"I DID IT FOR NATION"
TRUDY EDERLE STATES

clared herself "the proudest mother in the world today."

Happiest Girl Living

When the tug drew alongside of the Berengaria just before noon and the mother hurried across the gang plank to meet her daughter, the young queen of the channel declared herself the "happiest girl in the world today to have reached home again."

Sirens shrieked, bands played and crowds cheered as the harbor was entered.

"Gee, it's good to have you again Mom—don't go," she cried as with wet eyes she kissed her mother. Together they faced the impatient battery of cameras.

Miss Ederle, a "water baby" to her mother 18 years ago when she cried at being lifted out of her little tiny bath tub, today was a very smartly clad, good looking young mermaid.

A glance would scarce serve to stamp her as an athlete of such prowess as to defeat channel swimmers and men's records also. Her sturdy but not over-large figure was clad in a simple blue serge suit, her attractive oval face framed in an orchid colored felt hat becoming to her face and skin, bobbed brown hair and blue eyes. She wore gray stockings and shoes and a painted pastel scarf and carried a modish French novelty doll under her arm. "Pop" Ederle, plump and smiling, wore a light gray suit.

"I was only interested in swimming while I was abroad, up to the time I made the swim," Miss Ederle told a hundred reporters who closed in around her to ask questions about her trip. "I had no time for shopping or sightseeing or anything. While I was swimming the channel I was sure I would succeed. After the hour it was rough the whole way, but I never wanted to come out of the water for a moment, and I felt fine when I got up on the beach.

"The criticism that two tugs helped me in the swim by protecting me is absurd, and its maker has apologized to me. When the two tugs were on either side of me I could do nothing, as I kept the wash from both, so I had to ask them to get in single file.

"I did it all for America and for the American flag," she concluded.
