiration came freely and the nerves and muscles and glands soon worked like clock work, and the patient's health was better than ever before. He has now been in good health for over two years and is 75 years old.

I was suffering with sugar diabetes. I went to H. H. Brooten for treatment. By analyzing my urine he found 80% solid. I took his treatment for four days and in that time sugar was gone. It seems to me that I can't be too thankful for the wonderful treatment. Diabetes must be inherited, my mother suffered many deaths with it. She had the dreadful disease for five years before she died, and the flesh finally rotted off the bones. I am hoping that these lines will be a help to people suffering of the same. Now I am drinking "Kelp Ore" every day.—ERWIN WOLFE, Blachly, Oregon.

I wish to say a few words in praise of Brooten's Kelp Ore as I can heartily recommend it for skin diseases. I had an infection on my face for years and it continued to spread and become more deeply seated. I tried Brooten's Kelp Ore and it healed like magic in a very short time and never returned.—J. W. Tabor, Bellingham, Wash.

I wish to say some praising words about H. H. Brooten's "Kelp Ore" so that others can be helped if they have the same misfortune as I had. While I was cooking over a hot stove my arm was badly scalded. I did not pay much attention to it and started a big washing and must have got poisoning from the soap. My arm started to swell up and began to pain something awful. A red streak began to come up the arm, my fever was 104 and blood poisoning had started in. I took two

pounds of Kelp Ore, put it in wash dish of cold water and bathed my arm in that solution for five hours. Sometimes I put the wash dish out of doors so that the solution would get cold. My fever went down to normal and I had no more pain and took up my work the next day. I can heartily say that H. H. Brooten's Kelp Ore is worth its weight in gold. It should be in every home.—MRS. VERA NALES, Tidewater, Oregon.

Mrs. Renny Mulky, of Amity, Ore., had chronic eczema for eight years and had tried all kinds of medicinal treatment but to no avail. She was advised by her family physician to take "Brooten's Kelp Ore Bath." First bath gave great relief. In seven days the pores were open, perspiration flowed freely and nerves were quieted. After 20 days she experienced no more itching sensation and was entirely cured. She has been in the best of health for eight years.

Mr. A. H. Rice, of Wenatchee, Wa., had sugar diabetes and could not eat anything but walnuts. He was waiting for the last hour to come and was a burden to his family and misery to himself. He heard of Brooten's Kelp Ore, and began to drink very strong solutions of it. He began to get better health from the first day. He gained in weight and in two months could take up his work as engineer on a steamboat. He has enjoyed the best of health for six years. A great surprise to his doctor.

A. G. Heater, of Sheridan, Ore., had chronic bronchitis and was in poor health. The lungs would not oxidize the blood and he suffered with shooting pains all through the chest and all through the body. He tried all kinds of remedies but found no relief. He was advised to take "Brooten's Kelp Ore" baths and in doing so found that his pores and nervous system were out of order. After fifteen days he experienced no more pain in lungs and was in first class order. He gained weight and has been in good health since.
